THE ESTATE OF SOLONON INGRAHAM .- MANY. THE ESTATE OF SOLONON INGRAHAM.—Many, many years ago, one Joseph Wilson, of York-shire, England, was the owner of a farm of six hundred acres, on which the greater portion of the thriving manufacturing town of Leeds now stands. The daughter and sole heir of Joseph Wilson married a Mr. Cornell, and removed to Boston, Mass., before the Revolution, thereby greatly displeasing her father. The latter, on his denth, left a will, by the terms of which his estate was to accumulate until the fifth genera-tion of his descendants came into being, when it was to revert to them. Since that time the it was to revert to them. Since that time the hand has been steadily increasing in value, antil it has at length reached an almost fabulous sum. It was rented out on one-hundred year leases, the manufacturing establianments with which it is now covered paying the ground rents to putalive agents of the estate. PROCLAMATION FROM MAXIMILIAN! To my friends in Mexico and throughout the world --

The Empire of the Montezumas, in my person, has perished. I have written to Escobedo' my captor, that if any are to be shot I may be the first. I also sent to him my Sword, my Photograph Album, and a Box of Paper Collars, as keepsakes and remembrances of my faith fulness to the cause I espoused. I came here backed up by the promises of that renegade London Chartist Special Policeman, but now Emperor of the French, Napoleon III. The world will hold him responsible for my death, and himself will be clothed in everlasting infamy, while I have hardly any clothes to my back. The Box I ordered of Charles Stokes & Co., the Clothiers, under the Continental Hotel, Philadelphia, to be sent to My Palace in the City of Mexico, will never reach me. Countrymen, I am gone up.

> Long live the Republic! MAXIMILIAN.

A NATIONAL MEDICINE.-One can hardly pick up a newspaper or turn a street corner nowadays that he does not find, staring him in the face, the announcement that Professor So and so has just discovered a medicine which is a panacea for all the lils that flesh is or may be heir to. These "wonderful" discoveries usually have an existence of a few months, then disappear from public notice. The reason of their sudden extinguishment is apparent. They were humbugs. At the outset all medicinal preparations have an equal chance for success, as all are equally unknown; but the chaff is soon winnowed from the grain by the practical test which an unprejudiced public applies to all things. There are but few preparations of medicine which have withstood the impartial judgment of the people for any length of time. One of the few which we have now in mind, and which has been a long time familiar to nearly every household in the land, is the celebrated HOSTETTER'S STOMACH BITTERS. Their almost universal sale and use, and their emphatic endorsement from all portions of the country, compel the admission that they must be a specific for the allments for which they are recommended. Letters before us attest their efficacy in diseases of the throat, bowels, and liver. In that truly terrible complaint, dyspepsia, they are regarded as a sure cure. In Pittsburg, where these Bitters are manufactured, their sale for home use is immense. This fact alone speaks volumes in their favor .-Extracts from the Muscatine Courier, Iowa, February 7, 1807.

It is no inglorious page which the results of this the resolve of the Hungarian nation have interca-lates in the book of history. And although treachery, aided by the force of unrighteotics arms wielded by a foreign power, succeeded in shaking our nation's confidence in likels, and through that very underm a-ing of her self-trust, in paralyzing her arm, yet the world greeted with admiration the chivairous cour-age evince din the defense of her rights, and naid a tribute of sympathy to the undeserved shipwreck; and the gigantic manifestation of our nation's vitality (which a little more addurance would have enabled to tribumph) bore at least this fruit—that as well the powers in their politics as the peoples in their feeling, began to estimate the Hungarian nation, even after its subjugation, as one of those consistent, vigorous factors of which account can and must be taken in the progress of European history, and to which the logic of history assigns a future, if it (the nation) does not with suicidal hand expunge itself from the list of independent factors. The accomplishment of this, my friend, was a great benefit, to resign which would be a sin. And the nation which was capable, under such circumstances, or attaining such a position, deserves at least that its leaders in the work of defending its independence and realizing its rights should not doub its strength. Now I speak, and speak to thee, and publicly, for I see, and see with the eye of a judgment tranquil-lized by the weight of years and sufferings, that our nation is being thrust down the silppery declivity of Right-Renunciation into danger, into worse than danger-into death. The present arrangement, Kossuth declares, is identical with the *ultimatum* presented by Jellachich when he invaded Hungary in 1818, which was refused by the Hungarian Ministry in which at that time Deak himself and the present Minister of Worship, Baron Eotvos, were the colleagues of Kossuth.
