WIND THE CLOCK.

BY H. RICH. Warden, wind the clock again; Mighty years are going on, Through the shadow and the dream, And the happy-hearted dawn. Wind again, wind again,

Fifty hundred years are gone. Through the harvest and the need, Wealthy June and dewy May, Grew the new year from the old, Grows to-morrow from to-day. Wind sgain, wind again,— Who can keep the year at bay?

Four-and-twenty conjurers Lie in wait on land and sea, Plucking down the startled ship, Bud-embroidering the tree. Wird again, wind again,-We have neather ship nor tree. Four-and-twenty kinds to come

Up the never-vacant stair-Four-and-twenty dead go down; Follow, sacred song and prayer. Wind again, wind again— Warden, why delaying there?

To his interrupted dream Comes the long-entreated day. What are lesser words to him? Sweet pursuing voices say— "Warder, wind, wind again, Up the ever-golden way.'

Other hands will wind the clock While the frequent years go on, Never noting need or name Nor the rapture of the dawn. Wind again, wind again, Ere the given year be gone.

INDIANS.

Affairs in New Mexico not Improving-Indians along the Missouri are Peace-

Felix Delgado, Superintendent of Indian Affairs for the Territory of New Mexico, reports that Indian affairs in that Territory are not improving. All the Apaches on the reservation have left, and troops are now in pursuit of them. The Navajoes (those remaining in the country formerly occupied by them), and the Gila, and Mimbres, and the Apaches, are completely overranning the southern portion of the Territory; they even go into small towns in the daytime and drive off the stock with impunity. Previous to the last two years these Indians have received an amount of goods sufficient for their wants, and conducted themselves very well; but since 1863 they have been very much dissatisfied in consequence of an insufficiency of goods being distributed by the Government.

The Superintendent looks upon their hostile demonstrations, so lar, as only a prelude to more serious disturbances, and to provide against any further trouble says he must have enough for them to eat during the winter, and also a large quantity of blankets. It is highly important for the safety of the lives and property of that por-tion of the Perritory that these Indians be kept quiet, as they are numerous, bold, and daring; nearly all of them have guns, and know how to use them, and could do much damage before being checked, in consequence of the limited number of troops in the territory. The Superintendent also protests against the further mus-

ter-out of troops serving there.

A copy of an official letter addressed to Major-General Pope by Brevet Major-General Sully, has just been received by Commissioner Cooley,

of the Indian Bureau.
This letter which is dated Sioux City, December 9, 1862, states that Mr. C. Galpin, a'trader at Fort Rice, had fjust reached there from the lat-ter place, having traveled on horseback all the way. Mr. Galpin reports a large body of Indians on the Missouri river, and that there is the very best feeling on their part toward the whites.

He has seen the party who committed the raid at Kayer Popee, and denounces them as brutes. The chiefs and principal men of the tribe were very much displeased with the affair, and are collecting all the goods and horses stolen by the party, to return to General Sully, and 2450 to deliver to the Indians who shot the white trader.
Mr. Galpin also says that the Santees and Cut Heads are very triendly, and that old "Medicine Bear" is with them visiting Fort Rice.

MEXICO.

Relations between France, the United States, and Mexico.

Washington, January 4. — The sensational statements so freely indulged in of late concerning Mexican affairs will soon be proved erro-neous. Thus much is fact:—The Secretary of State and the French Minister sent their last despatches to France some fifteen days since.

Answers to these despatches cannot be received much before the last days of January.

Meantime, the address of the Emperor at the opening of the French Legislature will be received here.

The public can only know the actual relations

of the three countries, America, France, and Mexico, when these documents shall have been received, and the many statements telegraphed from here are anticipations and sheer inven-tions. It is asserted in the highest diplomatic circles that Napoleon's attitude will be satisfactory to the American people.

