At the Federal Blast Furnace, In Carver—for Slitting, Plating, and Rolling MILLS. SEYMOUR'S Patent Rollers. THEIR superiority consists in being free from holes and honey-combed places, which are commonly found in rollers cast in sand, or clay moulds. These patent rollers are cast in iron moulds, previously heated, and will be found to be more dense, solid and durable than any rollers heretofore used. Another important advantage they have over others, is, that the necks require no turning, but are immediately fit for use, and require less water to make them perform their work. AMIDST the tide of modern Romances, painting tales of extraordinary distress, or of desperate or artful villainy, which "harrow up the soul," and which it would be for the honor of young ladies to be ignorant of, this little book comes forward to follic notice, where, in a variety of incidents, not exceeding the bounds of real life, the proper, because elegant and natural dignity and importance of the Female character is exhibited in an interesting point of view, and presents examples of real and attainable excellence. The publisher was so much pleased with the perusal, that he was persuaded he should do a pleasing service to the community by sending it into circulation. August 24—mw4w
