#### OUR NEW YORK LETTER.

The Fening Contral Council-Oriminal Matters-Arrest of Railroad Thieves-Interesting Habeas Corpus Case-Statistics, Etc.

Special Correspondence of The Evening Telegraph NEW YORK, January 25. The weather is perfectly awful to-day. No

thing but mud and slush. The news from Europe creates some excitement here this morning, owing to the announcement of another raise in discount by the Bank of England, consequent upon the decrease of bullion.

The trial of Salvador closed, last night, with a verdict of guilty of murder in the first degree, Gonzales and Salvador will be sentenced by Judge Gilbert on Saturday next, at 10 o'clock. Quite a number of our fashionable folks left in

the early trains for your city to-day. They will attend the Coterle Carnival to-night, at the Academy of Music, in spite of the weather. A meeting of the stockholders of the Colum-

bian Marine Insurance was held yesterday afternoon, at which action in regard to the late suspension of that institution was taken. It is estimated that the company's assets are sufficient to discharge all its liabilities and leave a surplus of over a million of dollars, and it was unani-mously resolved to initiate measures for resuming business with a capital not exceeding two millions of dollars.

The Times' severe criticism of Mr. Roseberg's picture, No. 8 of the Philadelphia Sketch Club collection, is not supported by our best artists and connoisseurs. It is looked upon as an unnecessary exhibition of spieen on the part of the critic.

During the year 1865 about 125,000,000 letters passed through the Post Office of the city of New York. The amount of postage on both leiters and papers was \$1,721,579\*40; amount re-ceived for box rents, \$67,786\*75; expenses of office, \$359,791.71; prout to Government over ex-

penses, \$1,503,174-22. In the case of Weeks against Merritt, the keeper of a livery stable and riding academy, Judge McCunn, at the special term of the Supe-rior Court yesterday, decided that a judgment could not be set aside on the ground of informality or for any other cause, except the defense that the judgment had already been satisfied.

For some months past a succession of robberies been from time perpetrated on the regular night express trains for the West, on the New York and Erie Railroad. The total amount of the goods and baggage thus stolen will be over \$10,000. Detectives Tilicy and Scott, and Officer Tulley, of the Third Precinct, have been making investigations; which have resulted in the arrest of Albert Beach and William Golden, two young

men who had tormerly been in the employ of the company as newsboy and brakesman. A large quantity of the stolen property has been recovered from citizens of Port Jervis, New Jersey, who had purchased the same from the prisoners at rates far below its actual value. Both Beach and Golden will be surrendered today, and they will be conveyed to Port Jervis for trial. A considerable portion of the recov-ered goods now awaits identification by the

OWNERS, Another writ of habeas corpus has been issued by the Supreme Court of this District, addressed to General Joseph Hooker, commanding the De-partment of the East, for the purpose of obtaining the release of one Charles H. Coles, who is alleged to be confined in Fort Lafayette, It is averred in the petition that the prisoner was arrested about sixteen months ago by the order of the War Department at Washington.

The petitioner states under oath that he does not know why he was arrested, nor why he has been kept in prison for so long a time. Owing to the illness of General Hooker, and the ab-sence from town of Colonel Van Buren, the United States District Attorney was unable to

make a proper return yesterday. The case will probably be argued to-day. The Central Council of Fennans, composed of Messrs. McGrath, of Missouri; Sinnot, of Massachusetts; Tobin, of Shawmut; Kavanagh, of Cahfornia, and Rogers, of New York, are still in Fenian headquarters, Union session at the Square. All the official appointments are already made and confirmed, and it is expected that the entire personnel of the Headquarters, or nearly so, will give general satisfaction to the consti-

"The following statistics should fix the status of ex-General Jubal A. Early in this respect, whose lefter to the New York News furnished you the data for an article published in the Gressend of the 6th instant, in which General Early states that the forces opposed to my comindividuals in Camden, having the welfare of the city and its citizens in view, have taken measures for the erection of a fine and capacious hall, in which to hold various kinds of popular lectures, amusements, concerts, etc. for the public edifi-cation. There is great need of such a building, because there is no place in Camden sufficiently large for such interesting exercises. The build-ing will be crected under the auspices of the Directors and managers of the Philotechnic In-stitute, and a part of it appropriated for the accommodation of that school, which is now in a prosperous condition. Early states that the forces opposed to my com-mand in the Shenandoah Valley consisted of

