The Whigs and Antimasons of Somerset township will meet at the Court House, at 2 o'clock, P. M., on Saturday, 3d July, and elect delegates to the County Convention.

The productions of the county are corn, which is one of their principal crops .---Sugar cane, which they raise in large quantities. Wheat and barley they do not raise much. They also raise a great deal of fruit, such as oranges, citrons, lemons, and figs.

The Mexicans are too lazy to work. Il the country was populated by the Americans, it would be a great country-corn is already blossoming. They raise three very good; the weather is so warm now the sun.

On our way to Victoria last January, day of July 1847, to elect two persons the weather was pleasant; some days rafrom each district as delegates to a County ther warm. I received yesterday your letter of the 18th of January last. What could have delayed it so long, I cannot imagine. was very glad to hear from you; and I have very little of any importance to inform you of at this time.

Since the battle of Buena Vista, we have been at our old camp near Monterey. part of our battery was at Camargo, guarding a train of wagons, of which I was one of the number.

You want to know something of the Mexican character. From what I have been able to observe, the wealthy part of the Mexicans are a very proud people .--I have not had the opportunity of seeing many of them, for as last as we get into the country, they leave for the interior; but the poorer class have to remain, and they live in what we would call in the class of citizens, the laborious and north miserable hovels. But they are contenied. The Mexican women are ve-Ty neat in person, and dress very gay .---Some of the richer class of women you cannot get to see at all, they live very secluded, hardly ever seen at their doors, but the poorer class are very fond of or at least in bringing it under the protecshowing themselves. GENERAL AGRICULTURE RE-

PORT FOR MAY.

Taken as a whole, the weather experienced during the past month has been progress of the growing crops has been both rapid and gratifying. Its rapidity will be best inferred when we state that, in many of our forward districts wheat and the gratification is deduced from the fact that harvest work, under the present auspices, is likely to be commenced quite as early as the corresponding period in suming classes are likely to be met with home-grown produce somewhat earlier in the season than was anticipated a month or six weeks ago ; the necessity of unusually large importations of foreign corn after the close of July will be rendered unnecessary ; and, further, the prices of most articles are likely to assume a more moderate range than we had to note for

These opinions are, of course, offered in the expectation that the forthcoming crops, not only of corn, but likewise of potatoes, will be good ones. Should reserve state of things be experienced, of course, it would be out of the question to

With scarcely a single exception, the accounts which have reached us from all parts of England respecting the general appearance of the wheats, barleys, or other produce, are very flattering. As to the ravages committed by the wire-worm and other insects, we may state generally that they have been to a very trifling extent ; and our correspondents, one and all. speak in the highest terms of the present aspect of the fields.

Notwithstanding the severe losses terests of our colonies. Mr. Hawes, as which most of the potato-growers suffered under Secretary of the colonies, in replylast year, from the long-complained of ing to the motion, admitted most of the disease in that esculent, and the very high principles contained in his lordship's prices at which it has been selling in our speech ; but differed from him as to the various markets during the whole of the expediency of appointing a commission present year, we have every reason to previous, to inquire into such a subject. His lordship, in a very long and able speech, explained that his object was to obtain a commission to inquire-first, whether colonization could be applied so as to relieve those who remained in Ireland; secondly, whether it could be applied so as to relieve those who left Ireand; and, lastly, whether it could be so conducted as not to interfere with the in-

relief produce. From this circumstance, all blame as to the canal lines not being favorable to the poor Irish should be given ap.

Dr. D. JAYNE .- Dear Sir : I feel bound to you and the public, to avail myself of this opportunity of giving publicity to the extraordinary effects of your expectorant on myself. Consumption, Cough, Spitting Blood &c .- To Consumptives : Four-fifths of you are really suffering from neglected colds, o: an obstruction and consequent inflammation of the delicate lining of those tubes thro' which the air we breathe is distributed to every part of the lungs. This obstruction produces pain and soreness, hoarseness, cough, difficulty of breathing, hectic fever, and a spitting of blood, matter, or phlegm. which finally exhausts the strength of the patient, and death ensues. Jayne's Expectorant never fails to remove their obstruction, and produces the most pleasing and happy result. It is certain in its effects, and cannot fail to relieve.
