PERELLI'S OPERA,-Lucrezia Borgia was given ast evening with a degree of excellence and perfection that deserves the very highest eulogium. Indeed, the fact of the company being amatours was onite forgotten, from the admirable manner in which the ensemble was given and each individual part performed

Mrs. Davis, n'ready a fine musician, the sister of our fine pianist Mr. Charles Jarvis, has a most magour fine planist Mr. Charles Jarvis, has a most magnificent voice. It is a high mezzo-soprano, of a most sympathetic quality, in' of power, and highly dramatic. She has also admirable style, soul, fire, and expression, and in Lucrezia Borgio, last evening, made so in quivocal a success not as an amateur, but as an artist, that, should such be her desire, she can, whenever she chooses, assume her place amongs: the prime donne of the real opera. Of course, she wants experience of stage business-walk, action, e.e., but the feeing and intention are there, and very little practice will bring the rest. Mr. Taylor made a grand and imposing "Duke," though this is the first time we have heard him in Mr. Taylor made a grand and imposing "Ouke," though this is the first time we have heard him in opera. He can scarcety be coked on as an amateur, opera. He can scattery be consed on as an amateur, being accustomed to lace the public in cone ris. He song the "Duxe" with great effect. His cavatina was given with much power and spirit. We have few such basses on the stage. Air. Waterman has improved wonderfully from last year. He sang the music of 'Gennaro' with correctness and dramatic effect. His pronunctation of Italian was the best of the whole covernment and his receivative was well. the whole company, and his rectinitive was well given. Miss Deperte has also improved; she has lost the uncertainty of intension that marked her voice, and has acquired an excellent her voice, and has acquired an excellent style; she scarcely, however, yet sustains her voice sufficiently, but, as a who e, her performance of "Orsini" was satisfactory. The chorus was as fine as possible; in fact, excepting a little stiffness in the acting, the performance might have taken rank, and a high rank, as a regular artistic opera. The trio was encored, and given with immense power and effect. The ensemble was perfect, showing careful rehear-

Signor Perelli is forming a school of art which will make Philade phia, in time, the musical city of the Union. His indomitable perseverance, his know-ledge, his taste, his enthusiasm, all fit him for the leader of a new idea. As a teacher he has a mag-netism about him that takes the pupil unconsciously nelism about him that takes the outsil unconsciously from a mere student into art regions. His operas this year show this in their progress from last year. Lucresia was a grand success, intensely enjoyable, and was highly appreciated by a large and fashion-

ARCH STREET THEATRE.-Mrs. Waller appeared as "Hamley" and "Meg Merri les" to a very crowded house. There was great curiosity to see a lady in the former part, not usually in the male repertoire of our actresses. Mrs. Waller's voice and readings, intelligent, deeply studied, and iele as all poetry and fine language is with her, were sure to present a fine and sympathetic rendition of this most difficult and trying part. Mrs. Waller's impersonation is dreamy, profound, full of feeling, utierly original, and entirely free from rant. It is to be regretted that this lacy, who has elevated the style of the drama for the last two weeks, should not remain longer. The admiration for her genius was increased with the taste we have had of her quality, and it is with a sigh of regret that we see her deport.

NEW CHESNUT STREET THEATRE,-Henry Dunbar for the last time. We should have liked it for a week longer at least, such admirable and individual acting, such a fine combination, is rarely seen and can never be forgotten. Miss Octon has achieved greatness by her "Margaret Wentworth." This is the last time, at least at present, that this play will be given.

WALNUT STREET TREATRE -- Mr. Clarke gives us the Comedy of Errors, and other entertainments, all welcome to the audience, who enjoy this fine artist's genial presence.

THE NEW AMERICAN THEATRE,-The circus entertainment is at out to close and dramatic performances resumed at this popular place of amusement. Mr. Wallett's engagement has been entirely successful, and his ancient reputation as a jester has been sustained. Under the new regime the popular vandeville performances will be resumed, and the old forites will again take possession of the boards.

GEORGE FRANCIS TRAIN. - This distinguished orator will de iver an address at the Academy of Music on next Tuesday evening, upon the following subject-"Bown with Free Trade and Toadyism to Engand, and up with Irish Nationality and American Industry." Mr. Train is an admirable specimen of the energetic Tankee, and g some good ideas, in his particularly attractive style. Everybody should be at the Academy on Tuesday

CITY INTELLIGENCE

[For Additional Local Items see Third Page.]