UNFAITHFUL TO HIS TRUST .- The watchman employed to look after the ferry boats at Cooper's Point, at night, was detected in pilfering various articles belonging to the steamers. A warrant was issued for his arrest, but he learned the last too soon for the officers, and fied. His wife was arrested, charged with being a party to the their. At the Station House she plead so earnestly for her buby, that an officer took her in a carriage to her home, when she brought it with her, and entered the lock-up in quite a cheerful mood.

6,831 men. I also enclose herewith a statement by Lieutenant McKee, of the United States Ordnance Corps, exhibiting a list of one hun-dred and one pieces of field artillery, captured from General Early's command, in the Shenandoah Valley, from August 4, 1864, to January, 1865. This statement does not include SOLDIERS' FAMILIES.-Soldiers' widows and orphans are the special objects of our care. Let us "have compassion on the fatherless, and the widow" of him who fought our battles and died for our country. Immediate aid is needed. They must be relieved in their own homes, and six pieces of field artiliery captured at Waynes-boro, four at Greenwood Station, two at Char-lottesville, and four at South Anna Bridge, on my not left to suffer.

We present an appeal to our citizens to-day march from Winchester to Petersburg, during the months of February and March, 1865. General which will surely bring into operation their libe rality and benevoience with increased considence,

Early's statement that he had about one thou-sand men at Waynesboro, is hard to reconcile with the fact that over one thousand four hun-Upwards of sixty families have received aid daily during the last two weeks, or ahout seven hundred families during this period, or upwards of three thousand persons. Our outlay now is dred men of his command were captured at that engagement; and his estimate of my forces is seventy dollars a day, more than our receipts, incorrect, but that may be considered a pardonand were it not for the surplus received during the severe cold two weeks ago, many must have "I am, gentlemen, very respectfully, your obedient servant, P. GLORIOUS RESULTS.

DR. M. J. GALLOWAY, Flectrical Physician, formerly the partner of PROFESSOR C. H. BOLLES, after an absence of a year and a hall from the city, during which time he has been engaged with PROFESSOR BOLLES, his father-in-law, in investiga.ing more ully the sublime subject of Electricity as the GREAT CURATIVE AGENT, has resumed his successful practice at No. 142 South EIGHTH Street, where he is curing, with unparalleled access the worst forms of acute and chronic diseases In our many scientific experiments with the electric. Galvanic, Electro-Magnetic, and sure Magnetic Currents, and their numerous modifications on the bodies of various animals for the purpose of ascertaining with minute accuracy the direc and ludirect influence of each on the organization we have demonstrated that Electricity is the vi:al element-that it can be directed to any organ or part of the body, and even after the vital functions seem paralyzed . possess the power of arousing the dormant energies equalizing the circulation, and restoring the system to a self-sustaining healthy condition.

The most satisfactory results follow our treatment. In some instances the disease of years' standing yields readily at the first touch of the electric element, while in others it requires a more protracted treatment.

One very important feature of our treatment is that no time is lost in experimenting with disease. By means of an electrical test, an accurate diagnosis is given at once, determining the locality and character of the disease, and indicating the treatment to be pursued.

DR. P. SHEDD, OF NEW YORK CITY, a scientific gentleman of ability, is associated with Dr. Galloway in the practice. Dr. Shedd was a student of Professor C. H. Bolles, with many other eminent medical men in the city of Rochester, N. Y., about ten years ago, and after that a partner in the city of Buffalo, and since that time has given his whole attention to the curing of disease by Electricity in its various forms and modifications, in accordance with the great and sublume doctrines of Professor Bolles, who has brought his discovery into public favor in all the principal cities of America, among medical men and Electricians. The skill and experience, therefore, of Dr. M. J. Galloway and P. Shedd, M. D., command them to the confidence of the public and affileted.