GENERAL MENDIZAVAL GIVES IN HIS ADDIESTON TO THE EMPIRE—BELIGIOUS FESTIVAL AT GUADE-

News has been received from Mexico City to the 19th, and Vera Cruz to the 23d ultimo. General Ignacio Mendizaval, of the Liberal army, has given in his adhesion to the Imperial

A number of exchanged prisoners of the Belgian contingent had arrived at Morelia.

A telegraph line has been opened between

The Emperor Maximilian has sent to the Empress of the French the Mexican medal of civil merit, in recognition of her noble example in visiting the cholers hospitals of Paris. The Empress, on her return from Yucatan, passed through Orizaba.

General Mejia has received from the Emperor the grand cross of the Mexican eagle.

The Empress was expected to arrive back at capital, after her trip to Yucatan, on or

about Christmas. A singular religious ceremony took place on the 12th of December at Guadelupe Hidalgo, a village four miles from the capital; fully 50,000 persons were present, mostly Indians. Some came as pilgrims from a distance of 500 miles. The Emperor, Marshal Bazaine, and the other Ministers of State also attended.

Expensive Officials.

The following bill has been audited as incurred by the Board of Supervisors of Eric county, New York. It is a curiosity, and rises to the dignity of a City Council account:-

 112 diaries.

-The Boston Journal is mostly filled with the inaugural addresses of the Mayors of the several cities in Massachusetts. The following is the in-debtedness of the several cities:—

AN INTERESTING AUTOBIOGRAPHY. Mr. Jackson, one of the members of Parliament for North Derbyshire, England, recently made a speech at a solree of the Dronfield Mecannies' Institution, in the course of which he gave his history, for the sake, as he said, of inciting and spurring on many in the room, who had as great a chance before them as he had when he first started in life. His father, a medical man, left his mother with eleven children, himself the seventh son. To some of her sons she gave a college education, to others a high education; but what with the placing of them out and the cost of education, her means were diminished, and when it came to poor him less was granted, and he had to rely on himself. Forty-eight years ago last 9th of April, when under twelve years of age, he was beckened out of school and was put to hard work at a ship's side, from 6 o'clock in the morning till 9 at night, with half an hour for breakfast, and three quarters of an hour for dinner, and he remained in that position nine months, when his master was taken ill, and he was put in the office. This gave him an opportunity of studying, and he read the "Encyclopedia Britannica" from A to read the "Encyclopedia Britannica" from A to Z—it was his education. After that he never lost an hour. He had hung a lamp over his bed at night, when he had gone to bed at 10, after working till 9, and read a part of the night, for he found that if he had to rely on himself he must practise self-denial. He atterwards put himself to a trade, and his subsequent career had been one of uninterrupted success. But he wondered where he should have been if he had not read the "Encyclopedia Britannica." Not in that room as their county member, for if ever in that room as their county member, for if ever he wanted information in ony of his pursuits in lite, great or small, he only had occasion to look at that book, and he found the genius, the mind, and the application of those who preceded him recorded in letters unmistakable, and it had formed his character as it now existed.

In the last forty-eight years he had been in the four quarters of the globe, and there was scarcely a port to which a ship could go that he had not commercial relations with. He first began with the West Coast of Africa, and his ships were found from Sierra Leone to the Cape of Good Hore. Hope, nearly two thousand miles, trading with the natives. Where did he get his information regarding each tribe? From the "Encyclopedia." As the divine read the Bible to enable him to preach, so did he (Mr. Jackson) read the "Ency-clopædia" that he might be "posted up," as the Americans said, wherever he had transactions, Americans said, wherever he had transactions, and whether it was the Indies or the Cape of Good Hope, Hottentots, Boers, Dutchmen, or English, Mussulmans, or Hindoos, he tound the information he wanted regarding the manners and customs of the people. And when Australia began to be peopled, he found information of that new country almost unknown in his younger days. Take the western coast of America—Peru and Chill; he found the history of those countries before they were captured, so to rica—Peru and Chill; he found the history of those countries before they were captured, so to speak, by the Europeans. He traded as far as California, buying raw hides and carrying salt from the Cape Verd Islands to pay for them, before an ounce of gold was found there. He had also had whalers in the North, and he had always looked at the "Encyclopedia," and found the information he desired.