DISEASED MEATS IN OUR MARKETS .-There can be no doubt that vast quantities of diseased meats are annually disposed of in our markets, either in the shape of the "raw mateor worked up into sausage, mince-meat, and so forth. The unsuspecting public of course buy, are satisfied, and grow unaccountably ill; and the blame is laid to typhoid fever or exposure at the skating-parks. The miracle is that pestilence is not prevalent with us now, as in European cities. Elsewhere we record the poi soning of a whole family from the use of dis eased pork. There is danger, too, that diseased beef may be sold in our markets. More than a month ago we stated that an epidemic disease prevailed among the cattle in Montgomery county, and that the diseased meat was liable to be brought to Philadelphia and exposed for sale.
On Monday, at a meeting of the Montgomery
County Agricultural Society, the matter was
brought up for discussion, and the Association
was addressed by a prominent physician who
has devoted much time and attention to an
analysis of it. The disease, he states, prevails to a greater extent in the lower and middle portions of Montgomery county than anywhere else within fifty miles of Philadelphia; and the very meagre description of the European disease received here has prevented a comparative analysis, there can be no doubt whatever of the fact, that this plague, if not the rinderpest, is certainly equally contagious and

The Society, fully conscious of the importance of the subject, has appointed a committee to memorialize the Legislature, and press upon it the necessity for instant action to prevent the sale of the injected animals, and to stop, if pos-sible, the course of the plague.

There can be no doubt that the subject will receive prompt attention in Harrisburg, and until it receives publicity through the action of the Legislature we have little hope that our uncilmen will awaken to its importance There can be no question as to their duty in the matter. It is plainly and manifestly to call for an immediate and thorough investigation, and at the same time to instruct the Board of Health to exercise stringent sanitary precautions relative to the sale of meat and milk. The society alluded to above passed a series of resolutions recommending farmers not to sell their deceased cattle but while the larger number would act conscientiously in regard to it, there are very many to whom the prospect of obtaining a small sum, and having the sick cattle removed with out trouble to themselves, would be a sufficient inducement to close their eyes to the intention of the speculator and the ultimate destination of

We find in foreign exchanges accounts of the trichina, or pork disease, that fearful malady which is raging in Germany. Instead of a dis-ease proper, it is an affection of worms, the lar-yw of which are taken into the human stomach by eating pork, and are there hatched in mil-lions, finding their way into all parts of the body, and literally eating up the patient alive The disease is not entirely unknown to the old medical writers, but its recent appearance has given the first opportunity for a tolerably clear apprehension of its nature. In a small factory village, a large number of the operatives who par-took of pork, purchased from the same butcher, were taken suddenly sick to the number of three hundred. The disease in its symptoms somewhat resembled cholers, and was treated therefore, accordingly, with opium, which was the worst possible thing that could have been done,

There was soon discovered, however, imbedded in the flesh of some who had died, an immense number of small microscopic creatures. again were traced back to the flesh of the hog, where they were discovered in the form of crysati, imbedded in a little shell of lime. These, on being subjected to a slight degree of heat, speedily brought forth myriads of small para-

sites of various forms and sizes, a dozen of which were frequently found in a piece of tissue as large as a pin-head. This process in incubation was discovered to have been produced in the intestines of those who had eaten the pork by the animal warmth of the stomach. Thus freed from their shells, the creatures make their way through the walls of the intestines in every direction, choosing the hard and fleshy tissues especially; and none of them have yet been found circulating in the blood. Thousands of them have been found imbedded in the arms, boring their way along, and living off the country as they advanced. They are, however, so small as to leave no serious injury behind, every perhaps a very serious inflammation of except perhaps a very serious inflammation o

the first countries to make the first of the contract of the countries of

the muscles, and a severe swelling, which, however, goes away if the patient survives. Great numbers have died of the disease; but one can survive for three or four weeks, by that time the "trichines" incase themselves in their shells and lie dormant, doing no turther harm. It has been proposed, by high medical authority, to assist them in thus incasing themselves by administering lime to patients, which is the substance of which the shell is composed. But no beneficial effects from such a treatment, or from any other, have yet been reported. The "trichine" is said to have come, originally, from the "field-mouse," which the "pig," by eating, introduces into his system, and he, by second-hand, into the systems of men. Very amusing are the German caricatures of a table served with knives, forks, etc. etc., and a small microscope placed beside the plate, to confirm the confidence of "the boarders" in the dinner which is to be brought

