## THE WAR IN CRETE.

BATTLE WITH THE TURKS AT HERACLEUM-FULL ACCOUNT BY AN EYE-WITNESS. etal Correspondence London Daity News

<text><text><text><text>

<text><text><text> Here they must panse, as we can well discern, for the guns and cavalry will bar their progress. So it iurus out in a very few minutes. There are write putts of smoke, and there is a whizzing of shells from the Turkish reserve. Then some horsemen move quickly forward, and some Egyptian infantry in white uniforms come charging on towards Mousoros. The Christians fail back before these new assaliants, though not without a murderoos firs to protect their retreat. The Egyptians charge resolutively on, and there is again a discharge from our side of the valley. Yielding step by step. Koroneon and Korakas move slowly out of reach. No bayonet charge can last all night, and when the enemy has lost his breath and our men have spent their ammantion the buttle is over. I must add that the Turks returned to Heracleum without any further attempt to explore the mountains.

Checks for the Union hand, due that their notes were printed in London. He had examined the notes in evidence, and found them to be forged. The grinting note was engraved by a much more elaborate process than the forged enta.
Jacob Perkins Bacon deposed that his firm engraved the notes of the Union Bank, and that the forget in the forget entails of the Union Bank, and that the inperfect septembers, the engraving of the view diverses. They were certainly not prevent is the set inperfect, especiality in the should the view diverses. They were certainly not prevent is the set inperfect, especiality in the should be under the band of thirty-seven, the engraving of the view diverses. They were certainly not prevent is the same is these he had innutactured. For the hand is the other diverses were formed and should the other of the forged hotes and interfect, especiality in the should read of that the signatures were formed and about twenty forged hotes were found and should for one of the search of November, explicitly the transformed of the the state of November, explicitly the search for Greatrex and how they or hotes were found and about the other of the search for diverses. About 150 his search for Greatrex, when he traced to November, expliting a note were found and shout the other of the prevent of the prevent formed and shout the other of the search for diverses. And a prevended there on the first of November, expliting a note which were out in the same statemer with formed in their backs, including the backs returned from Abordeen, which were out in the same statemer with the searce statemer with the searce statement is the search and induces the search are statement in the same search are stated that he was thirty-eight years of age their backs. He found a felt hat, a purse, a pair of boots, and about the searce statement with the searce statement from Abordeen, which were the futures where the manufacture to should be asspected from having been asond that the was thirty-eight years of age. The fou

had been made with Greatrex to join together in the manufacture. Thomas Grimshaw said he was thirty-six years of age, and has no fixed place of residence. He admitted that the notes were manufactured on the premises of Greatrex, and that he had a share in the work. There was very little exclipatory evidence. On Saturday the Court resumed, when the Solicitor-General (Mr. Miller) addressed the jury for the Crown, and Mr. Scott and ar. McLean for the prisoners. The Lord Justfee Clerk then charged the jury, who, after an absence of thirty-live minutes, brought in a verdict of guilty on ten of the charges, including the first, the other charges having either been withdrawn or not insisted on.

or not insisted on. The prisoner Greatrex was sentenced to twenty years, and the Grimshaws to infect years' penal

servitude. The court was quite crowded throughout the trial. The wife and child of Greatrex were present through-

ut the case.

The prisoner Greatrex was, up to a recent period, a regular preacher on Sunday nights on Glasgow Green, and it is said he preached on the Green on the morn-ing of Fritchard s execution,

## EXPLOSION IN A FOUNDRY. A SHOWER OF MOLTEN IRON.

From the Louisville Courier, May 23.

Yesterday morning, at about 8:30 o'clock, a terrible explosion was heard in Dennis Long's foundry, on Ninth street, near the river, which farred the glass out of windows within a square

FIRE AND BURGLAR PROOF SAFES MORE ABOUT LILLIE'S CHILLED-IRON SAFES ALL STATISTICS & ALL IMPORTANT FACTS WHICH THE PEOPLE'SHOULD MAKE A NOTE OF." FACT L-LILLIE'S CHILLED-IRON SAFES FACT L-LILLET'S CHILLED-BOX SAFES have been largely introduced for the isst twelve years, and sold to theme having the largest amount of varuables, as the best and most thoroughly Burgiar-proof Safe; and, up to the last three years, it has been an one to hear of one of Lille's Safer inving been robbed by bargiars, as to see or hear of a white blick kbird or a white elephant. bla kbird or a while elephant. Fact II.-It is notorious that the profession of the burgher has advanced at a raind pace within the last eight years, and what was thoroughly burgher-proof then is not so now, which accounts for the fact that within the last three years very few of Lillic's Sales have been robbed, and the secret auonymous circulars distributed by other sale-makers lat-terly, showing a very few cases only, is the strongest evidence that b 1 a very simal number have been robbed to this time, notwithstanding the large num-ber in use, and the amount at stake if successful. FACT HI,-There are two, and only two, general and leading principles upon which all burglar-proof safes are constructed. The one is pourned laud from between and around bais of wrought iren, hard-end atricel, or any proper combination of metals. This principle is adpied by Litilie, in the Chilled-from Safe, and covered and controlled by his letters patent. patent. patient. *The other* is made up of layers of plates, of different metals, held together us boils or rivein, or both. To this principle there are various collections.—The cost is double. The wrought iron plates, which are the strength of the sale, are outside, and are operated upon by the whole catalogue of burgins' fools. The builts or rivels are easily forced by suitable tools, with or without powder, and cannot be sustained. *The former principle*, adopted by Little, avoids all these objections, can be made any fullokness, and withstand any amount of resistance required; avoids the rivels, bolts, etc., has no wrought iron outside to be operated upon by burgins' implements.