He said to those who did not read:-"Read, instead of smoking your pipe and drinking beer in a public house; get that book, and you will find art, science, language, something to enter-tain, support, and instruct you." He attributed his great success in life to the fortunate circum-stance of his master being ill, and his being obliged to be in the office from morning till night, and there having the opportunity of in-structing himself. Twenty-seven years ago he was obliged to go to Pisa for his health, and in endeavoring to learn the Italian grammar he found that so many years of hard work had caused him to forget grammar altogether, and he was obliged to begin de novo. He spoke of the great advantage that his knowledge of Italian, then gained, had been to him in his com-Italian, then gained, had been to him in his commercial relations with that country, which was so rapidly developing, and touched upon the presentation made to him in acknowledgment of his services in the late events in Italy. He mentioned this to show what a man could do in he work of fell-reliant, and deny himself, luxuries—which were not luxuries after all. If he had appet his time in the rubble bases and lained

spent his time in the public-house, and joined himself with the young and dissolute men at Liverpool, he should never have been what he was. No matter from what position a man started, he could attain any position by good conduct and the talents which the Almizhty had given him. Mr. Jackson instanced the cases of Benjamin Franklin and William Cobbett in proof of what he said.

He then spoke at some length on the importance of the study of the modern languages, par-ticularly French and German, since we had already a commercial treaty with France, and should have one with Austria; and if Austria made such a treaty all Germany must follow. He dwelt upon the importance of the knowledge of such languages to a manufacturing commu-nity. If, he said, he knew French, German, and nity. If, he said, he knew French, German, and Italian fluently he would give all he possessed, for he should be confident of soon making it up, and even doubling it.

A Coptic Papyrus Deciphered. At a recent meeting of the Royal Society of Literature, in London, a Coptic papyrus in the possession of Mr. Henry Vaughan was exhibited by Rev. Dunbar Heath. Mr. Goodwin, previous to his departure from England for Shanghae, deciphered and translated the whole of it. The document is of the eighth century. A woman named Calisthene gives away her child, aged five years, in the following terms:-

"I grant my beloved son, Mercury, unto the holy monastery of the holy father Phiebamon, of Mount Dieme, that he may be a slave thereto, in its watering, and drawing, and everything enjoined upon the inhabitants of the holy monastery, so that the holy monastery may be his owner forever, and of the labor of his hands, and the hire of his body, whether he be in the monastery or whether he be out of the monastery, according to the command of the superior; and it shall not be lawful for me, nor for any man of mine, nor any man whatso little, nor to those who rule, or those who shall hereafter rule over us, to bring any action against the holy monastery on account of this against the holy monastery on account or this same child, nor to establish any claim upon him, before the rulers or powers, little or great. Let such an one, in the first place, not profit in anything, but may God bring him to his holy tribunal with me, that I may contend with him, and that he may give account at the judgment seat of God for that which he hath done, for that he hath laid hands to violate this yow and this offer which I have vowed unto God; and let him tall under the great curses of the Scripture, which are in the Deuteronomy of Moses, let him see the kingdom of God opened while he is prevented from entering into it. For this security, therefore, I have established this grant, and have signed it as it is written." At the back of the papyrus a unique list of the male and female singers in the monastery is given, arranged antiphonally.

MEMORIALS TO THACKERAY AND LEECH,-Two tables in memory of William Makepeace Thack-eray and John Leech have been placed side by side in the corridor leading to the chapel of Charterhouse School, in England. They were erected at the expense of Carthusians. The inscriptions on both are in Latin, and may be thus rendered:-"Carthusians have caused this memorial to be erected in honor of William Makepeace Thackeray, a Carthusian. Born 1811; died 1863. A scholar [at Charterhouse] 1622 to 1827." "Carthusians have caused this memorial to be erected in honor of John Leech, a Carthusian. Born 1817; died 1864. A scholar 1825 to 1832."

