### AMUSEMENTS.

ACADEMY OF MUSIC.-L'Africaine was repeated on Saturday night, to neither a fashionable nor a large audience. This shows that the opera does not containithe germs of popularity. A great impressario (Ullmann) once told us that the only appreciators of true scientific music were what are discourteously called the "dead heads" (meaning the only heads with live brains), adding that if it were not for these applause would never be started. L'Africaine is especially an opera that requires such musical knowledge, taste, and experience as constitute a musical

In this grand opera they alone can thoroughly appreciste the music, and its admirable application, the harmony, the instrumentation, and the wonderful application of the distinct instruments to the musical and dramatic situation. Some critics have discovered great richness of melody, which means in common parlance a tune, but it can only be that they are not aware of the technical meaning of the

The score of L'Africaine at the piano, deprived of its orchestral effects, is dry and poor in melody. Any of Donizetti's compositions, a maestro of inferior merit to Meyerbeer, are more pleasing, and bear the absence of the grand operatio effects better. L'Africame can never be a popular opera, but even by those who cannot appreciate it, L'Africaine should be seen and heard. It is one of the great works of genius of one of the celebrated and great musicians of the century-a posthumous work, too, the last, the seal imprinted on a life's labors, three inspirations of which-Robert, the Huguenots, and Dinorah-will be rememberedland admired, as we admire Mozart and Beethoven.

The public should, therefore, all hear L' Africaine, a gigantic work of science, skill, and musical genius, To-night Martha, the most frequently given and the most popular of modern times, will be given. Miss Kellogg is exactly suited to the graceful and elegant "Martha." On this occasion Miss Adelaide Phillip will make her appearance. Contraltos are as rare now as sopranos used to be. Miss Phillips is the only centralto in the United States, a finished artist, with a delicious voice. We await Signor Infre as "Lionel," his finest performance. It is said to pronounce final judgment on him. Wednesday there will be a grand matinee, bringing back our German favorites.

WALNUT STREET TREATRE.-Mrs. John Wood. the ex-manageress, the rollicking fun-loving actress, the singer to whom nothing is wanting but voice, will make her first appearance, for two years, in Jenny Lind. Her imitations of Brignoli and other artists are in this piece admirable and delightful. Mr. and Mrs. Charles Walcott have been engaged to support her, the Walnut Street Company being inefficient, especially as the best of the tew members are transferred to New York.

NEW CHESNUT STREET THEATRE -The Sleeping Beauty, with the visions of Heaven, will be repeated. together with The Phantom, a spiritual ghost story of thrilling metaphysical interest. We consider Boucicault's Phantom as the finest sensation piece that has ever been written, just as Mrs. Shelley's 'Frankestein" is the finest sensational and spiritual novel of the century.

ARCH STREET THEATRE. -Still Lost in London, to which Mrs. Drew, in the interest of its production in other cities, is determined to give popularity.

#### Drs. Hunter & Ramsay.

We copy the following flattering notice of the above-named gentlemen, which appeared in vesterday's Press. The letter alluded to will be published in either Wednesday's or Saturday's issue of The Telegraph, and we bespeak for it a careful perusal:-

DRS. HUNTER & RAMSAY,-The readers of the Press have doubtless perused with interest and profit the able letters of Drs. Hunter & Ramsay, on Consumption and its Cognates, which have appeared from time to time in the Press and other local papers. The simple style of these articles cannot rail to favorably impress the reader, while the research and wide experience of which they give evidence make them doubly valuable to the public. But there is one poin to which we wished more particularly to call attention, believing it to be of the deepest interest to thousands, viz :- The curability of Consumption This question has formerly been so involved in doubt that the public was perhaps justified in entertaining skepticism as to the sufficiency of any medical skill to heal the lungs after once they became the seat of tubercle. These gentlemen, however, contend, with great force and skill (producing numerous instances of cure to prove the same), that by means of medicated inhalation-i. e., by bringing the necessary remedies in the form of medicated vapor directly in contact with the parts diseasedthese parts being soothed, assume their normalland healthy condition. Their letter on this very subject, however, will appear in to-morrow's Press, and we bespeak for it a careful perusal. At all events, all the light that can possibly be thrown upon the nature, causes, and treatment of pulmonary consump tion-the scourge of our race-will, we feel sure, be gratefully received by the public.