A PHYSICIAN KNOCKED DOWN AND FATALLY INJURED. - Last evening, about 7 o'clock, Dr. William Mount, a prominent Cincinnati physician, who was on a visit to this city, and stopping at the Girard House, was fatally injured by being knocked down and run over at the crossing at Fourth and Arch streets. It appears that a colored man in the employ of owell & Bourke was driving the wagon along Arch street at a rapid rate, and just as he was being checked by a police officer the vehicle struck the Dector in the head, inflicting a terri ble wound. The injured party was taken to the Girard House, where medical attendance was at once secured, but it was of no avail, for he breathed his last this morning about 3 o'clock. The colored man has been arrested, and will be held until the affair receives proper investi-

A "KNUCK" "NABBED."-Michael Hazlett belongs to that class of our fellow-citizens professionally yelept "Knucks," whose business it is to make their digitals acquainted with the inside of unsuspecting citizens' pockets, and abstract therefrom any valuables that may be stored in such receptacles. Yesterday afternoon he endeavored to exercise his professional abili-ties on a gentleman in the neighborhood of Twelfth and Market streets. He was rewarded for his pains with the temporary possession of forty dollars, taken from said gentleman's pockets. He was "nabbed," however, and com-pelled to di-gorge, and taken before Alderman Beitler, who held him for a further hearing this atternoon.

A DISHONEST BOARDING-HOUSE KEEPER. James O'Brien keeps a bearding-house on Front street, and his guests are composed entirely of sailors. Yesterday one of these sons of the sea transferred his quarters from his bank on board a vessel to a bedroom at O'Brien's boarding-house. The sailor had in his posses sion, when he took boarding with O'Brien, the sum of \$100, and a quantity of clothing. O'Brien was charged with taking possession of the same without consulting the sailor in the matter, for which irregular course of proceeding he was ushered into the presence of Alderman Beitler, who held him to bail in the sum of \$1000 to answer the charge of larceny.

THE NAVAL COMMITTEE VISIT LEAGUE ISLAND THIS MORNING.—The Naval Committee from Washington arrived in this city last evening, and took rooms at the Con inental. This morning the Committee, accommanded by Secretary Fox, Hon, William D. Kelley, and his Henor Mayor McMichael, left the city for the purpose of making a tour of inspection of the iron-clads moored in the back channel, which separates League Island from the "Neck." The distinguished party will spend most of the day the iron clads, and return to the city early in the evening.

LIFE INSURANCE. - Messrs. Betts & Reeves, agents of the Equitable Life Assurance Society of New York, have issued a very readable pamphlet, containing an immense amount of valuable information in regard to the comparative longevity of life in various countries. The facts embraced in the little brochure prove the propriety of preparing, while in robust health, for the coming of disease and death. The statistical facts are worthy of consideration, especially of those who have families dependent upon them for support.

A LIGHT THEFT.-John Stafford and John McDonnell are hands on board a brig lying, at present, a little north of Race street wharf, in the Delaware. A portion of the cargo of said brig consisted of boxes of candles, and said hands taking a fancy to the same, and probably desiring light, appropriated some of these boxes to themselves, without consulting anybody in the matter. They were accordingly arrested and taken before Alderman Toland, who held them in \$800 bail each.

MR. MILTON B. HOLT, one of the victims of the sad accident on the Bloomfield Branch of the Morris and Essex Rallroad last week, took out a \$10,000 policy in the Accidental Insurance Company of New York, for the benefit of his mother. She is thus left independent of friends, and beyond want, while it only cost him \$50. Reader, "a word to the wise is sufficient." Branch office, No. 419 Chesnut street. Frank O. Allen, Manager.

SLIGHT FIRE THIS MORNING .- This moreing, about half-past eleven o'clock, a slight fire occurred at the dwelling-house northeast corner of York avenue and Buttonwood street.

IMPORTANT TO BUSINESS MEN.-We copy the following complimentary notice from to day's issue of the Press:-

We would call special attention to our insurance column this morning. In it will be found the statements of four first-class Insurance Companies. It is wholly needless to inform the readers of the Press, in this advanced age, of the benefits to be derived from naving their property and person lusured in a

good institution.

