A QUEER LETTER.

J. Wilkes Booth Bedtvivas. The Norfolk Post of Saturday contains the following singular letter:-

MOREHEAD CITY, January 5, 1866.—Editor Nor-folk Post—Sir:—I have just arrived in this place from , where I saw and talked with John Wilkes Booth, the supposed assassin of your late President. That he would be alive after what had occurred at your Capital, may seem strange,

but it is true revertheless.

I saw him and B. Harris, who left with him not four weeks ago, and learned from him all the hardenips that he underwent in leaving this sountry. He says that no one who has the least regard tor truth will say that he was in Ford's regard for truth will say that he was in Ford's Theatre on the night of the 14th of April last, and wonders why no one present on that occasion did not pretend to recognize the man that ehot Lincoln until they were told that it was him by Lory Keen, his bitter enemy. He did not, however, to me deny er admit that he had dene the need; but stated that no one could truthfully say, of their own knowledge, that it was him.

He declares that Mrs. Surratt was innocent, and wonders how the man that was killed in the barn looked. He learned from the papers that he had a heavy beard, and had sheared or cut it he had a heavy beard, and had sheared or can't in such an awkward manner that his (Booth's) most intimate friends would not recognize him a Booth. He thinks not. He believed, iuno-cent or guilty, that if found, he would have been sacrificed to their mad fury, and concluded to leave, which he did. And as there can now be no harm in telling, I will state what he told moomitting names.

He crossed the river at Georgetown; stopped the next day near Fairfax Courthouse; the next night he was taken near Middleburg, etc., and from there near Gum Springs, where he remained two days; and after more than three weeks' two days; and after more than three weeks travelling—mostly by night, and suffering sever-ly—he reached Florida, where he was detained for some time, until Harris, who was not mentioned in the affair, and who could not appear publicly, procured a boat, which they ventured to sea in and made land safe. Booth was immediately taken sick, and has been the most of the time since. In October he was much better, so much

that he took some exercise in the open air, but relapsed and was confined to his room until about four weeks ago. His constitution, in my judgment, is ruined, and I don't believe he will live long. He was preparing for a change of climate, and if no relapse has taken place, is maked by row in another country, where he will probably now in another country, where he will meet with more of his own people, or people from the same country.

Mr. Editor, I write such poor English that I

fear you will not be able to make it out; but it is the truth the whole truth, and if you wish, you may publish it. I shall not be in the couniry to read it. Yours, truly, (JOSEPH FREIDBERGER.)

MEDICAL.

FLECTRICAL DISCOVERIES

AND

GLORIOUS RESULTS.

DE. M. J. GALLOWAY, Flectrical Physician, formerly the partner of PROFESSOR C. H. BOLLES, after an absence of a year and a half from the city, during which time he has been engaged with PROFESSOR BOLLES, his father-in-law, in investigating more fully the sublime subject of Electricity as the GREAT CURATIVE AGENT, has resumed his successful practice at No. 142 South EIGHTH Street, where he is curing, with unparalleled success the worst forms or acute and chronic diseases In our many scientific experiments with the electric Galvanic, Electro-Magnetic, and pure Magnetic Currents, and their numerous modifications on the bodies of various animals for the purpose of aswith minute accuracy the and judirect influence of each on the organization we have demonstrated that Electricity is the vital element-that it can be directed to any organ or part of the body, and even after the vital functions seem paralyzed. possess the power of arousing the dormant energies equalizing the circulation, and restoring the system to a self-sustaining healthy condition

The most satisfactory results follow our treatment. In some instances the disease of years' standing yields readily at the first touch of the electric element, while n others it requires a more protracted treatment.

One very important feature of our treatment is that no time is lost in experimenting with disease. By means of an electrical test, an accurate diagnosis is given at once, determining the locality and character of the disease, and indicating the treatment to be pursued.

DR. P. SHEDD, OF NEW YORK CITY, a scientific gentleman of ability, is associated with Dr. Galloway in the practice. Dr. Shedd was a student of Professor C. H. Bolles, with many other eminent medical men in the city of Rochester, N. Y., about ten years ago, and after that a partner in the city of Buffalo, and since that time has given his whole attention to the curing of disease by Electricity in its various forms and modifications, in accordance with the great and sublime doctrines of Professor Bolles, who has brought his discovery into public favor in all the principal cities of America, among medical men and Electricians. The skill and experience, therefore, of Dr. M. J. Galloway and P. Shedd, M. D., commend them to the confidence of the public and afflicted.

Mrs. C. H. BOLLES, the cldest and most successful female Electrician in the country, has charge of the Female Department. Our treatment is eminently successful in all FEMALE

N. B .- Professor BOLLES, my tather-in law, has no successor in this city, although we find lengthy adver-Msements in the public press of this city during the past year from an individual who has had the audacity to style himself "successon to Professon Bolles."

The same individual publishes a long list of patients as reference, giving the public to understand that they were ured by him, when in fact every one or them was treated by Professor Boiles and myself-with many thousand others. Many of the parties he refers to as having been treated by him. HE. IN FACT, HAS NEVER[SEEN. FAIL such misrepresentations are calculated to decrive the public, especially the afflicted portion. Those given up as in-

curable are invited to call. CONSULTATION PREER. An interesting pamphlet mailed by addressing
