

THE CHAMPION PRESS

FOR PRESSING COTTON, WOOL, HAY, STRAW, PEAT, TOBACCO, OIL FROM FISH, BENDING OR CURVING IRON, PRESSING WOOD FOR PAPER MANUFACTURE, FACTORIES, And for Pressing and Compressing Any and Every Material.

Worked by Hand, Horse, Water, or Steam Power. Pressure with three-horse power is TWENTY-FIVE TONS to the square inch.

The pressure required is easily regulated. It acts promptly, is simple in its construction, does not get out of order, and requires less power to accomplish the same result than any other Press. From these facts it is named and claimed.

The Champion Press of the World!

For the Advantages it Possesses Over all other Presses,

READ THE RECOMMENDATIONS

Which are from the Highest Authorities, Given for the Value of the Invention, and for the Advancement of Science in Machinery.

OFFICE OF THE NOVELTY IRON WORKS, NEW YORK, September 22, 1866.

A. BALDWIN, Esq. Dear Sir—Having examined the model of your Cotton Press, I have favorably impressed with the design, as combining great power with the most simple construction of parts, so that there is the least chance for breakdown. Also, the mode of applying the power to produce the ground effect by means of the crown wheel and screw is a combination of great simplicity and fine mechanical arrangement to produce the result with the least expenditure of power. Hoping you will have success with it, I remain, yours truly, A. & F. BALDWIN & CO., Proprietors.

PROGRESS MACHINE WORKS, NEW YORK, September 22, 1866.

A. BALDWIN, Esq. Dear Sir—We agree entirely with the opinion expressed by the gentleman of the "Novelty Iron Works," as regards the simplicity, strength and power of your Cotton Press. Respectfully yours, A. & F. BALDWIN & CO., Proprietors.

WEST POINT FOUNDRY, COLD SPRING, PUTNAM COUNTY, N. Y. We have seen Mr. Baldwin's Patent Press. We consider it one of the best arranged machines for the purpose, and have little doubt that it will be a success in the machinery for pressing Cotton and other materials. Respectfully yours, EAGLE STEAM ENGINE WORKS, NEW YORK, September 27, 1866.

Mr. BALDWIN, I have examined your Press, and believe it to be the best I have ever seen, and that it will be generally used by the public, when it is seen. It is what has long been wanted—a simple, powerful, and durable Press. WILLIAM MCKENZIE, Proprietor.

DRY DOCK IRON WORKS, NEW YORK, September 25, 1866.

A. BALDWIN, Esq. Dear Sir—We have examined your Champion Press, and have no objection in saying that it is a great power, combined with a simple type of construction, and is without limitation, being capable of exerting, by the arrangement of its parts, to any extent that may be required. WILKINS CORP., Proprietors.

GLOBE IRON WORKS, NEW YORK, September 27, 1866.

Dear Sir—We have seen your Press in operation, and find it to be a machine of great strength and power, as well as simple in its construction. We consider it a valuable machine, and will not fail to give satisfaction to all who may use it. Very respectfully yours, M. M. WATTS & CO., Proprietors.

PHOENIX IRON WORKS, NEW YORK, September 28, 1866.

A. BALDWIN, Esq. Dear Sir—We have examined your Press in operation, and we must say that we consider it the best of the kind that we have seen, and have no doubts that it will become a useful and profitable machine to any one requiring its use, and also to your benefit. MURPHY, McCLELLY & WARDEN, Constructing Engineers and Manufacturers of Lard and Marine Engines and Boilers.

CROTON AQUEDUCT DEPARTMENT, NEW YORK, October 10, 1866.

Gentlemen—In reply to your request, calculated the power of your Press and examined the mode of action. Enclosed please find drawings showing seven different positions of the press-roller, and also a sketch of the force exerted by the machine at each of these positions of its stroke. I have considered the force of a horse power applied at the crown wheel to be the motive power, and although the mechanical advantages obtained from the piston and pulley in the machine I have examined will increase its power, I think that the machine proper begins at the crown wheel. In order to find the power you have only to multiply the figures in the table by the power of the engine. I cannot but add that your Press is an ingenious device, combining an astonishing power with beautiful simplicity—circumstances which do away with all habits of wear and repair. When the lower link approaches its lowest point the mechanical advantage increases. At six inches from the end of the stroke the pressure upon one horse power is 10 tons, and finally, when both links come into the same place, it becomes infinite. There is no limit to the press exerted, except that fixed by the resistance of the water, etc. E. A. FEETZER, C. E., Examining Engineer to Croton Aqueduct Department. Drawings on Exhibition at No. 694 Broadway.

THE PRICES OF PRESSES RANGE FROM \$300 TO \$5000. The Scientific and the public are respectfully invited to call and examine. H. T. HELMBOLD, President Champion Press Company, No. 994 BROADWAY, NEW YORK. To whom all orders should be addressed.