The Astor Fire Insurance Company, of New York, of which O. Bardenwerper is the agent, presents a fine exhibit of its workings during the past year.

The United States Life Insurance Company, of New York, with a capital of \$100,000, has also been doing a fine business. If the capital should from an cause be impaired to the extent of twenty-five thousand collars, or more, the stockholders are called upon to make good the deficiency.

The Atlantic Fire Insurance Company of Brooklyn, with a capital stock of \$300,000, ulso presents a lair exhibit of its business for the past year. It re-

tair exhibit of its business for the past year. It re-fors in its card to some of our best business men. The New Amsterdam Fire Insurance tompany, of New York, has many superior claims which demand the attention of all persons desirous of having their property secured in a good company. Mr. O. Bar-denwerper is the agent for Pennsylvania.

A COUPLE OF NEW CONUNDRUMS .-

1. Wby do sensible people seem to dislike being landlords? Because, though by purchasing damaged clothing they will have plenty of rents to take in, they prefer buying Bennett's goods, in which "rents" do not

make their appearance. 2. Why is a suit from the Tower like Forrest's performance of Othello?

Because it is an excellent specimen of seaming We have the largest and best stock of Clothing in Philadelphia, all PRESE, PASHIONABLE and SOUND which we are seiling at prices guaranteed to be lower than the lowest elsewhere, for either sound or DAMAGED goods.

No. 518 MARKET STREET, BENNETT & CO.

"THEY CURE?"-What cures? Ayer's Cherry Pec. toral for a Cough, Ayer's Pills for a purgative, and Ayer's Sarsaparilla for the complaints that require "I don't read advertise-Some people think it is a waste of time, but those who do read our advertisement and profit by them, themselves well repaid lower prices and really bet-ter clothing than that for which they have paid the old-fashioned high prices. Those who understand our cilities for getting goods t first hands, and who at first hands, and who know by experience that our style or workmanship are not surpassed. have the adventage of their neighbors, who have not been to our house, and who persist in paying hig prices for only medium, goods. Let it be medium goods. Let it be fairly understood, we buy cheap and self-cheep. WE EMPLOY THE BEST CUTTERS and best workmen, and ALWAYS GIVE SATISFAC-TION to our customers, and REALLY give them a BET-TER VALUE for their money than they can get elsewhere. COME AND TEST IT FOR

YOURSELV. An immense stock of fine reasy-made Clothing for gentlemen and youth. Custom department with a splendid stock of WANAMAKER & BROWN, Popular Clothing House, Southeast corner of Sixth and Market Streets. THE RACE BETWEEN THE "WINOOSKI" AND "AL

GONGUIN"—The race of these hitherto fast boats is terminated. We cannot better give the result than by copying from the Algonquin's Log, which she took along with her, and judging from her speed, must have had it in tow behind her:— Tuesday, 13th, noon.—Took a fair start from Brook-lyn Navy Yard; kept in sight of the Wincoski for nearly half an hour. The engineer, mistiking the pilot's spinal, "took something to drink" instead of "wet the whistle." 8 P M.—Pussed safely out of Hell Gate; learned the Wincoski pad gone that way agent three board.

s P M.—russed salely out of field Gate; learned the Wincoaki nad gone that way about three hours ago. An accident happened to the larboard binnacle light of the Algonomie; the wick wanted trimming and the scissors had been left at the Navy Yard it having been understood that no scissors were to be carried by either boat.

Wednesday, 10 A M.—Got under way again,

baying laid by over night; the pliot said he didn't think it would be so dark. Saw the Winooski re-turning home, she having been three days out, we only on our second day, owing to a misunderstanding. The instructions to the engineer and the pilot were to wear their old clothes, while it was observed that every one of the officers on board the Winooski were dressed in new suits, from Charles Stokes & Co.'s one price, under the Continental. Orders have been issued since for the officers of the Algonquin to do the same. Had that been understood at the start things would have been d ff-rent.

