STARTLING EVENT.

A Prisoner Shot While Attempting to Broape from the County Jail-His Subsequent Death.

The of the prisoners at the County Jail was shot at that place last night, while attempting to escape. The circumstances are as tollows:—About & o'clock last evening, Jailor Robb visited the "hangman's room," where the rope, weight, and drop are kept for hanging criminals, and discovered that the rope was missing. He made a partial search, but was unable to find it, and being satisfied that an attempt would be made to break jail, he prepared himself accordingly. Stationing Mr. Cribbin, who is boarding at the jail, as patrolman outside, Mr. Samuel R. Bent, acting Turnkey, upon the wall near a privy, where he could command the north side of the building, and Mr. Robb himself took a position directly beneath the "condemned room," which directly beneath the "condemned room," is in the northwest corner, and the same occu-pied by Ira Stout. This room was occupied by Richard Hayes, a young man from Corning, committee at Corning, March 30, for trial at the present term of the United States Court, on an indictment for passing counterfeit \$20 green-backs, Solomon Snyder, detained as a United States witness, William Crowley, the boy committed for trial on a charge of highway robbery, robbing young Campbell of a watch in Caledonia Square, and Theodore Newcomb, surrendered by his bail on an indictment for shooting Ann Mack.
At 11 o'clock a rope—the identical hangman's

ope-was thrown from the grated window on the north side, directly over where Robb was watching, and immediately after (it is supposed before Robb could reach out and pull the rope in) a man slid down. Robb said, "Go back," at which the prisoner swung clear of the sill at which the jador was standing, and Bent, who had a double-barrelled towling-piece, had down his weapon, as he says, with the intention of seizing the man when he came down, but up in looking up, he saw another person on the rope, and, not wishing to take his chances with two men, he fired. At that instant Robb grasped the lower man by the ankles and dragged him into the room, calling for Bent to come up directly, not thinking that he was hit. The other person, which proved subsequently to be Crowley, crawled back. The first one was Hayes, and when he was handed in it was discovered that the contents of the gun (heavy duck shot) had

pierced his back.

As soon as this became known, Dr. Walter M. Fleming was sent for, and upon examination of the wounds declared the man past nelp. He died near 1 o'clock, two hours and four minutes after he was shot. The shot penetrated the lungs, and with every breath the blood and air was expelled from his wounds. Hayes conversed freely before his death, say-

ing that he should not have attempted to escape; that he had been well treated while in confine-ment, and expressing a wish to see his mother. This he reiterated several times. His father, Robert S. Hayes, of Corning, was telegraphed for, and is expected here to-day. Coroner Treat took charge of the remains this morning, and an inquest is now in progress

Hayes was arrested by Deputy United States Marshal Van Etten, of Bath, Steuben county, and he informs as that he was about twentyseven years of age, and was a bad man. He stands indicted at Bath, upon a charge of murder, poisoning a soldier to obtain his money, besides other offenses. His parents bear a re-spectable name, and are in moderate circum-

The prisoners who have been confined in jail for the past few months are of the shrewdest kind, and, as we have before stated, Jallor Robb has irustrated two separate attempts at escape. The present exit was made after sawing four of the bars which formed the grating, three of them being completely severed, and the fourth partially so, and then pried up from the inside, with a heavy iron bar, procured from another

part of the fail in some mexplicable manner.

The rope was procured by the boy Crowley, who was put through a small hole in the Hangman's Room, and removed it from where it hung on the wall. During the daytime the prisoners had access to the hall, and must have learned that the rope was there while the jail was being whitewashed, a few days since. Haves and Snyder occupied this room before Mr. Robb became jailor. There is hardly a grating in the whole jail that does not bear the marks of the saw or file in the hands of the ingenious prisoners, and the wonder is that they have not

been more successful. geon, on bread and water, where his Jack Snep-pard propensities will not have much vent. That an officer is justified in snooting a pri-

soner who attempts to escape there is no doubt, and as Bent gave Hayes warning, and as he persisted in sliding down the rope, he claims that he could do nothing but shoot, knowing that there were three other prisoners above who could be upon him in case he grappled with also says that he fired at Hayes limbs, intending to cripple him; but as he fired the prisoner slipped down the rope, receiving the charge in his back. If there is any fault, it is in not securing possession of the rope before it was used.—Rochester (N. Y.) Examiner, yesterday.

