

THEORY OF MEDICATED INHALATION.

DRS. HUNTER AND RAMSAY.

SYMPTOMS OF CONSUMPTION.

We stated in our last letter that in the early stage the most common symptoms of consumption are "dry hacking cough," a sense of "shortness of breath on exertion," and "increased frequency of the pulse." Another symptom which should lead us to suspect the health of the lungs is pain.

The "losing a little flesh" is often an early symptom of consumption. It takes place in many cases, even though the appetite remains good, and the food is abundant and nutritious.

The irritation produced by tubercles, even in the first stage, will sometimes give rise to a sense of chilliness, followed by slight fever, in the after part of the day, and perspiration towards morning.

In young females irregularities almost always occur sooner or later, and often this is the first and only evidence they have of disease.

THE WINTER CARAVAN.—Shivering mortality, and some pleasant cases, even if the thermometer is shattered by an ineffectual effort to keep up with the times.

POLICE BENEFICIAL ASSOCIATION.—This flourishing Association was two years old yesterday. Their second annual meeting was held in the afternoon, when the following officers were elected to serve for the ensuing year.

NOTE.—Drs. Hunter and Ramsay can be consulted personally or by letter, at their office, No. 1318 Chestnut street.

MATTERS OVER THE RIVER.

A NEW PROJECT.—The managers of the Home for Friendless Children, in Camden, have made application to the City Council, asking that they be allowed to use the lot of ground at Fifth and Plum streets, for the purpose of erecting thereon a large and convenient building for the uses of the Home.

THE RIVER.—The ice in the river to-day is sufficiently strong to bear persons on it, and hundreds are crossing above Cooper's Point to Kensington. The boats are making their usual trips.

APPOINTED.—The City Council have appointed a committee to investigate the condition of the needy in Camden, and also to make an appropriation to assist them during the winter.

ELEGANT HORSES.—The Westcott Steam Engine Company have provided themselves with a pair of splendid horses for service in cases of fire.

MEDICAL ELECTRICITY

WONDERFUL SCIENTIFIC DISCOVERY

DR. S. W. BECKWITH'S ELECTRICAL INSTITUTE No. 1230 WALNUT STREET, For the Treatment of Acute and Chronic Diseases.

Electrical investigation has proved that the human body acts on the principle of the galvanic battery. The brain, nervous and muscular membranes, the skin, muscles, and fluids constitute a nervous and electric system.

We do not wish to convey the impression that we cure diseases of all conditions by means of electricity. We do not, and are prepared to practice only those chronic diseases, pronounced incurable by medical practitioners of the country, have been radically cured by them in an incredibly short time, by our Electrical treatment.