The Immense Resources of Nevada. THE vast wealth of Nevada is only beginning to be understood. Recent reports from that region prove the existence of immense deposits of silver-bearing ledges that have not, as yet, been opened by the hand of man. The whole amount of silver taken from the mines of Nevada during the year 1865 will reach the enormous amount of fifty millions of dollars. In 1864 it was about forty millions, thus proving that the productiveness is gradually upon the increase. It is estimated that, with the present limited means of production, three tons of solld silver are taken from the mines of Nevada every day. Twenty ledges alone produced between three and four millions of dollars worth in the short space of the three months ending in April, 1865. The Reese River district, which is, perhaps, the richest argentiferous region of the world is being rapidly developed, the mines of Lander Hill, in the immediate vicinity of Austin, having averaged \$204:50 dollars per ton during the year 1865, which is greatly above the productions of any silver mines yet discovered. The Revenue Extension Company, who own nineteen distinct ledges, are tunneling their property with eminent success. It is situated at the end of Lander Hill, and by boring two hundred feet have already struck a ledge that is yielding remunerative returns. Mr. D. S. CHILDS, the Superintendent, who is a practical engineer, and upon the spot to oversee the operations, reports that within the coming six or eight weeks the work will be in a state of progress that will guarantee the production of an immense amount of ore, that can be profitably reduced. It should be observed that by the making of a tunnel the entire wealth of Lander Hill is poured into the coffers of the

Revenue Extension Company, they having the earliest outlet for the ore to the surface, and are privileged to extend the tunnel to an unlimited extent. They consequently hold the key to the whole range of ledges with which the hill abounds, supposed by Mr. CHILDS to number at least five hundred. The stock of the Revenue has been disposed of so rapidly that it is the intention of the Company to close their subscription! books in the course of ten or fifteen days, and persons desiring to invest should do so immediately. There can be no reasonable doubt of the fact that the Revenue stock will pay, It is in the hands of well-known business men, who are devoting their time and attention to their property, and are determined to make it an undeniable success. Nevada is our youngest State, but promises to be one of our richest. The following returns made by the Superintendents of some of the mines upon the "Comstock" lode, in Nevada, will give an idea of the success which is there attending

operations. It embraces the three months Belcher \$314,180 31 Uncte Sam \$4,608 00 Crown Point 86,331 00 Savage 605,233 40 Yellow Jacket 720,107 54 Potosi 398,120 92 Eclipse 55,568 05 Ophir 57,712 20 Empire 119 208 49 N. Y. and NeBacon 41 989 07 Vada 41 900 98 Imperial 201,344 55 Gould & Curry 477,193 98 Choliar 440,000 00 Confidence 89 042 10 Mexican 18,012 00 Challenge 51,759 44 Stephenson & S,349 72 ending April, 1865:-

Trade Over the Plains During the Past Year.

The Atchison (Kansas) Daily Champion publishes an accurate statement of the amount of freight shipped from that point across the Plains for the past year. Twenty-seven firms and individual freighters are engaged in this trade. During the year the aggregate amount of their shipments was 21,500,000 pounds assorted merchandise, requiring for its transportation nearly 5000 wagons, over 7000 mules and horses, and nearly 28,000 oxen, employing upwards of 5000 men. Over half of this freight went to Colorado, and the remainder to different points in Utah, Montana, Nevada, Idaho, New Mexico, Nebraska, and Western Kansas, including military The capital invested in this business is over \$6,000,000. The value of the merchandise and machinery transported is not definitely

The overland coaches which leave and arrive at Atchison daily have taken out and brought in over 4000 passengers, and have also brought here \$2,400,000 in specie, and carried out 4600 pounds of freight. The Butterfield Overland Despatch Line has also carried a large number of passengers each way, but as that line was established late in the season, no accurate state-ment of its business is made. Freighting business in this city is seven times greater this year than in 1861, five times larger than in 1862, four times larger than in 1863, and 5,000,000 pounds larger than in 1864. The most experienced ireighters think that the trade in 1866 will be nearly double that of the past year.