Russia.

HONORS TO THE PEASANT NOBLE WHO SAVED THE CZAR—HIS ACCOUNT OF THE CIRCUMSTANCE. The Russian Gazette of St. Petersburg says that on the 6th instant the marshals and deputies of the St. Petersburg nobles resolved unanimously to present Ossip Ivanovitch Komissaroff, the peasant who toiled the assassin's aim, with a holy image, and to open for him a subscription, to which all the noblity of the district are invited to subscribe. The permanent deputations of the nobles waited upon him to obtain his consent to be enrolled in the book of nobles.

Komissaroff gratefully accepted the offer, and, in doing so, gave the following account of what took place:—'I do no, know m selr what strange feeling possessed me when I saw that man pressing through the crowd. I was watching him, but when the Emperor came up he went out of my mind. All the Emperor came up he went out of my mind. All at once I saw him draw a pistol and aim at the Emperor. I bethought myself that if I rushed upon him he would kill some one else, or perhaps myself, and without more ado I struck up his arm. The pistol went off and after that I do not recollect anything. I was as it were in the midst of a fog; and when I came to myself I saw a general, who embraced me. I was taken to the palace, but I was stunned, and it was an hour and a half before I could speak."

could speak."

Apar ments have been hired for him in the Rouatze House. His family name will be changed into that of Komissaroff Kostromskoi, in memory of the province which has twice furnished saviors to the Imperial house in a moment of danger. He was obliged to show himself on the stage of the Russian theatre, and to relate what happened. He was invited to a grand banquet at the English c ub. It is said that six hundred thousand hancs have been subscribed for him in St. Petersburg alone, and that a proprietor of Kostroma has offered him a considerable quantity of land for the purpose of considerable quantity of land for the purpose of considerable quantity of land for the purpose of considerable quantity. aderable quantity of land for the purpose of ena-bling him to support his new dignity.

The Emperor nimself, says a correspondent of the Nord, asked Gen ral Todleben, as a personal favor, to direct the equication of Komissaroff.

George N. Sanders' Bankruptcy.

George N. Sanders' Bankruptcy.

Court of Bankruptcy, London, April 26 before Mr. Commissioner Winslow.—In re George Nicholas Sanders.—Mr. Lumiey appeared for the assignees, Mr. Linkister for the bankrupt. This was a sitting for examination and discharge. The bankrupt was described as of several piaces in England, Ireland, France, and America, contractor with the Contederate Government of America for the building and running of iron-piated postal vessels. He was a bankrupt in 1843, and obtained a certificate of discharge. The accounts show the following results:—Debts and Nathaties, £10,955, with assets—property in the hands of creditors £6100, and sundry dobts, £41(0). The cause of the failure is thus stated by the bankrupt:—"Drasppointment in the execution of my contract with the Confederate States of America for the building and running of fron-plated assat vessels." It appeared that Messrs Lindsay & Co. had undertaken the contract in question, which was supposed to be of value. From Messrs, Lindsay the bankrupt claimed £45(0) for commission, but the debt was disputed, and it was a leged that the bankrupt was in reality a debtor to the firm. An adjournment was taken in order that the assignees might hold a private sitting for the exam fination of the bankrupt in reference to his transactives with Lindsay & Co. and others, with liberty to the assignees to apply for further accounts if they should be so advised.

"PETER'S PENCE."—The amount of Peter's pence subscribed in Holland has reached more than 402,000f, since this year began,

GOLDEN

TEETH EXTRACTED

ABSOLUTELY WITHOUT PAIN BY THE

Colton Dental Association,

No. 19 Cooper Institute, New York.

No. 737 WALNUT STREET.

There is nothing which people dread more than pain. ard there is no pain more excruciating than that of baying a tooth extracted.

When I first introduced the Nithous Oxide on LAUGHING GAS as a substitute for chieroform and other But the new agent made a steady and constant progress. The Gas has now had a trial of three years, and has come out triumphantly!

Many of the leading Dentists of New York and Philadeiphia, who have given up the use of chloroform and other, send all fheir patients to me who require to take an anasthetic. I make a specialty in the use of the Gas, and have business enough to justify me in making h PRESH every day.