the rivels, bolts, etc.; has no wrought iron outside to be overated upon by burgiars' implements. TACE IV.—Mr. Luile, the Patentee, so soon as he learned that it was possible with the modern improved tools for burglars to grind through chilled income that it was possible with the modern improved tools for burglars to grind through chilled income that it was possible with the modern improved tools for burglars to grind through chilled income that it was possible with the modern improved tools for burglars to grind through chilled income that it was possible with the modern improved tools for burglars to grind through chilled income that it is entirely proof against the burglar's drill, or any other of his tools, even the wedge, was ranied to stand the hardest test practicable for any burglar to make. As a rooof of his success, the following certificate is now offered from the Novelty works, New York:— Mrew York: Isth December, 1896. Messer, Levis Lalie & some offered from the Novelty works, New York:— The Works isth December, 1896. Messer, Levis Lalie & some collected the sample of Chiled Iron you furnished us to the most severe tests as regards drilling through it) that we could bring to been upon it, and without success. The use of a large number of drills, and the expenditure of much power, with drys of time. May we think it impossible for a burglar, with his the use of a large number of drills, and the expenditure of much power, with drys of time. May we think it impossible for a burglar, with his time and power, to penetrate it at all. Yours truly. May the Modern Stores and the superintendent. May and power, with drys of the most for the most for the most for the most and power, the moder is for a burglar. The most burgle the substantially the superintendent is the following extensive it on manufacturers in the following extensive it on manufacturers in the power.

same. And their principal fron Workers so certify: Messis. Merrick & Son, Southwark Foundry, Phila-

delphia. The Finkley & Williams Works, Boston, Mass. The Union Foundry and the Northwestern Foun-dry, Chicago, Ill.

dry, Chicago, III. FACT V.—The preposition made the public hereto-fore is now reneweu: I will furnish Sates or Vanit Doors, of same size and capacity of other best makers, and at one-third less price; and the same may be tested when fuished, and I will furnish the man to test the work of any other maker, and he shall fur-nish the man to test my work; and the party so order-sistance.in any way or manner practicable for a burglar to work. to work.

FACT VI.-I would now say to any of the owners of Lillie's Safes, that, in view of the preceding facts, if they feel the need of additional security. I will ex-change with them, on lar terms, giving them all the late improvements, and the increased security, which is claumed to be beyond the reach of Burghaw, until some new system shall be developed in the working of Iron, which would now seem hardly possible.

FACT VIL-It is true that the Sheet-Iron or common Fate, as now made, under ordinary circumstances (and when not crushed by the full of walls or timbers) usually saves the written matter, but if the fire is se-vere it has to be copied, for the ink will scon fade out; besides, the safe is twisted up and useless.

It is equally true that the Chilled-iron Safe saves the written matter in a perfect state, that it does not fade out or require copying, and that the safe itself is ready for jurther use. Any number of trials in fires, certified to, prove these facts, and if any of the fires, certified to, prove these facts, and if any of the safe vanders who are distributing secret, anonymous circulars to mjure the reputation of LILLIE'S SAFE, are not satisfied with these statements, they can have the opportunity of testing by fire one of their own Safes with LILLIE'S, on equal terms, whenever they so decide. Safes with LILLIE'S, on equal terms, whenever they so decide. Fact YIII.-In answer to the story circulated by the barlies, that Lillie's Safe had gone up, and had rimed Lillie, etc. I would say that at no time in the hat two years could Lillie & Son half supply the demand for Safes, and were under the necessity of orming a large stock company, with a very large could be been be demand; and Mr. Lewis Lillie.Sr. to be been were the demand and Mr. Lewis Lillie.Sr. on the Delaware, he Petnsylvinia, near Lesston, and is the bargest Safe Works probably in examence, and builted-from Vanils, etc. In conclusion, I beg to call the attention of my presentee, and to say that I am very think the for hat avon, sund that I am prepared 's intraine Life PROOF SAFES, VAULT DOORS, CHILLED IRON volues, and to be the best and cheeses in a provide and the best had the substantion of any provides and the best had best and the substantion of second-hand fire Proofs, of the best known makers, builted and the store the best known makers of second-hand fire proofs, of the best known makers builted and fire proofs, of the best known makers builted and fire proofs, of the best known makers of second-hand fire proofs, of the best known makers builted and fire proofs, of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers builted fire the store of the best known makers bu M.