GREAT ADVANTAGES are offered to the citizens of Fhiladelphia by the opening of the Market Street Ten House for the sale of Tens and Coffee excu-sively, on the south-sat corner of Twe file and Market. The house is conveniently located in the central part of the city, opposite the principal markets, and conducted by Messrs. Boyd & Co., gentlemen whose experience enables them to select the test goods in the market, which they offer at we solicit for them the liberal patronage of our

THE "FLORENCE" SEWING MACHINE, we find, is being bought in preference to all others. The reasons for this are at once cogent and numerous. It does better and finer work than any of its rivals; is the only machine capable of maxing the lock and knot stitches; the only machine having a uniform tension of upper and lower thread; the only machine that has the reversible feed motion enabing the ope-rator to fasten the ends of seams, thereby saving much labor, and owing to its simple construction, it rarely, if ever, gets out of order. Office, No. 620 Chesnut street. Chesnut street.

how borner's lliad was once written in characters so minute that the whole cou'd be inclosed in a nut-We would not like to undertake to put the whole of Homer in so small a space; but we put a world of truth in a nut-shell when we declare that it is the part of true wisdom to buy all winter coal from the extensive coal world of W. W. Alter, No. 957 N. Ninth street, below Girard avenue.

MULTUM IN PARVO.-We have heard a story of

MIRRORS, OIL PAINTINGS, ETC .- We would invite the attention of our readers to G. We would call your attention to ex-

this and other markets.

Interest allowed on deposits.

NEW GAS REGULATOR

INVENTED BY

DR. CHAS. M. CRESSON.

(Late Manacing Engineer of the Philadelphia Gas Works', possessing GREAT DELICACY of adjustment by the use of a peculiar form of va vo and gas boider. governing accurately a single light, with a capacity to pass gas enough for the full number of lights, and the ability within the instrument itself, to increase the pressure, when the greater quantity of gas is required. Among the peculiar advantages of this Regulator, that make it preferable to instruments of more contracted size, which require the use of MFRCURY or FLEXIBLE DIAPHRAGMS, the following deserve

FIR-T-The free motion of the Regulating Valve through considerable space, gives it grea or delicacy or adjustment, and a wider range of communition in a single instrument, than is possible with other forms-SECOND-The fluid seal of GLYCERINE used to thus REGULATOR, avoids the danger resulting in other forms, from the unwholesome vapors of Mercury. which passing off with the Gas, are discemicated throughout the rooms in which it is burned, sablecting the occupants TO ALL THE DELL TERIOUS EFFECTS OF MERCURY upon the human system and especia ly upon the LUNG's and SKIN, when it is thes diffused as vagor. The accidental overflow of Mercury from these mercurial Scals has often injured valuable Gas Meters, the cost of which has necessarily been charged to the

consumer. Where the use of MERCURY in regulators is avoided by the substitution of a FLENIBLE DIAPERAGM, the resulting difficulties are also numerous; eas is the liability to LFAKAGE and EXPLOSION OF GAS: another, the loss or l'lexibility and consequent inefficiency by age and exposure to cold, and thudly, the inherent vice of want of a elicacy of adjustment, and range of action.

To remedy these faults, the "CRESSON REGULA-TOR" was invented, and wherever introduced itches given the greatest satisfaction, always producing a steady light and regular consumption, with a saving or from TWENTT to THIETY Per Cent. in amount of gas

LETTERS PATENT have been granted for this Essn-

lator, both in the UNITED STATES and in ENGLAND. It is manufactured by the "AMERICAN METER COMPANY," Of NEW YORK, PHILADELPHIA, and BOSTON, for

us alone, and for sale, Wholesale and Retall, at our ware houses in this city, where all orders and letters should be andressed. The following is an extract from the Journal of the FRANKLIN INSTITUTE, dated October 18, 1862: -- "An experimental trial was then made as to the quantity of gas consumed by the burners when under regulation to their maximum economy, and also the amount consumed

by the same burners when subjected to the ordinary variations of street pressure. "The result showed that with the Regulator, there was uniform by 78 cubic feet of gas per hour consumed, being an average of 3 7-10 cubic feet per burner Whiist without the Regulator the same burners consumed from 106 to 140 cubic feet per hour, the averaga-heling 126 cubic teet, or 6 feet per hour to each burner "

The test apparatus which was set up in the ERANK-LIN INSTITUTE can be seen at our

SCALE WAREHOUSE In this city, where the public ara-invited to emil and examine for themselves, the amount of saving, effected

by the use of the