I now use about 360 ga lons per day. As TO ITS SAFETY, I have administered it to over 14,000 patients since May 1883, and no unpleasant effects have attended a single case. If there was any dar ger from inhaling the Gas, would not some one of these have been injuriously affected? All the Dental and Medical Journals now admit that the Gas is the best angesthetic for tooth-drawing; best, because enough can be given to produce entire insensibility, without any danger; best, because it is so pleasant to breathe, producing no sickness or disagreeable sensations, and leaving the system entirely in two or three minutes; best, because it will succeed with patients on whom chloroform and ether have been tried in vain; best, because the most de icate, nervous, and feeble persons can breathe it with satety; best, because, with many patients, it renders tooth-drawing a pleasure.

Our patients have all signed a scroll certifying that their teeth have been drawn without pain, and opposite each name is a blank for remarks. The following are a tew of the remarks :-

are a tew of the remarks:—

"Without the slightest pain—an uninterrupted dream,"

—By a Foreco Manate. of State.

'A good humbing, if a man can have his teeth drawn without knowing it.

Twenty teeth extracted without the slightest pain, with one cose of grs."

"Half Coumbia—the greatest discovery of the age."

"No more old-tashioned dentistry for me."

"We second operation with the gas—have tried either—most earnestly recommend Nitrous Oxide."

"None but the most agreeable sensations."

"Very pleasant fream."

"Was weak and nervous received no pain, but wonderfully refreshed afterwards."

"A pleasant ride on the cars."

"A great improvement in the barbarous art of dentistry."

"I should never have a tooth drawn without It." God bless the inventor.

"Have no more dread of tooth-drawing."

"Have no more dread of tooth-drawing."

"The rear I experienced before taking the gas was only equalled by the pleasure of 18 tise."

"Thirteen teeth drawn, with one dose of gas, and no

"Delighted with the operation."
"A pleasure instead of para."
"I his beats my chloroform," (from a dentist),
"I thank the Lord for st.is discovery—I was perfectly

"With many others, I may well say, God bless Dr. "I am well paid for coming 200 miles."

H. C. Jones,

From a large number of Testimonials, I select the ollowing extract from a letter addressed to me by Protessor P. H. Vander Wayde, Professor of Chemistry in Girard College, formerly of New York Medical Col-

lege:—
"I am safisfied that nitrous oxide can be used in all cases where ether and choroform cannot be safely administered; in many cases the use of the two tast ramed anasthetics is by judicious physicians considered this ether is a continuous content of the country indications were overlooked and fatal results have followed the use of ether and chloroform. I know no case in which I would consider nitrous oxide gas unadvisable, except in a case of censumotion so far gone that the excitement attending the extraction of a tooth would be unsafe without" any causaft etc. From the New York Evangelist:-

From the New York Evange is is—

"We are slow to believe in the efficacy of new remedies which are offered to the public, but the frequent testimony of clerymen and others of our acquaintance has assured us that Dr. 'OL'ON has at last found a means of extracting testh absolute's without pain."

"To Dr. COLTON is due the credit of reviving the use of this most important agent infrous oxide) in the practice of Dentistry "Letter from Surgeon Carnochan, New York.

tice of Dentisiry "-Letter from Surgeon Carnochan, New York.

A clerkyman of this city visited the Colton Dental Association a lew da a since, and after having a large, troublesome tooth drawn, made this certaincate on the register of the Association:—"No pain! All over in three minu is A man can leave the dentist shands in a good humor." The operation was performed by the use of Nitrous Oxides or Laushing Gas.

A "Hankful Healt:—A flady teacher from Washington recently came into our office, and said she had some teeth which she wished extracted, but she was so nervius she was airaid to take the gas, and she knew she should seel the pain. We assured her there was not the slightest dauger, as we had given it to thousands, and never had a failure or accident. She breathed the gas, and we extracted nine teeth.

When she awoke I said:—"Your tooth are out." "Rism" possible!" She piaced her band to her mouth and exclaimed "God bless gill all!" She immediately wrote on our scrol her name, and added—The Intion Dental Association—a blessing to the human race,"

M EDICAL ELECTRICITY

Wonderful Scientific Discovery

DR. S. W. BECKWITH'S

ELECTRICAL INSTITUTE

No. 1220 WALNUT STREET, For the Treatment of Acute and Chronic

Electrical investigation has proved that the huma body acts on the principle of the galvanic battery The brain, mucous and scrous membranes, the skin, tissues, and fluids, constitute the negative and positive forces. Every action, whether mental or physical, is the result of these antagonistic forces. Digestion respiration, circulation, secretion, and excretion a due solely to Electrical influence. There is a pola action established throughout the nervous system waic h connects with every part of the body, establishing and preserving a preser balance of the electrical element, which constitutes health, and a disturbance of which cisease one of inflammation, or positive; the other weak, debilitated negative; and as Electricity contains

these two conditions in the action of the positive and

negative currents, all we have to do is to neutralize

the disease and restore proper healthy action.