AN OLD WRETCH.-Mr. Sowerby is provailed upon to stand rodiather to a male infant. Names him Gabriel. After the christening, says what iun it will be or his grandson to be called Gaby!

CARSON GOLD MINING COMPANY

NORTH CAROLINA.

The Land of this Company consists of 120 Acres, in Mecklenburg county, North Carolina, 35 miles from the town of Charlotte, on a branch of Sugar Creek, which tream furnishes good water-power for grinding the ores This Mine was first opened in 1838 by a man named Car-son, who worked it successfully for a number of years He died in the town of Charlotte, in 1846, worth over hali a million collars.
Two shafts have been sunk on this property, one of

feet, the other 60 feet, on different veine. averaging from two to three feet in thickness, which veins still continue on down increasing in width and richness. These shafts are in good order, and ore can be readily taken out at my time. Other veins have been discovered on this property, and tested, and proved to be very rich in gold. The ores of this mine are known as the brown ore, and very rich, yielding readily \$1 per bushel. This is believed to be one of the best and most certain mines in the State, on account of the abundance and quality of the ore, and the ease with which it is obtained and reduced. This property has been worked by Major Z A. Grier from 1840 to the breaking out of the war. This Company have purchased this property, and mitend to erect machinery and put the mines in immediate operation. The many advantages of this mine over the mines of Colorado and Nevada can hardly be estimated. It is more readily reached, and has abundance of fuel, with cheap labor. It can be worked all the year, and not, as in the case of Colorado and Nevada be compelled to lie id e for three or four months in consequence of the severity of the winter. This mine having been worked for a long time proved to be a rich paying one. We do not, therefore, have to incur the risk there is in an undeveloped property, but can count on large and immediate returns on the investments. Having an ore that readly yields ten dollars per bushel, some estimate can be made of the value of this property. With the present imperfect system of mining in this locality, and absence of proper machinery, ten tons of this ore can be taken out daily from every shaft opened. Estimating say fi feen bushe s to the ton, the daily yield will be fitteen hundred dollars from one shaft, allowing three hundred dollars per day for expenses. The net product will be \$1200 per day; counting 300 working days to the year, the yearly proceeds will be \$350,000. which yield can be largely increased by extending the works. This is considered a very low estimate of the capacity of this mine by experienced miners of that ocality. The Assayer of the United States Mint at Charlotte, in speaking of this property, says it has few equals in productiveness in that country, and with proper management and machinery the above product

CAPITAL STOCK, \$500,000. NUMBER OF SHARES, 50,000. WORKING CAPITAL, 850,000.

Books for Subscription now open at No 407 WALNUT Street, Room No. 2, first floor, where further information will be given. J. HOPKINS TARR, Secretary.

RARE CHANCE FOR INVESTMENT. THE COMMONWEALTH GOLD AND SILVER

MINING COMPANY, OF NEVADA. CAPITAL, 8300,000. 30,000 SHARES OF \$10 EACH, 15,000 SHARES FOR SALE TO RAISE A DEVELOP-MENT FUND.

ANDRE W G. CURTIN, Governor of Pennsylvania. HON. WILLIAM B. MANS.

H. A. SALTER.

DIRECTORS,
His Excellency Governor Andre W G. CURTIN,
Hon WILLIAM B. MAAN,
M. M. BARKER,
H. A. SALGER,
HORACE F. BUNN,
JOHN BURT, Geologist of Michigan.
S. A. J. SALTER.

The Company, in order to raise a fund to develope and wors their mine, have determined to offer one-half of their stock, or 15 000 shares, to the public for sale.

