On being searched his power of speech suddenly came back to him, and he indulged himself in a number of caths that, for atrocity, would have done credit to the "Black Avenger of the Spanish Main." A CENEUS OF THE CHILDREN OF THE CITY IS about being taken by the police force, under the succeivision of the Lieutenants of the different districts. Edward Ship-pen, Esq., President of the Board of School Control ers, this morning visited the Mayor's office to deliver the necessary blanks, He addressed the Lleutenants who were there assembled upon the character of the work required of them, urging upon them accucasentials of the matter. The blanks provide for the separate enumeration of the boys and girls in three different classes—the first embracing those between six and twelve years of age; the second, those between twelve and different the latter and first embracing those between the second states. years of age; the second, those between twelve and fitteen; and the third, those between fifteen and eighteen. Each class is again subdivided, there being a separate enumeration of those attending public schools, those attending private schools, those attending private schools, those attending church schools, those engaged in some regular employment, and those who are neither at school nor employed. It is to be hoped that the answers given by parents will, in all cases, be perfectly true, so that these statistics when collected true, so that these statistics, when collected, will be of some practical value.

DEPRESSION IN THE WOOLLEN TRADE.— Under the pressure of the times prices are being flattened down to a reasonable degree of teflattened down to a reasonable degree of tenuity. There appears to be a general reduction in the prices of all kinds of dry goods, and the manufacturers are talking very dispiritedly about the ruinously low rate of profits they make on their goods. By consulting the prices of Messrs. J. C. Strawbridge & Co., at the northwest corner of Eighth and Market streets, one is surprised in the great reduction there has been made in the prices of cloths, cassimeres, and flannels, and in linens and callcoes, and all setton goods. We can get one third more for sotton goods. We can get one-third more for the same money 'han we could six months ago, but there is a prospect that prices will advance

Over seven thousand policies have been issued, and their accumupolicies have been issued, and their accumulated funds are quadruple those amassed by any other company at so early a period of their operations. Its system of non-forfeiture of policies in case of the discontinuance of the payment of premiums, which originated with its Vice-President, B.S.
