CITY INTELLIGENCE.

(For Additional City Intelligence see F., Vr. Page.)

SEKING STARS .- "As countless as the sands of the sea-shore, or the stars of heaven." How true is the comparison! In ancient times, when the telescope was unknown, and there were no artificial means to extend the scope of observa-tion, the number of the stars seemed almost limitable. But now, when, by the aid of astronomers' enormous telescopes, new and vaster fields of observation are opened up to our vision, the mind almost shrinks back appalled at the mag-mitude of creation. There have been frequent sitempts to count the number of the visible beavenly bodies. There are also many calcula-tions respecting the numbers of the stars of the several magnitudes by referring the stars of each magnitude to its own great concentric shell of space, and sllowing a certain number to each successive shell. There has been thus calculated to be 22,464,000 stars distributed amongst the different portions of space, calcuthem to be of twelve different magnitudes.

If we now suppose the above number of stars to be equally distributed throughout each shell or concentric space, that is, at equal distances, so that each space should contain the number of stars corresponding to its capacity, we shall find the number corresponding to each magni-tude. Thus 22,464,000—1728=1300—the number of stars of the first magnitude, or number to occupy the central sphere; seven times that number for the next concentric sphere, nineteen times for the next, and so on; as in the fol-

Visible to the naked eye. Vmible only through tel. .5,101,000 2,808,000

Total......22,464 000 Thus we see that if all our stars were about equally distant from each other, we should have 13,600 first magnitude stars, instead of 18 or 20, as at present, and the whole number visible without optical aid would be nearly three millions, instead of three thousand. It is probable that in such a distribution the magnitudes, as at present constituted, would not correspond, for a vast multitude of stars would be much nearer to us than they now are, and many of those that appear to us through telescopes to be closely aggregated in the spaces of the Milky Way would be much farther apart. According to the scheme of equal distribution, the nearer stars would be much brighter, as well as much nearer; our nights would not be dark, and we should very likely derive not only a much greater amount of light from the stars, but probably a considerable degree of heat; many of the nearest stars would present a measurable disk and astronomers would not be account. disk, and astronomers would not be perplexed in determining the annual parallax, a problem which has only been resolved of late years, by the most remarkable refinements in instrument making snd in delicacy of observation.

We are therefore confirmed in the pelief enter-

tained by astronomers generally, that the stars are gathered mainly into clusters through the visible universe, and we are in an exceedingly sparse portion of the great cluster of the galaxy. If we were in the condensed ring of the Milky Way, our nights would be splended beyond description. Indeed, we should find no night there, and it may be doubted whether the augmentation of light and heat in those condensed regions would not be inconsistent with densed regions would not be inconsistent with the existence of life as at present constituted on

The stars of all the clusters are chained together, as it were, by the gravitating force which pervades the universe and acts upon all matter. This force extends to a greater distance, and is active through more extensive spaces, than has generally been realized or apprehended. Mrs. Sommerville, a profound scientific lady, makes the following remark at page 386 of her treatise, "Connection of Physical Sciences"— * * "Yet so remote are the nearest of the fixed stars that it may be doubted whether the sun has any sensible in-fluence on them." This passage induced us to enter upon the calculation a short time since, It is by no means difficult or complex. Among other results we find that two su and mass of our sun, and placed at the distance of the nearest fixed stars (sampler) would attract each other with a force of 37,039,658,-

£60,000 tons. And yet, vast as is the number of stars that have been observed and numbered, it is but reasonable to suppose that in relation to the whole sublime and infinite creation they are but as a grain of sand to the whole world. Indeed, when we try to compute the number of worlds that compose the universe, calculation is balked, and the brain whirls under the stupendous infinity of the theme.

BAPTIST SABBATH SCHOOL CONVENTION. The pastors and five delegates from each of thirty-four Baptist Sunday Schools met in convention at the Tabernacle Church, Chesnut Rev. Dr. Griffith presided, and opened the exercises by reading a portion of the Scriptures. Rev. Dr. Smith officiated in prayer.

