MEDICAL ELECTRICITY Latest and Most Important Discoveries in the Treatment of Chronic

Diseases. DR. S. W. BECKWITH'S

ELECTRICAL INSTITUTE, No. 1220 WALNUT Street.

During our investigations in the treatment of disease in its various forms by the agency of electricity. we have obtained very many valuable and startling facts, which, added to the previous though limited information possessed by other and less fortunate operators, place us beyond all previous knowledge of this mysterious agent. During the course of our pracdee we have treated and cured, through the knowledge thus gained, many thousands, and by means of our new discoveries have established ourselves as the most successful Medical Electricians in this country or Europe.

Electrical investigation has proved that the human body acts on the principle of the galvanic battery. The brain, mucous and serous memoranes, the skin tissues, and fluids, constitute the negative and positive forces, and every action, whether mental or physical, is the result of these antagonistic forces. Digestion, respiration, circulation, secretion, and excretion are due solely to electrical influence. There is a polar action established throughout the nervous system which connects with every part of the body, establishng and preserving a proper balance of the electrical element which constitutes health, and a disturbance of which causes disease. There are strictly but two conditions of disease—one of inflammation or posi-tive; the other, weak, debilitated, negative—and as electricity contains these two conditions in the action of the positive and negative currents, all we have to do is to neutralize the disease and restore proper healthy action.

Among the chronic diseases in which electricity has been and is daily being, by our agency, of the greatest utility, a cure being rapidly effected after the failure utility, a cure being rapidly effected after the failure of all other means, arc.—

1. Epilepsy, Chorea, or St. Vitus' Dance, Paralysis (Hemplegia), Neuraigia, Hysteria, Nervousness, Palpitation of the Heart, Locklaw, etc.

2. Bore Throat, Dyspepsia, Diarrhoa, Dysentery, Obstinate Constipation, Hemorrholds, or Biles, Bilious, Flatulent, and Painter's Colic, and all affections of the Liver and Spieen.

3. Catarth, Cough, Induenza, Asthma when not caused by organic diseases of the hearth, Bonchitis, Pieurisy, Pieurodynia, or Rheumatism of the Chest, Consumption in the early stages.

4. Gravel, Diabetes, and Kidney Compilants, S. Rheumatism, Gout, Lumbago, Still Neck, nal Curvature, htp Diseases, Cancers, Tumors (those last name a always cured without pain, or plasters in any form).

named always cured without pain, or present a form).

6. Uterus Complaints, involving a mal-position, a Prolapsus, Antroversion, Retroversion, Inflammation, Uteration, and various other affections.

For information desired upon other diseases, application may be made at the office, or by letter.

Mrs. BECKWITH has entire charge of the Ladies' Department, and all delicacy will be used towards those who entrost themselves to her care. In female diseases, it is universally successful in her hands.