#### MATTERS OVER THE RIVER.

THE CRANBERRY TRADE. - The culture of cranberries upon the lowlands of New Jersey has amply rewarded those who embarked in the business. Scarcely ten years ago the attention of agriculturalists was drawn to the importance of producing this berry in large quantities. market price was gradually advancing, while the supply appeared to be stationary; and the natutruit, unassisted by art or science, became scarce and costly. Since that time a number of gentlemen have pprchased tracts of low ground or beg-land, always found at the headwaters of creeks and rivers, especially in Burlington, Ocean, and Monmouth counties. The nead waters of Mullica river, dividing Atlantic and Burington counties, overspread many acres of low land adapted to the cranberry culture. In the spring the water is easily drained off, and raise a plentiful crop.

Since the construction of the Delaware Bay and Raritan Railroad, all kinds of fruit have been more extensively cultivated; and now that the needed facilities for transportation to Philadelphia and New York are completed, this section will become vastly productive. The cran-berry trade, however, is second only to that of the strawberry; and the different sizes, qualities, shape, taste, etc., of the one afford as many varieties as the other. With the advance of cultivation has come more than a proportionate demand. The home consumption is nearly equalled by exports, and dealers find it impossible to fill foreign orders. The great impetus given to the raising of cranberries originated with the army, acidulous qualities made it as necessary to the medical as to the culinary Idepartment of the camp, and it became an essential in every hospital. The cessation of hostilities, it was feared, would be a severe blow to the trade; but still "cranberries are firm;" and preparations are being made to devote a still larger space of ground to the business.

The three lower counties of Atlantic, Cape May, and Cumberland, all well watered, possess thousands of acres upon which cranberries can be grown with profit; and, if we are to judge from preparations now making, a large amount of labor and capital will be devoted to the business the coming season. The headwaters of the streams in New Jersey seem to be adapted by nature to the culture of this berry; and, being less perishable than other fruits, it is destined to ecome one of the most valuable products of the

A CHEERING SPIRIT OF ENTERPRISE,-The difficulties experienced from the scarcity of tenant houses, during the past year especially. has awakened a spirit of enterprise which, in the building season, will go far towards supplying the demand for houses in Camden. Several capitalists, we learn, design putting up a num-ber the coming season, besides those to be put up for individuals in different portions of the city. Mr. Jarvison, the extensive lumber dealer ity. Mr. Jarvison, the extensive lumber dealer ! North Ward, will build a row of three-story brick houses on his grounds on Front street. There will be quite a number erected, also, near one or two other large business establishments North Ward.

Now that capitalists find that there is no hope of procuring building material any cheaper for ears to come at least, they are disposed to in vest in such improvements as will benefit the town and add to its growth. Lots, although still held at too high a figure, are, of course, far more accessible to poor men than those on the opposite side of the river, and our facilities for crossing the river have become so perfect that mechanics can reach the workshops in Philadel-phia much sooner than from the suburbs of that city, and thus save a great tax for car hire.
Aside from this, taxes are now, and always will
be, much lower on this side of the river. To those who destre to invest in real estate we know of no place that offers better inducements

Annoying .- The extreme cold weather, ANNOYING.—The extreme cold weather, for several days past, has played havoc among the hydrants and water pipes. In almost every square families are annoyed by the bursting of pipes, and our plumbers will be kept busy for a day or two. If housekeepers would be careful to wrap their hydrants, and all exposed parts of pipe, with straw, or old cloth of some kind, much annoyance would be saved to both landlord and tenant. lord and tenant.

