MEDICAL ELECTRICITY

MEDICAL.

DR. S. W BECKWITH'S

ELECTRICAL INSTITUTE,

No. 1220 WALNUT STREET,

For the Treatment of Acute and Chronic Diseases.

Electrical investigation has proved that the human body acts on the principle of the galvanic battery. The brain, mucous and serous membranes, the skin, tissues, and fluids, constitute the negative and positive forces. Every action, whether mental or physical, is the result of these antagonistic forces. Digestion respiration, circulation, secretion, and excretion are due solely to Hectrical influence. There is a polar action established throughout the nervous system waich connects with every part of the body, establishing and preserving a preser balance of the electrical element. which constitutes health, and a disturbance of which causes disease. There are strictly but two conditions of disease—one of inflammation, or positive; the other weak, debilitated negative; and as Electricity contains these two conditions in the action of the positive and negative currents, all we have to do is to neutralize the disease and restore proper healthy action.

We do not wish to convey the impression that we sure all diseases in all conditions. We cannot cure consumption after the lungs are all destroyed; yet we do assert, and are prepared to practically demonstrate. that hundreds or cases of almost every form of chronic diseases, pronounced incurable by the best medical practitioners of the country, have been radically CURED, some of them in an incredibly short time, by our Electrical treatment. Its great superiority over other practice in the cure of disease is a so attested in the fact that, wi hin the past ave years, over FOURTEEN THOUSAND patients have been treated at this office, suffering from almost every form and condition of disease common to humanity, and in nearly all cases a benefit or perfect cure has been effected. Pa sy, deafness, blindness, rheumatism. dyspepsia, cancer, and all the old knotty diseases that are a physician's curse, as it proves his inability to eradicate, are by our scien tific method comparatively easy of cure. Specimens of tumors of large growth extracted by means of Electricity alone, without pain, without the use of the knile, ligatures, or any other means, may be seen at our office by those interested Theretore, with these FACTS to prove our theory and treatment or disease, we are willing to undertake any of the following diseases, with every nope and prospect of success, with very many others not here enumerated :-

70 LADIES we can recommend this treatment as one of UNVARI, D SUCCESS A most innumerable cases have come under treatment at our office who can testify to this lact. Mrs. Bl.CK WITH has entire charge of the Ladies' Department, and all deficacy will be used towards these who entrust then selves to her care. In female diseases, as mentioned in the above list, with others not mentioned, she has had a large experience, and can confidently promise the most gratifying results. rience, and can confidently promise the most gratifying results.

TO THE AFFLICTED—The treatment is mild and gentle, producing no shock or unpleasant sensation whatever. Our professional intercourse with the afflicted will ever be characterized by perfect candor and honesty, and those whose complaints are incurable, or do not again or amelioration will be frankly told so, and not accepted for treatment it matters not woat may be your complaint or how long you may have squared or or how much, or what course or treatment you may have been subjected to, or what disappointments you may have experienced it the system is not worm out—if sufficien vitally remains for reaction—there is a sur prospect of recovery.