All subscriptions must be accompanied by a payment of forty percent, in cash, of the amount of stock subscribed for, which payment, it is believed may be all that will be required, and that the tund thus produced, will be sufficient to start and continue mining operations, which of itself will bring returns to the Company as will enable it to fully develope and successfully work their mine.

This Company own the Boyd and Hunter Gold and Silver Mine, situate in Smoky Valley District, eight miles south of the city of Austin, Beese River country. Lander country, State of Sevada; contains 1460 lineal feet and is reputed one of the bast undeveloped mines in the State.

AVERAGE ASSAY, \$433.43 PER TON.

This Company has organized for work, and not stock manufacturing.

Fixessor Silliman and others say that Reese River ore averages \$250 per ton. The Company expect in a short time to mine at least twenty-five tons of ore par day, and it this ore averages \$200 per ton, the earnings will be \$1,500.000 in builton per annum, which is considered a safe estimate.

There is believed to be no instance on record of fall-

be \$1,509.000 in ballon per annum, which is considered a safe estimate.

There is believed to be no instance on record of fallare in this section, where sliver mining companies have commenced operations with the requisite development fund on, with fair surface indications to begin with; success in this enterprise may be conniderity predicted.

Prospectus, giving full information, may be had at he office of the Company. No. \$22 WALNUT Street, Philadelphia, where subscriptions will be reo cived.

FIRE AND BURGLAR PROOF SAFES THE FIRE IN CHESNUT STREET

Letter from Wells, Fargo & Co. \$10,000 SAVED IN HERRING'S PATENT SAFE.

PHILADELPHIA, January 2, 1866. MESSES. FABREL, HERRING & Co .- Gentlemen :- We have just opened our Safe, one of your manufacture, which passed through the destructive fire in Chesnut street, last night. The Safe was in our office, No. 607, which building was entirely destroyed. The Sa'e was in a warm place, as you may well suppose, and was red hor when taken out of the embers. We are well satisfied with the result of this trial, and find our books, papers, and some ten thousand dollars in money almost as perfect as when put in the Safe. Nothing is injured, if we except the leather bindings of the books, which are steamed; the money and papers are as good as ever.

Truly yours, WELLS, FARGO & CO., Per J. H. COOK, Agent.

The above Safe can be seen at our store. FARREL, HERRING & CO.,

No. 629 CHESNUT STREET. ANOTHER TEST HERRING'S FIRE-PROOF SAFES. THE FIERY ORDEAL PASSED TRIUMPHANTLY

THE FIERY ONDEAL PASSED TRIUMPHANTLY
The Herring Sate used in the office of our warehouses, destroyed by the disastious fire of the night of the 5th mistant, was subjected to as intense heat as probably any sate will ever be subjected in any fire—so intense that the brass knobs and mountings of the exterior of same were melted off, and the whole surface sealed and bilstered as if it had been in a furnace, and yet when opened the contents—books and papers—were found to be entire and unmigured.

This sate is now on exhibition in our warehouse on Seventh street, with the books and papers still remaining in it just as it was when taken from the ruins. Merchants, Bankers, and others interested in the protection of their books and papers are invited to call anday amine it.

Agent for Herring's Sales,

MERIT ALWAYS ITS OWN REWARD. An article possessing Merit will always conquer preju-dice, abuse, vilification, and aught that envy. hatred, or malice can impose upon it.

CHESNUT CROVE WHISKY Is a strong evidence of the fact. Decried by numbers for what—simply if its merits were known and appreclated-it could not tail to become popular-other thi less so in proportion. There is no stimulant giving evidence of so much purity as to produce certificates from such highly respectable parties as Mesers. Booth, Garret, and Camae, of Philadelphia; L. R. Chilton, New York; and Dr. A. L. Hayes, Boston. For Nervous Debility, and all diseases requiring a pure, mild stimulant, there is nothing like it. For sale by

bottle, demijohn, or barrel, at 114 NO. 225 N. THIRD STREET. M. NATHANS & SONS,

BRANDIES, WINES, GINS, ETc.