BLOCKED WITH ICE .- The intense cold last night formed ice to that degree of thickness in the Delaware, that the ferry-boats were much

impeded in making their regular trips. If such severe weather continues for a few days longer it is apprehended that the river will be frozen sufficiently to allow persons to cross on the ice.

DONATION.-The family of the Rev. Mr. Carman, of Smithville, Atlantic county, a night or two since, was surprised by his congregation and friends, who made him a donation visit, and cheered his heart by leaving with him the sum of one hundred and eighty-two dollars.

Busy.-To-day the ice men of Camden are busily engaged in hauling ice to fill their houses, and they obtain some good specimens of that very necessary article.

THE COURTS,-The Courts for Camden county commence their January term to-morrow,

CITY INTELLIGENCE

[For Additional City Intelligence see Third Page.]

CELEBRATION OF THE ANNIVERSARY OF THE BATTLE OF NEW ORLEANS BY THE SOLDIERS OF 1812.—This morning the anniversary of the battle of New Orleans was celebrated by the Old Soldiers of 1812, who met in the Supreme Court room for that purpose. The attendance was large. Alderman Peter Hay, President, and John H. Frick, Secretary, of the Association, were both in their usual places.

The Executive Committee presented the fol-

The Executive Committee presented the following report:—

Frevious to the time of our last annual meeting the Association received an invitation to be present at the ceremony of laying the corner-stone of the monument in the Soldier's National Cemetery at Gettysburg, on the 4th of July.

The invitation was accepted, and some of our number attended and participated in the beaut fully accepted.

Through the exertions of one of our committee Colonel Childs, who had proceeded to Gettysourg day or two in advance, comfortable quarters were

We were received with great respect by the clizens, and had the post of honor assigned in the Since our last meeting several of our number, and since our last meeting several of our number, and a large number of soldiers of 1812, not members of the Association, have departed this life, but owing to the continued illness of Captain George Emerick, the indefatigable Chairman of our Executive Committee, we are unable to give their names or the corner to which they were attended. corps to which they were attached. Our numbers are rapidly diminishing, and the time is not distant when the Association, around which cluster so many pleasant recollections, will be among the things that

were, at least so far as relates to the original members. We trust, however, that their sons will fill the ranks and preserve it in existence for many years to

The Committee submit the following resolutions: Resolved, That we return our heartfelf thanks to the Aimighty Ruler of the universe for the brilliant success which He has granted to our arms; for the restoration of peace throughout all our borders, and the re-establishment of our giorious Union in all the vitality, and on a foundation so stable, as to render it secure from all the assaults of foreign or domestic

Resolved, That we again press upon our Government the necessity and the justice of providing liberally for the support of all the mallaut soldiers and seamen who are suffering from disease or wounds

whilst in the service of the country.

Reso ved, That we cannot withhold the tribute of approtation which we feel to be justly due to President Johnson for his noble efforts to reorganize the States lately in robe hon, and to enable them to resume the r constitutional position in the Union at the earliest moment practicable, and that he will be heartily seconded and sustained in his patriotic efforts by Congress and the records. Congress and the people.

The resolutions were unanimously adopted. On motion it was resolved, that the present officers of the Association serve until the next annual meeting.

The farewell address of General Jackson upon his retiring from the Presidency, March 3, 1837, was read by Colonel Snowden, after which the meeting adjourned.

THE GERMANTOWN TRAGEDY. - This morning, Chief Detective Franklin and Detectives Taggart, Levy, and Tryon, started for Germantown, in order to further investigate the horrible tragedy committed at that place on Sat-urday morning last. Christopher Berger, who has been arrested charged with the crime, is about 27 years of age, has been married about ten months, and has one child aged two weeks The prisoner is locked up at the Germantown Station House. The detectives have obtained considerable circumstantial evidence while points towards him as being the murderer. These facts are withheld until the Coroner resumes his investigation on Thursday next. ger has resided in Germantown about six months and is by trade a wool sorter. He is not believed to have done anything in particular since he has resided in that town.