We do not wish to convey the impression that we cure all diseases in all conditions. We cannot cure consumption after the lungs are all destroyed; yet we do assert, and are prepared to practically demonstrate, that hundreds or cases of almost every form of chronic diseases, pronounced incurable by the best medical practitioners of the country, have been radically current some of them in an incredibly short time by our Electrical treatment. Its great superiority over other practice m the cure of di case is also attested in the fact that, within the past ave years, over FOURTREM THOUSAND patients have been treated at this office, suffering from a most every form and conditio of disease common to humanity, and in nearly all case a benefit or perfect cure has been effected. Pasy, deaf ness, blindness, rheumatism, dyspepsis, cancer, an all the old knotty diseases that are a physician's curse as it proves his mability to eradicate, are by our scientific method comparatively easy of cure. Specimens o tumors of large growth extracted by means of Electricity alone, without pain, without the use of the knife, ligatures, or any other mesns, may be seen a our office by those interested. Therefore, with these FACTS to prove our theory and treatment or disease

PACTS to prove our theory and treatment of disease we are willing to undertake any of the following diseases, with every nope and prospect of success, with very many others not here enumerated:—

I. Diseases of the Brain and Nervous System.—
I. Diseases of the Brain and Pather and Particles, Paralysis (hempically, Neuralgia, Hysteria, Nervousness, Paipitation of the Heart Rock-Jaw etc.

2 Chgans and Tissues connected with the Digestrive Yeake.—Solie Throat Dyspepsia, Diarricks, Dyspersia, Diarricks, Dyspersia, Diarricks, Dyspersia, Diarricks, Dyspersia, Diarricks, Dyspersia, State of the Liver and System.

3. Respiratory Organs —, giar h. Cough, Influenca, Ashima (when not caused by organic diseases of the heart), Bronchills, Pleuchy Pleurodynia, of Rhommatus of the Chest Communication in the early stages.

4. Findods and Microulae System.—Redulatism.

heart, Bronchills, Fleurisy Fleurodynia, or Rheumanism of the chest Consumption in the early stages.

4. Fireces and Muscular System. Rheumanism of the chest Consumption in the early stages.

4. Fireces and Muscular System. Rheumanism, Cout. Lumbago Shif Neck, Spinsi Curvature. Hip Discares, cancers lumors.

5. Uninary Asid Gentral Ordans,—Gravel, Diabetes, and Ridney Complaints. Impotence and Semina. Weakness. The latter complaints never salt to yield rapidly to line freatment.

5. Discars: Peculiar to Females.—Uterus Complaints involving a mai cosilion, as Prolassus Antroversion, Retroversion, Inflammation Ulceration, and various other sheet lone of the Womb and Ovaries

TO LADIES we can recommend this treatment as one of UA VARHICD SUCCESS. A most innumerable cases have come under treatment at our office who can testify to this lact. Mrs. Bl CK WITH has entire charge of the Ladies' Department, and all delicacy will be used towards those who current tennselves to her care. In temple discress as mentioned in the above list, with others not mentioned, she has had a large experience, and can confidently promise the most gratifying results.

10 THE AFFLICTED—The treatment is mild and genile, producing no shock or unpressant sensation, whatever. Our professional meticonres with the

ing results.

TO THE AFFLICTED —The treatment is mild and genile, producing no shock or unpressant sensation whatever. Our professional intercourse with the sufficient will ever be characterized by perfect candor and honesty, and those whose complaints are incurable, or do not admit or amelioration will be frankly told so, and not accepted for treatment. It matters not what may be your complaint or how long you may have saliered, or how much, or what course or treatment you may have experienced, if the system is not worn out—if sufficient witall y remains for reaction—there is a air prospect of recovery.

REFERENCES—ibe diseased and all interested are referred to the followlig-named gent emen, who have been treated and wilnessed our treatment on others, at No. 1220 WANNUT Street.
