A SIN-GLE TRIAL WILL PROVE that it reftores the determination of the fluids to the surface of the body, and beings on the common, healthful perspiration; that it dislodges and evacuates the tough, visicid phlegm, or mucus, strengthess the weakened vessels of the lungs, sheathes the aerimonious lumnours which irritate the lungs, and finally discharges them. Thus striking at the root of the disorder, the fymptoms are feourfe, effectivally and permanently conquered, the reverse of common medicines, which weaken the constitution and give strength to the disorder, for the sake of moderating for the present, some of its paintal effects.