In reference to certain matters which needed explanation, and which very much jeopardize his life and liberty, he has told different stories, and upon being cornered has acknowledged that his statements were falsehoods. His acknowledgment would be followed up by another tale, which upon investigation would also be found to be untrue. The prisoner is perfectly calm and collected, although he is very communicative, but what he says in regard to his whereabouts, etc., has been found to be without the least shadow of truth. There is considerable mystery to be unravelled, and for that reason we are compelled to withhold facts which, if published, might interfere with the ends of justice.

ATTEMPTED ROBBERY .- This morning, about quarter before 3 o'clock, James Wilson hailing from Chester county, was arrested upon the charge of breaking into Simes drug' store at I wenty-second and Market streets. The front door is partially constructed of sheet iron, which was pushed in, and in this way an entrance was effected. The accused was arrested in the store by Officer Atkinson. Wilson was committed for trial by Alderman Jones.

RAILBOAD DEPOT ROBBED .- One day last week the depot of the Philadelphia, Germantown, and Norristown Railroad, at Manayunk, was broken into and robbed of two dollars in money, and about forty trip tickets. The tickets were numbered, and on Saturday last a couple of boys got on the train and presented two of the stolen cards. The lads were arrested and held for trial by Alderman Gibson.

LARCENY .- This morning George Thompson was committed by Alderman Fittermary upon the suspicion of larceny. The accused was arrested at Seventh and Bedford streets with a basket, containing a lot of crockery, in his possession. He said he was taking them to Walnut street wharf.

YOUTHFUL PICKPOCKET.-A lad only fourteen years of age was arrested on Saturday night, at Fourth and Monroe streets, upon the harge of picking pockets. He was committed by Alderman Moore,

SWINDLING.-Whitney Milward was arrested at Eighth and Race streets, on Saturday, upon the charge of collecting money and repre enting that it was for the Pennsylvania Hose He was committed by Alderman Company.

This is the memorable date When, by old Hickory's means, SI ame and defeat were Britain's fate At the fight of New Orleans. There Jackson proved, to each one's sense,] That cotton was a good defense Against invaders bold;

THE EIGHTH OF JANUARY -

But, 'gainst Jack Frost to interpose, Give me warm wool, made in such clothes As at the Tower are sold. GENTS', YOUTHS', AND BOYS' CLOTHING. TOWER HALL, No. 518 MARKET SPREET

BENNETT & Co. Prices greatly reduced to suit the times. ods sold at lower prices than for several years,

FINE CIOTHING.

Cassiners, Cloakings, and Boys' Wran—
The present time is suspicious for the purchase of Cioths, Cassimeres and Gloakings. Merchania who, up to the first of the year, main ained their prices for these articles, now, in order to reduce their stocks as much as possible, are offering the same fabrics of marge reductions. And as these goods are still eminently seasonable, and are likely to be for some months to come, we recommend our readers to take advantage of the opportunity thus offered to buy at mederate prices. By patronising the popular store of Mesers J. C. Strawbridge & Co., N. W. corner of Market and Eighth streets, a very large percentage can note be sared in this class of goods. Their assoriment of them is one of the largest and most complete in the city to which they are daily making new additions from the large anction sales of New new additions from the large anction sales of New York and Philadelphia. We have examined their stock in this department, and are emphatically of the opinion that, for Cloths, Cassimeres, Cloakings, and Stuffs for Boys' Wear, the best place to select is at J. C. Strawbridge & Co.'s, and now is the time to buy, if you wish to save money. you wish to save money.