Mrs. C. H. BOLLES, the oldest and most successful temale Electrician in the country, has charge of the Female Department.

Our treatment is eminently successful in all FEMALE DISEASES.

N. B -- Professor BOLLES, my tather-in law, has no successor in this city, although we und lengthy advertisements in the public press of this city during the past year from an individual who has had the audacity to style himself "successon to Fno FESSOR BOLLES."

The same individual publishes a long list of patients as reference, giving the public to understand that they were cured by him, when in fact every one of them was treated by Protessor Bolles and myself-with many thousand others. Many of the parties he refers to as having been treated by him. HE IN FACT, HAS NEVER, SEEN. All such misrepresentations are calculated to deceive the public, especially the afflicted portion. Those given up as incurable are invited to call.

STUDENTS can enter at any time for a full course of instruction in our scientific practice. We are receiving letters almost daily from different par.s of the country. soliciting students who have been instructed by us, therefore we can guarantee good positions to all our graduates. We invite the old students of PROF. BOLLES or myself whe are practising our old system in this city to become instructed in our new discoveries, so that they may learn how to cure more diseases, and in much less time than by our old system.

The Board on Military and Naval Affairs has also been thoroughly organized, and is said to be composed of officers of the United States service who have made their mark, not only as good fighters and skilful strategists, but as men of large views and sound, comprehensive, prac-tical common sense. It is also noticeable that the members of the I. R. B., who figured round here in pretty large numbers lately, have all disappeared suddenly. One of them was heard to declare a few days ago that, being fully con-vinced that real work was to commence shortly, the sooner he could get home to his post again the better.

The clerks in the Bond Bureau have been busily engaged during the past few days. Orders to a farge amount are pouring in, and agencies are about to be instituted in all the principal cities and towns throughout the country. The Central Council holds night sessions, as

the members are anxious that the business should be got through rapidly, so as to enable them to get home to their business and save the Brotherhood the "five dollars a day and legitimate expenses" which the attendance of each costs the organization.

There are no new developments relative to the Chihan privateer.

Gold is up to 1394 this morning, but is un-stendy at that figure.

Business is still reviving slowly, with no signs of a relapse. FULTON.

PENNSYLVANIA COAL .- The returns of the anthracite coal trade of Pennsylvania, collected by the *Miner's Journal*, present some very interest-ing facts. The whole quantity mined and sent to market during the year 1865 was 9,488,396 tons. At an average price of eight dollars per ton, this gives the enormous sum of \$75,907,168. The bituminous and semi-bituminous coal of the State is not included in the statement. If it were added, the total value of the Pennsylvania coal trade of the year would probably reach ninety millions of dollars.

MONUMENT TO HENRY WINTER DAVIS .- A meetmonument to HENRY WINTER DAVIS.-A meet-ing of the friends of the late Henry Winter Davis has been held in this city, at which William J. Albert presided, and Joseph J. Cushing acted as secretary. Resolutions were adopted for the formation of a "Henry Winter Davis Monument Association," and for the appointment of com-mittees on constitution and by-laws, finance, and to solicit plans for the proposed monument. Upwards of \$8000 were subscribed as an earnest of the desire of those present to carry their pro-position into effect.-Baltimore Sun, Jan. 22.

DEAD LETTERS .- A Washington letter says:-"A public sale of the perishable contents of the Dead Letter Burcau took place a week or two since. Without enumerating the singular things since. brought to light, which can be seen in all papers, I will mention two curious ones that I have not seen alluded to. One was a letter con-taining a check for eight thousand dollars in coin, directed to a lady in New York, requesting her 'to accept the enclosed as a return for the kindness shown to my father and mother,' dated at the Astor House and signed 'John,' who was to start immediately for Europe. The letter not reaching the lady was sent to the Dead Letter Office. The Postmaster-General directed his deputy at New York to institute a thorough search for the lady, who at last found her, and reported his success to the Department, very naturally adding that 'John had evidently more cash than brains.' Another letter, from Idaho, contained two hundred thousand dollars in United States bonds, directed to a banker in New York, who had left for Europe before the bonds arrived. Of course they were not lost, being finally sent to the Dead Letter Office."