Mr. Evans stated that the committee who issued the call for the Convention had prepared a plan for the consideration of the Convention The plan proposed the promotion of greater unity in laboring, through Sunday Schools, for the dissemination of those important truths which as Baptists we profess to love; to in-crease that sympathy which all should feel towards others engaged in the same great work; the establishment of an organization as a central point from which influences may radiate, that shall tend to give interest and impart vitality to the schools; also to create a fund for the special object of assisting schools that may require material aid; to seek out, through visiting committees, destitute localities, and assist in the formation and support of schools.

form a Baptist Sunday School Association. Mr. Moore thought it would be better to refer the plan proposed to a committee of investigation and deliberation. He wanted to see an association formed that would advance the interests of the schools, and therefore he thought

It was moved that "it is deemed expedient to

Rev. Dr. Smith, of Spruce Street Church, thought a Sunday School should be the work of a church, just as much as a prayer meeting, and therefore it should be seen that this central association springs from the Church. He thought the first thing the Baptists needed in this city was more meeting-houses, and when a Sunday School segranized it should be with a view of establishing a church at that point.

Rev. Mr. Wilder said he had found in this city that the superintendents of the various schools were not acquainted with each other; therefore an organization like the one proposed would accomplish a great deal of good in bringing the teachers and superintendents together.

The motion agreeing to form an association A motion was made that the Superintendents of the several schools represented be a commit-

tec to prepare a constitution.

Mr. B. F. Dennison moved to amend, as follows:-That a committee of five, of which the President of this meeting shall be chairman, be appointed to prepare a constitution, to be submitted at a future meeting of the Asso-

The amendment was agreed to, and after the transaction of some unimportant business, the Convention adjourned.

A NEW WATER MAIN.-The thirty-inch main, to connect the Corinthian avenue and Kensington basins, is so nearly laid that the Department of Water expects to make the connection this week, and supply the people of Kessington with water from the Schuylkill.

DIED OF HIS INJURIES .- Francis Swingle who was accidentally shot in the groin on Sun day evening, at a house in South street, near Thirteenth, died from the effects of it vesterday, at the Hospital. The Coroner will hold an in-

CORNER STONE LAID -Yesterday afterncon the corner stone of the Bethany Fresbyte-rian Church, to be erected at Twenty second and shippen streets, was laid with a propriate cere-monies. The officiating clergymen were Rev. Mr. Lowry, paster of the church, Rev. Drs. Boardman and Reed, Rev. John Chambers and

John Wanamaker read a historical sketch of the church, from which it appeared that it had a very small beginning in 1858, when the Bethany Musion School was formed, and steps were taken for the erection of a mission house, which was dedicated to religious service on the 27th of January, 1859. The movement was attended with abundant success, so much so that in 1862 the need of a more suitable build-ing began to be felt, but it was not until 1865 that the Bethany Church was formally organ-ized. It now has about a hundred members and a regiment of Sunday scholars, as Mr. Wana-maker expressed it—about seven hundred and fifty, with lorty officers and teachers. On the 30th of August last the ground was broken for the church, and the work, it was said, would go on until it was completed.

The Rev. Dr. Boardman, upon being intro-duced to the audience, said he should not make a formal address, but would say a few words of the building about to be erected. He had no doubt that it the occasion of the meeting had been the opening of a public square, like Wash-ington or Rittenhouse Square, there would have been an immense gathering; yet such an event was not to be compared to that which had called them together. Of all the countless plans of the day for doing good, none was to be compared to the establishment of an evangeli-cal church. It was like setting a new star in the heavens. All temporary blessings should flow out of such an organization, and all who can come within the sphere of its usefulness

should bid the work God speed.
Rev. John Chambers hoped the movement Rev. John Chambers hoped the movement would be an entire success, and that when the edifice is erected, nothing but the simple Gospel of God will be preached in it. He had no hope of the world but in the Gospel. It had been tried to reform men by the temperance movement, but it had falled; a thousand other ways had been attempted, but nothing save the blessed Gospel would accomplish the salvation of manking. of mankind.

After a few remarks by the Rev. Dr. Reed, the corner stone was laid, followed by the bene-

The church is to be 44 by 88 feet, and the school-house adjoining is to be 82 by 105, both of the Gothic order of architecture. They are to be erected of Belville brown stone, and will be beautiful edifices.