THE ACME OF PERFECTION.—This is the universa verdict given to the Florence Sewing Machine wherever introduced. The objections heretofore to other first-class Sewing Machines have all been overcome in the Florence, and everybody is delighted with the beauty of its work, as well as the simplicity and ease of its operations. It makes no ess than four separate and distinct stickes, viz :—Lock, knot, double lock, and double knot. Each stick alike on both sides of the tabric. It also has the reversible-terd motion, chabling the operator to fasten off the ands of seems or stay support of a seam without ends of scams or stay any part of a scam without stopping the machine, thereby saving much hand labor Besides, it has a uniform tension or thread, and does not require alteration in changing from one hind of work to another. The agent for the Com-pany, at No. 680 Chesnut street, challenges comparison with all others. Indeed, when such comparison is made, the preference always goes in favor of the Florence. Every machine warranted to give entire satisfaction or money returned No charge for in-struction, whether you wish to purchase or not. Circulars and samples of work sem by mail on re-ceipt of stamp. Office, No. 630 Chesnut street.

A FUROR AMONG THE APPLICAED PART OF THE COMMUNITY—Dus. HUNTER & RAMSAY THE CREATORS.—We most cordually invite the attention of the public to the advertisements of Messra tiunof the public to the advertisements of Messrs tiunter & Ramsay, a course of which will be found published daily during the week in this journal, on the manner of treating "symptoms of consumption" a theory of Medical Inhalation, in our local and editorial columns. Already these successful physicians have created a furor among the afflicted part of the community, their success being unabated, and their rooms a ways crowded with anxious patients. Their establishment. No. 1818 Chesnut street, is most comfortably and elaborately furnished, and we can but advise our unhealthy readers to give these courteous gentlemen a trial, as such an experiment, we think, will prove a success. will prove a success

BRONCHITIS .- From Mrs. C. H. Gardner, Principai of the Rutgers Fergale Institute, New York, May 14 1858 .- "I have been sofficted with Bronchitis during the past winter, and found no relief until I ound your Troches." "Brown's Bronchial Troches," or Cough Lozenges, give prompt relief in Coughs, Colds, and Throat Diseases, and are for sale throughout the United States and most foreign

FINE ART—The sale of fine oil paietings, which have been on exhibition at Scott's Art Gallery. No. 1629 Chesnut street, will take place this evening, at 71 o'clock positively, without reserve. Among the collection are several which will be sold for the benefit of the Soldiers' Home. There are others of the rare merit, from the easels of the best artists of the day, such as Lambdin, P. Moran, Reed, and others. We would advise all who can to attend the sale.

COMMUNICATION -To the Editor of THE EVENING COMMUNICATION—To the Editor of the Eventon Triegharh — Dear Sur.—I was recommended to ary Hasacesh Candy for a tickling and very annoying cough, accompanied by acidity of the stomach, and I am pleased to acknowledge that it caurely reserved me of my throat difficulties. I have since used it, in my family, and three children now suffering with whooping cough are daily benefited by its use Respectfully,

G. G. Evans,

No. 1612 Green street,

MEDICAL.

# ELECTRICAL DISCOVERIES

AND

GLORIOUS RESULTS.

DR. M. J. GALLOWAY, Flectrical Physician, formerly the partner of PROFESSOR C. H. BOLLES, after an absence of a year and a half from the city, during which time he has been engaged with PROFESSOR BOLLES, his father-in-law, in investigating more fully the sublime subject of Electricity as the GREAT CURATIVE AGENT, has resumed successful practice at No. 142 South EIGHTH Street, where he is curing, with unparalleled success the worst forms of acute and chronic diseases In our many scientific experiments with the electric Galvanic, Electro-Magnetic, and pure Magnetic Currents, and their numerous modifications on the bodies of various animals for the purpose of ascertaining with minute accuracy the direc and judirect influence of each on the organization we have demonstrated that Electricity is the vital element-that it can be directed to any organ or part of the body, and even after the vital functions seem paralyzed, possess the power of arousing the dormant energies equalizing the circulation, and restoring the system to a self-sustaining healthy condition.