JAMES HALBERTADT, Secretary.

INDIANA SOLDIERS' CEMETERY.

Reinterment of Bodies at Indianapolis.—Indianapolis, October 19.—The removal of soldiers from the old graveyard to Crown Hill Cemetery began to-day. About 700 are to be removed. The first was removed with an imposing military display by the United States troops and the "Grand Army of the Republic." The Governor, officers of State, and leading citizens were in the procession. The new grounds are to be beautifully laid out and ornamented.

Fall of the Leaf.—The season of the fall of the leaf has come with all its attendant and salutary teachings. Who can shut his heart against its lesson? Who can see the frost-withered leaf driven by the fatal winds, is not reminded that such is human life? Even as a leaf when the frost has dried up its sap, and its stem clings no more to the parent tree, so is our life. It may be green to-day and float gaily upon the summer breeze, but the frosts of death are gnawing at its stem, and we know not if it shall wave there to-morrow, or be driven away by the wintry blast to eternity. Happy are we, if nature preaches not to us in vain, in this her solemn day.

Extensive Failure at Cohoes, N. Y.—Cohoes, N. Y., October 19.—An extensive knitting mill at Cohoes, N. Y., suspended. The concern, also manufactured axes. Heavy consignments of goods are now in New York, advances upon which are said to greatly exceed the value of the material. The liabilities are known to exceed \$200,000, and may possibly reach nearly \$1,000,000. Judgments have been obtained to nearly \$100,000. It is not believed that the firm will be able to weather the storm and resume operations.

The Pacific Railroad Excursionists.—Chicago, October 19.—The Union Pacific Railroad party reached Quincy last night. They received a complimentary dinner at Galoisburg from the officers of the Chicago, Burlington, and Quincy Railroad. The party now numbers over 200 persons.

The National Finances.—Washington, October 19.—The following are reported the receipts of customs from October 6 to 13:—New York, \$2,547,644.55; Boston, \$2,151,900; Philadelphia, 1,735,935; Baltimore, \$5,128.61. Total, \$8,664,869.79.

OHIO.

Ex-Minister Edouard Thouvenel of France.—The cable dispatches announce the death, at Paris, yesterday, October 19, of M. Edouard Antoine Thouvenel, the predecessor of Drouyn de Lhuys in the office of French Minister of Foreign Affairs. We published about a month ago the announcement of the death of his wife, the sister of the Emperor, and on his return to France published his "Impressions de Voyage" in some papers on Hungary and Wallachia, which appeared in the *Revue des Deux Mondes*. These papers first brought him into notice, and determined his future career as a diplomatist. Shortly after his death the French Foreign Office, and signalled himself by denouncing the encroachments of Russia in Asia Minor, and his disastrous consequences to the balance of power in Europe occurring from the treaty concluded between the Porte and Russia in 1839. In 1844 he had an opportunity of studying in the localities themselves the question of the occupancy of the attention of European diplomatists, and it may be truly asserted that the light which he shed on the situation and interests of the Principalities exercised a decided influence on the policy of France. His prominent part in determining the destiny of those interesting countries. M. Thouvenel went afterwards to Brussels as attaché under the French Ambassador, M. de Rostand. In the month of September, 1845, he became Secretary of the French Embassy at Athens. He was afterwards appointed Charge d'Affaires. In the month of August, 1848, he became Minister Plenipotentiary at Athens. At a later period M. Thouvenel was sent to London as French Ambassador, and was recalled from this post to take the political direction in foreign affairs, in which he gave proof of extensive knowledge and of remarkable tact. When M. Drouyn de Lhuys was summoned to the Conference which was held at Vienna, April, 1855, M. Thouvenel was, during his absence, intrusted with the entire management of the Foreign Office. In July, 1855, on the return of M. Drouyn de Lhuys from Vienna, Thouvenel was appointed Ambassador to Constantinople. He was appointed Minister of Foreign Affairs on January 5, 1860, succeeding Count Walewski, who was retired on account of a disagreement with the Emperor on the Italian question. Thouvenel did not fully agree with the Emperor on his Italian policy, and he was finally retired on account of the differences on the Roman question, and was succeeded October 15, 1862, by M. Drouyn de Lhuys. Since that time M. Thouvenel has not held public office. He died at his time, when the Eastern question is again becoming important, will doubtless be looked upon as a misfortune, for he was considered to be intimately acquainted with the subject.

THE INDIAN WAR.

Depredations on the Plains—General Sherman's Heavy Troops Westward—Massacres in Colorado.

LEAVENWORTH, October 19.—The *Topeka Record* says:—

"Colonel Veal came from the West last night. He reports that the Indians are so troublesome on the Plains that he dare not risk his train, and that he has taken the family of Gen. Crane, the sutler at Fort Larned, came in yesterday also. They left on account of danger. General Sherman was at Fort Riley yesterday, and will pass out to-day. He is hurrying troops westward, notices the General and Mr. Crane's family left Fort Larned, news has been brought that the Indians had robbed the sutler's store there. We also learn that the overland station at Chalk Bluffs has been burned. Fort Larned is probably one with the sutler's store."

