THE ELECTION TO-MORROW. The State election, which takes place to-morrow, is of the highest importance.

It is not only over-estimated. It is only, of course, certain that this State will go in November as it goes now.

But this State election, now so near at hand, is important in another respect. The people are to choose Representatives to the new Congress.

It is essential that he shall be sustained in the manner hereafter. To effect that end, the people must take care to send to Washington Representatives who will sympathize in the policy of the Administration.

Therefore the Republican party must put forth all its strength to-morrow, and use every effort to carry its Congressional ticket in each separate district.

A FLANDER REPEATED. In all political discussions, falsehood and personal abuse make more enemies than friends for the cause which requires such means for its support.

There are but few persons in this community whose character for amiability and unblemished integrity stands higher than that of Mr. BULLOCK.

Whether it be from the proximity of the youth of this country, or from the remarkable foresight on the part of the adult portion of our population, it is very certain that we

Americans comprehend more clearly than any other nation the simple but important fact, that children become men; and that, to form a free and liberal government, and capable of continuing it, we must give our children the advantages of a good education.

Notwithstanding our community was prepared for an immense manifestation on Saturday night, of attachment to the cause of freedom, progress, and civilization.

As regards Mr. BULLOCK's nomination for Congress, it will know in his District that so far from seeking the honor, he positively declined it for several weeks, and was at last prevailed on by the earnest, persistent entreaty of his neighbors and friends to yield up his own wishes and private interests to their importunity.

But the very qualities which unfit Mr. GEORGE BULLOCK for the vulgar, and too often dishonorable, arts and expedients of the professional politician, render him a highly meritorious candidate for the office for which he has been nominated.

When, on the 4th day of July, 1776, our fathers declared to the world that they were "free and independent," they did that which, while applauded by the friends of freedom to the remotest corner of the earth, was looked upon, even by the most sanguine, as an experiment of doubtful issue.

America has proved to the adherents of the old monarchical system that men are capable of self-government, but that to possess this capability they must be elevated above the standard of the masses living under a monarchical system.

Men, in olden times, spent years and countless treasure in raising for themselves monuments, by which their names might be perpetuated in the memory of their race.

It is essential that he shall be sustained in the manner hereafter. To effect that end, the people must take care to send to Washington Representatives who will sympathize in the policy of the Administration.