The most satisfactory results follow our treatment. In some instances the disease of years' standing yields readily at the first touch of the electric element, while n others it requires a more protracted treatment.

One very important feature of our treatment is that no time is lost in experimenting with disease. By means of an electrical test, an accurate diagnosis is given at once, determining the locality and character of the disease, and indicating the treatment to be pursued. DR. P. SHEDD, OF NEW YORK CITY, a scientific gentleman of ability, is associated with Dr. Galloway in

the practice. Dr. Shedd was a student of Professor C. H. Bolies, with many other eminent medical men in the city of Bochester, N. Y., about ten years ago, and after that a partner in the city of Bullato, and since that time has given his whole attention to the curing of disease by Electricity in its various forms and modifications, in accordance with the great and sublime doctrines of Professor Boiles, who has brought his discovery into public favor in all the principal cities of America, among medical men and Electricians. The skill and experience, therefore, of Dr. M. J. Galloway and P. Shedd, M. D., commend them to the confidence of the public and afflicted.

Mrs. C. H. BOLLES, the oldest and most successful temale Electrician in the country, has charge of the Female Department. Our treatment is eminently successful in all FEMALE

DISEASES. N. B .- Professor BOLLES, my tather-in law, has no successor in this city, although we and lengthy advertisements in the public press of this city during the past year from an individual who has had the audacity to style himself ' successon to Professon Bolles." The same individual publishes a long list of patients as

reference, giving the public to understand that they were cured by him, when in fact every one of them was treated by Professor Boiles and myself-with many thousand others. Many of the parties he refers to as having been treated by him. HE IN PACT. HAS NEVERTSEEN. (All such misrepresentations are calculated to deceive the public. especially the afflicted portion. These given up as incurubie are invited to call.

MEDICAL ELECTRICITY

WONDERFUL SCIENTIFIC DISCOVERY DR. S. W. BECKWITH'S

ELECTRICAL INSTITUTE No. 1220 WALNUT Street. For the Treatment of Acute and Chronte

Diseases.

Electrical investigation has proved that the human Electrical investigation has proved that the human body acts on the principle of the galvanic battery. The brain, mucous and serous membranes, the akin, tasues, and fluids constitute the negative and positive forces. Every action, whether mental or physical, is the result of these antagonistic forces. Digostion, respiration, circulation, secretion, and excretion are due solely to Electrical influence. There is a polar action established throughout the nervous system which connects with every part of the body, establishing and preserving a proper balance of the electrical element, which constitutes health, and a disturbance of which causes disease. There are strictly but two conditions of disease—one of inflammation, or positive; the other weak, debilitated, negative; and as Electricity contains these two conditions in the action of the positive and negative currents, all we have to do is to neutralize the disease and restore proper healthy action.

We do not wish to convey the impression that we cure all diseases in all conditions. We cannot cure consumption after the lungs are all destroyed; yet we do assert, and are propared to practically demonstrate, that hundreds of cases of almost every form of

we do assert, and are prepared to practically demonstrate, that hundreds of cases of almost every form of chronic diseases, pronounced incurable, by the bemedical practitioners of the country have been radically cured, some of them in an incredibly short time, by our Electrical treatment. Its great superiority over other practice in the cure of disease. cally CURED, some of them in an incredibly short time, by our Electrical treatment. Its great superiority over other practice in the cure of disease is also attested in the fact that, within the past five years, over fourteen thousand pattents have been treated at this office, suffering from almost every form and condition of disease common to humanity, and in nearly all cases a benefit or perfect cure has been effected. Palsy, deafness, blindness, rhommatism, dys; epsia, cancer, and all the old knotty diseases that are a physician's curse, as it proves his inability to cradicate, are by our scientific method comparatively easy of cure. Specimens of tumors of large growth extracted by means of Electricity alone, without pain, without the use of the knife, ligatures, or any other means, may be seen at our office by those interested. Therefore, with these pacts to prove our theory and treatment of disease, we are whiling to undertake any of the following diseases, with every hope and prospect of success, with y-ry many others not here enumerated:—

1. Diseases of the Brain and Nervous System.—Epilepsy, Chorca or St. Vitus' Dance, Paralysis, Humanigia, Hysteria, Nervousness, Palpitation of the Heart, Lockjaw, etc.