The *Denver News* says that there is a great alarm, and the people approach the most serious consequences from this outbreak. The following letters are published:—

"We have taken the new *Rocky Mountain News*. The Indian excitement continues. It appears that Colonel Alexander and the citizens, a few days ago, drove them into the mountains, but yesterday they returned in bloody deeds of murder, stealing and shooting down cattle. The latter amusement they are indulging in very freely. Settlers are coming to this place, and others are fortifying at home. Up to this time three men have been killed, and several are missing. If we don't get help immediately no one can foresee the end. All the fine crops of this valley will fall into their hands with the stock, and many are the victims who will fall to their tender mercies."

BADITO, Upper Huertaria, October 8.—Major D. C. Oakes.—Dear Sir—I find myself here surrounded by Indians. They are killing people and taking horses. They had a fight with the soldiers of the Huertaria, and it came to the quartermasters and took the stock from there. Then they came to the Huertaria and killed two men, and took all the horses for twelve miles up the creek. The latest report is that they have taken the stock from San Blackins and killed one man. The soldiers and citizens are on their trail but will not overtake them.

The *Veys* predicts a long and serious Indian war, and notices the Indians who have been displayed for a year past to obtain the arms and a munition, at most extravagant rates. By this means the Indians have secured quite a stock of the reserved arms at the recent distribution of the ammunition in Middle Park, Colorado, one of their chiefs boldly advocated driving the whites out of the mountains. The Indians, ignoring a treaty by which they ceded to the Government the lands of Middle Park, insisted on the terms and conditions on which the whites might occupy the Park, in the same way as if the land still belonged to them. The negotiating party on our side did not allow this. In this treaty the Indians stipulated that the whites might build a road through the Park; but no settlement except the necessary station-house on the road would be allowed.

FROM BALTIMORE TO-DAY.

The Trouble Between the Commissioners and Governor Swann—An Injunction Apprehended.

[SPECIAL DISPATCH TO THE EVENING TELEGRAPH.]

BALTIMORE, October 20.—The "Boys in Blue" held large meetings last night, and hold others to-night, to organize and sustain the loyal Police Commissioners against Governor Swann and his conservative allies at all hazards. General Dennison and Colonel Woolley are at the head of them. If Swann removes the Commissioners, a force insurrection is anticipated and terrible bloodshed.

Russian Statistics.—The St. Petersburg *Northern Post* contains the following statistics:—At the beginning of the sugar manufacturing season, 1864-65, there were 336 manufactories of raw sugar in Russia. During the previous season are known to exceed \$5,000, and may possibly reach nearly \$1,000,000. Judgments have been obtained to nearly \$100,000. It is not believed that the firm will be able to weather the storm and resume operations.

The Pacific Railroad Excursionists.—Chicago, October 19.—The Union Pacific Railroad party reached Quincy last night. They received a complimentary dinner at Galoisburg from the officers of the Chicago, Burlington, and Quincy Railroad. The party now numbers over 200 persons.

The National Finances.—Washington, October 19.—The following are reported the receipts of customs from October 6 to 13:—New York, \$2,547,644.55; Boston, \$2,151,900; Philadelphia, 1,735,935; Baltimore, \$5,128.61. Total, \$8,664,869.79.

VERMONT.

Withdrawal of the Hon. Fortus Baxter.—Burlington, Vt., October 19.—The Hon. Fortus Baxter has retired from the Congressional caucus in this, the Third District, in favor of the Hon. Worthington C. Smith, of St. Albans, who will be nominated for Congress. The Delegate Convention to be held at Hyde Park on Thursday next.

The election takes place on Tuesday, November 6. Mr. Smith is a brother of ex-governor Smith, Treasurer of the Vermont and Canada Railroad, a leading member of the State Senate in 1864 and 1865, and an able and influential Republican.

Important Suffrage Resolutions in the Legislature.

The following resolutions have been referred to the Judiciary Committee of the Vermont Legislature:—

Resolved, by the Senate and House of Representatives, That the right to vote be given to the white male citizens of the State of Vermont, without restriction of color.

Resolved, That it is the duty of Congress to pass laws giving this right in all places, where it can be done constitutionally.

Resolved, That we respectfully request our Senators and Representatives in Congress to use their influence for the passage of a law giving equal and impartial suffrage in the District of Columbia, as early as possible at the next session of Congress.

A New Steamship Line.

WASHINGTON, October 19.—A large part of the necessary capital has already been subscribed in this city for the establishment of a new steamship line between Washington and New York. The company has been chartered by the Legislature of New York. There is a fine prospect of an early consummation of this plan for the cheap and regular transportation of supplies and merchandise to this district.