Since August last the Treasury Department has destroyed \$48,000,000 worth of mutilated and cancelled Treasury notes of all kinds, and \$10,-000,000 more are to be burned.

## MATTERS OVER THE RIVER.

THE MAYORALTY.-The rapid approach of the period for holding the next municipal election in Camden begins to invest that event with the greatest importance, and politicians are eagerly casting about for candidates who will be creditable to their choice. For the last two years the offices of Mayor and City Marshal have been well and competently filled by their respective incumbents, Paul C. Budd, Esq., and James W. Campbell, having been elected to these positions by the Union party. These gentlemen have been faithful in the discharge of their duties, and a majority of the Republican party deem it unwise and impracticable to make change in these two officers for the coming year. There are a number of candidates aspiring for the nomination, but it is gratifying to realize that the Union party have determined hereafter to nominate none but honest, efficient, and trustworthy men to any position in the gift of their party, and to make no changes where gentlemen have proved themselves worthy,

CAUGHT IN THE ACT .- Captain Murray, of the Federal street night boat, caught a negro last night, in the act of secreting an axe belong-ing to the boat. He was pushing it down his back inside of his coat. The Captain arrested him and had him forwarded to the Mayor. The culprit had a bundle with him, which was duly examined at the Mayor's office, and found to contain four large fat chickens. He "didn't

TER."-Dr. McBride, who gave himself the title of the "King of Pain," and who was in this city everal months since with his celebrated pain killer, of which he sold a large quantity, was shot a few days since, by a gambler, in Memphis, and died shortly afterwards. McBride had acquired considerable wealth by the sale of his medicine. A few days ago we published an article giving an account of the loss, by the Doctor, of \$1500 in a gambling den at Memphis, and it seems he soon after got into a difficulty which cost him his life.

CONCEALED WEAPONS -This morning, Patrick Bradley had a hearing before Alderman Godbou, charged with carrying concealed Patrick is a cab-driver. One of the Sixth Ward officers had arrested au individual who broke and ran, taking refuge in Patrick' carriage. The latter was about driving off with the refugee, when both were arrested. On the person of Patrick was found a huge billy. He was committed for trial.

HONOR TO PHILADELPHIA.-Our city is to be honored with a Philadelphia Processorship in Dickinson College, and nearly one-half of the sum required has been received by the agent. Rev. P. Coombe. To the credit of our city, and the benefit of poor young men, our business men should give liberally to this object. ral have already promised one thousand dollars each.

LARCENY .- This morning Patrick O'Neil had a hearing before Alderman Moore, charged with larceny. A few nights since the defendan cut the hawsers from a vessel lying at Lombard street wharf, and let it adrift. The rope was carried off with the intention of selling it. A woman with whom it had been deposited appeared and testified against Patrick, who was committed to answer.

INSPECTION OF THE POLICE FORCE .- This morning Mayor McMichael, assisted by Chief Ruggles, continued his inspection of the police force. The Mayor intends to be his own judge of the efficiency of the men under his charge.

FATAL RESULT .- Frederick Baker, who was shockingly burned yesterday by falling into a vat of boiling dye stuff, at the Baltic Mills, Leithgow and Canal streets, as mentioned, has since died of his injuries.

LA COTERIE CARNIVAL at the Academy of Music this (Ibureday) evening -- Mosars. Abel & Ris'ey are deserving of being classed as the most energetic of the young men of our city. Their efforts in endeavoring to present to the public an entertainment which will tend to elevate a source or amusement which, although very popular in private circles, har, in public, been in the decadence, are certainly worthy of the support which has been ex tended to them of late. From the arrangements which have been perfected we do not doubt but that the " Carmyal" this evening will astonish every one who has the good fortune to secure an entree. Invitations have been extended to his Excellency Governor Andrew G. Curtin, and to his Honor Mayor McMichael. The latter his signified his intention to participate in the festivities of the evening; a box has been specially provided, where he will be pleased to receive his friends Our worthy Governor has responded to Messrs. Abe! & Hisley's invitation in the following courteous manner :--