2. Organs and Tissues connected with the Digestive System.—Sore I broat. Dyspensia, Diarrhesa.

Palpitation of the Heart, Lockjaw, etc.

2. Organs and Tissues connected with the Digestive System—Sore Throat, Dyspepsia, Diarrhosa, Dyschiery, Obstinate Constipation, Hamourhoides or Files, Bihous, Fiatulent, and Painter's Coile, and all affections of the Liver and Spleen.

3. Respiratory, Organs.—Catarrh, Cough, Influenza, Asthma (when not caused by organic disease of the heart, Bronchins, Fleurisy, Pieurodynia or Rheumatism of the Chest, Consumption in the early stages.

4. Fibrous and Muscular System - Rheumatiam, Gout, Lumbage, Stiff Neck, Spinal Curvature, Hip Diseases, Cancers, Tumors. 5. Urinary and Genital Organs.—Gravel, Diabetes, and Kidney Complaints, Impotence and Seminal Weakness. The latter complaints never fail to yield randly to this treatment.

and Kidney Complaints, Impotence and Seminal Weakness. The latter complaints never fail to yield rapidly to this treatment 6. Diseases Peculiar to Females,—Uterus Complaints, involving a mal-position, as Prolapsus, Antroversion, Retroversion, Inflammation, Uteration, and various other affections of the Womb and Ovaries, Painful, Suppressed, Scanty, or Proluse Mensituation, Leucorrhea.

TO LADIES we can recommend this treatment as one of UNVARIED SUCCESS. Almost innumerable cases have come under treatment at our office who can testify to this nact Mrs. BECK WITH has entire charge of the Ladies' Department, and all delicacy will be used towards those who entrust themselves to her care. In female diseases as mentioned in the above list, with others not mentioned,

tioned in the above list, with others not mentioned she has had a arge experience, and can confidently promise the most gratifying results. TOTHEAFFLICTED—The treatment is mild and gentle, producing no shock or unpleasant sensation whatever. Our professional intercourse with the afflicted will ever be characterized by perfect candor and honesty, and those whose complaints are incura-ble, or do not admit of amelioration, will be frankly told so and not accepted for treatment. It matters

not what may be your complaint, or how long you may have suffered, or how much, or what course of treatment you may have been subjected to, or what disappointments you may have experienced, if the system is not worn out—1; sufficient vitality remains for reaction—there is a fair prospect of recovery. REFERENCES.—The diseased and all interested are referred to the following named gentlemen, who have been treated and witnessed our treatment on others at No. 1220 WALNUT Street:—

others at No. 1220 WALNUT Street:

A. J. Pleasonton, Brigadier-General, No. 916. Spruce street; A. Pleasonton, Brigadier-General, St. Louis, Missouri; Jac b Vandegrift, Odessa, Delaware; R. A. Semple, thread manutacturer, Mount Holly, New Jersey; W. B. Smith, ironfounder, No. 1022 Hanover street, Philadelphia; George Douglass Local Express Company, Philadelphia; J. W. Bradiey, publisher, No. 66 N. Fourth street; Robert Work No. 51 N. Third street; Colonel T. N. Sweeney, assessor, Second District of Philadelphia, Walnut and Eighth streets; George Evans (Evans & Hassall) imilitary goods, Arch street, below Evans & Hassall) mirrary goods, Arch street, below Fifth; William Peiouse, type founder. Third and Chesnut streets, Ed McLane, manufacturer of cotton goods, with very many others.

Physicians or students desiring to have instruction in the correct application of Electricity for the cure of disease can pully at the Office.

of disease can apply at the Office.