MEETING OF THE BOARD OF GUARDIANS. A stated meeting of the Board was held yesterday, President Erety in the chair. The House Agent reported the census of the House for the week ending October 13th at 2884; same time last year, 2689; increase, 195; admitted within the last two weeks, 218; births, 9; deaths, 30; discharged, 124; eloped, 35; number granted lodgings since last report, 11; meals, 76. Of the immates 210 are in the mea's insane department, and 353 in the women's

insane department, and 353 in the women's insane department. White men's out-ward (workingmen)—326; hospital, 261. Colored men's out-ward, 24; hospital, 35. White women's obstetrical ward, 9; nursery, 105; hospital, 263. Colored women's out-wards, 44; obstetrical, 19; nursery, 25; hospital, 21. Superannuated males, 72; superannuated temales, 109; healthy males males. under 60, 107; number of men employed, 397. The Steward reported the House receipts at A communication was received from Council a

agreeing to the transfer of certain items in the appropriations. several ballots for Chief Resident Physician of the Insane Department were taken without re-

sult, and the election was again postnoned.

The following visitors, out-door physicians, and anothecaries were then elected:-David Baker, Visitor, First District; A. S. Red-David Baker, Visitor, First District; A. S. Redstreake, Second District; R. F. Christy, Third
District; Francis Smith, Jr., Fourth District;

L. M. Service, P. J. Hoopes, Visiting Physician and Apothecary, Eleventh District.

Dr. Tyson was elected Microscopist, and Dr. Hayes Agnew, Curator of the Pathological Museum. The usual requisitions were approved, Ad-

journed. REPORT ON THE CONDITION OF OUR Wharves.-Special exertions have been made by Select Councilman Bumm, or the Eighteenth Ward, in seeing that the dock and wharf regulations are properly carried into effect.

It is owing to his determination that the stable manure and the refuse of glue factories, intended for conversion into fertilizers, are being removed from Green street and Shackamaxon street docks. It seems that some of our slips and docks badly need cleaning. Through Bumm's instrumentality this evil, too, is likely to be remedied.

The Finance Committee of Councils held a meeting last night, at which it was resolved to recommend an appropriation of \$3600 to remove these evils. The waste failing into the river from the boats carrying offal from the docks has, by slow accretions, amounted to a large deposit. The Commissioner of Wharves and Landings, Mr. J. H. Pogh, has addressed to Councils a note showing that the sum of \$4599 appropriated to clean the docks was altogether

B The Board of Port Warden's have notified Mr. Pugh that unless these docks were purified within thirty days, they themselves would un-dertake the task. Medical men declare that disease is heightened by the effluvium from the water in these particular docks. It is not doubted that on Thursday, when Councils meet, the recommendation of the Finance Committee will be ratified. By act of Assembly of May, 1864, if such work is done by the Port Wardens the expenses become a lien upon the city.

COME OFF SECOND BEST,-Washington and Robert Hamilton, James A. Cunninguam, and James Lennig were arrested, charged with committing an assault on a negro last S The two former were in the afray in which the late Alderman Harmer was shot, and are also under bail for participating in the late riot in the Second Ward, in which Police Lieutenant Fuller was shot. It appeared in evidence before Alderman Hutchinson, yesterday, that an inot-tensive negro, named William Young, was walk-ing at Twelith street and Girard avenue. One of the defendants first assaulted him, but was knocked into the guiter for his trouble. other came up and received a swinging blow between the eyes that sent him also recling. The darkey had more pluck than they supposed. The others were about to attack him when some citizens interfered, and caused the arrest of the entire party. Alderman Hutchinson held them each in \$1000 ball. A port on of them only the night before had engaged in a row at Fourth and Carpenter streets, and had badly hurt a coope man named Thomas Close

INSPECTION OF WHISKY .- An opinion has been received from the Internal Revenue Do-partment, to the effect that the inspection of whisky by a United States inspector does not obvinte the necessity of inspection under the

BOARD OF SURVEYORS,-A stated meeting of the Board of Surveyors was held yester-day. Petitions for sewers in the following named streets were granted:—On Eighth street, between Noble and Green streets; on Outlet street, between Twenty-first and Twenty-second streets; on Pemberton street, from Wallace to Mount Vernon street; on Pairish street, from Ontario to Broad street, and on Ontario street north from Pairish street; on Twentieth street. between Arch and Race streets; on Buckley street, between Fifth and Sixth. The applicastreet, between Fifth and Sixth. The applica-tions for sewers on Walnut street, west of Twen-tieth, and from Thirty-third to Thirty nlnth, were referred to Messrs, Miller, Smedley, Suc-daker, Roberts, Albertson, and Daily, The plans for a revision of the grade on Main street, Manayank, were adopted. Mr. Kneass, the President of the Board, called attention to the necessity of having a fire-proof building for the documents of the Department. Adjourned.

