THE MILITARY FIELD.

Cheerful, Hopeful, and Truthful Survey of It.

POPULAR ERRORS CORRECTED.

The Immense Work Accomplished by the Union Armies.

POPULAR ERRORS REGARDING THE LENGTH OF THE WAR.

WASHINGTON, August 27.—The course of public opinion during the war has been marked by two errors as to the length of the war.

The first was an unjustified prediction of the length of the war, based on the fact that the military situation was not as favorable as it appeared to be.

There is no longer any doubt that the war will be a long one, and that it will require the full resources of the Union to bring it to a successful conclusion.

The second error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

The third error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

The fourth error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

The fifth error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

The sixth error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

The seventh error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

The eighth error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

The ninth error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

The tenth error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

The eleventh error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

The twelfth error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

The thirteenth error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

The fourteenth error was a prediction that the war would be a long one, based on the fact that the military situation was not as favorable as it appeared to be.

JAPAN AND CHINA.

Special Correspondence of The Evening Telegraph.

Yokohama, Aug. 27, 1864.

The past winter has been a season of comparative inactivity, both commercial and political.

The exception of cotton, there has not been much done in the staples of the country.

Now appears a promise that an increased home demand will be the occasion of a short supply for exportation.

The most marked event since the 1st of January, was the arrival of Messrs. de Roche, the French Minister, and the departure of his predecessor.

The arrival of Mr. Roche is the first since the departure of his predecessor, and is a sign of the return of peace.

At the council of the Government, the subject of the war was discussed, and it was decided that the Government should continue to fight.

The Government has decided to continue to fight, and to continue to support the Union Army.

The Government has decided to continue to fight, and to continue to support the Union Army.