ELECTION OFFICERS IN TROUBLE. -Andrew Doebler, Election Judge of the Second Precinct, Second Ward, and Joseph H. Wright, an inspector in the same division, were before Recorder Eneu yesterday on the charge of mis-demensor, in wilfully refusing the vote of one John O'Byrne at the late election. The testi-mony was to the effect that the prosecutor pre-sented himself at the election poll on Tuesday ast, and desired to vote; that as soon as the ballot was handed in somebody said, "Chal-lenged on the ground of desertion," whereupon he was told to get a person to vouch for him that he was not a deserter. In consequence o the action of the Judge and the Inspector. O'Byrne sava he was deprived of his vote. The election officers were held for trial.

LAYING THE CORNER-STONE OF A MO-BAVIAN CHURCH.—The corner-stone of the Second Moravian Church, Franklin and Thomp-son streets, was laid last Sunday afternoon, in the pre-ence of a large number of persons. The the pre-cice of a large number of persons. The ceremonies were solemn and interesting, as conducted by Bishops Bigler and Shuitz. Revs. G. D. Carrow, D. D., E. W. Hutter, J. W. Ciax ton, J. H. Kummer, and A. Manship, participated in the services. The church promises to be quite an ornament to the neighborhood. The tent and porth side will be at white slope. front and north side will be of white stone with brown stone. Rev. H. S. Hoffman is the paster of the congregation, which at present worships in the hall, at Sixth street and Girard

RECEIPTS FROM TAXES .- The receipts from taxes on the doplicate for 1866 have been quite large, but there is still a large sum to be collected, upon which a penalty of three per cent, will be added on and after December next. The receipts during the year up to the 1st of September, inclusive, at which time discount ceased, amounted to \$4,659,904 89, on which a discount was allowed of \$27,062 97. leaving the net receipts \$4,242.822.82. ceipts from the 1st of September to the 12th of October, inclusive, were \$111,088.35, upon which was received a penalty of \$1253.81, making a net tax of \$112,342.76; making the total net receipts \$4,355,165*98.

RECEPTION OF THE VISITING FIREMEN. -The Rolin Fire Company, No. 2, of Elizabeth City, arrived in this city yesterday afternoon, and were met at the Kensington Depot by the following fire companies of this city:—Good Intent Engine, Neptune and United States Hose Companies, Giobe Fire Company, William Penn Hose, Kensington Hose, Mechanic Engine, Pennsylvania and Taylor Hose Companies. The visiting company had with them their beautiful steamer, and occupied a position in line immediately behind the Kensington Hose Company, whose guests they are while they remain in the city. The members of the Rolla Fire Company were dressed in dark pants and red shirts.

LIBERAL BEOLESTS .- The will of Edward Perot was admitted to propose yesterday. It contains the following bequests:—The Orphan Society of Philadeiphia, at Eighteenth and Cherry streets, \$2000; Pennsylvania Hospital, \$1600; The Athenaum of Philadelphia, \$1000; Hospital of the Protestant Episcopal Church \$1000; to Christ Church, Second street, above Market, \$1000.

CITY ORDINANCES.

RESOLUTION
Of Request to the Sayor of the City of Philadelphia.

Whereas, The Philadelphia, Germantown, and Norristown Rairrond Company run their steam-cars through very populous parts of Philadelphia at the same grade of the streets crossing said railroad, very few of which have diagment to give notice of the approach of the trains, the neglect of which is daily endangering the lives of our citizens, and should be at once remedied by having flagment placed at all the prominent crossings, therefore is it.

it condved, By the Select and Common Councils of Resolved, By the Select and Common Councils of the Lity of Philadelphia, That the Mayor of the said city is hereby requested to take the necessary measures to compel the said rairond company to have flasmen placed at such crossings as in his indement are necessary for the projection of the hives of our citizens.

WILLIAM S. STOKLEY,
President of Common Council.
