FIRE AND BURGLAR PROOF SAFES MORE ABOUT

LILLIE'S CHILLED-IRON SAFES

IMPORTANT FACTS

WHICH THE PEOPLE SHOULD

"MAKE A NOTE OF. FACT L.-LILLIE'S CHILLED-IRON SAFES have been largely introduced for the last twelve years, and sold to those having the largest amount of valuables, as the best and nost thoroughly Burglar-Proof Safe; and, up to the last three years, it has been as rare to hear of one of Lillie's Safes having been robbed by burglarn, as to see or hear of a white blackbird or a white elephant.

FACT IL-It is notorious that the profession of the Fact II.—It is notorious that the profession of the burgiar has advanced at a racid pace within the last eight years, and what was thoroughly burgiar-proof then is not so now, which accounts for the fact that within the last three years very few of Lillie's Baies have been robbed, and the scoret anonymous circulars distributed by other safe-makers latterly, showing a very few cases only, is the strongest evidence that but a very small number have been robbed to this time, notwithstanding the large number in use, and the amount at stake it successful.

FACT III .- There are two, and only two, general and leading princidles upon which all burgiar-proof safes are constructed. The one is pouring liquid iron between and around bars of wrought iren, hardened street, or any proper combination of metals This principle is adpted by Lillie, in the Chilled Iron Safe, and covered and controlled by his letter

metals, held together by bolts or rivers, or both. To this principle there are various objections:—The cost is double. The wrought iron plates, which are the strength of the safe, are outside, and are operated upon by the whole cathlogue of burgiars' tools. The hoits or rivets are easily forced by suitable tools, with or without powder, and cannot be sustained. The former principle, adopted by Little, avoids all these objections, can be made any thickness, and withstand any amount of resistance required; avoids the rivets, bolts, etc.; has no wrought iron outside to be operated upon by burgiars' implements.

the rivets, bolts, etc.; has no wrought iron outside to be operated upon by burgiars' implements.

Fact IV.—Mr. Liffe, the Patente, so soon as he learned that it was possible with the modern improved tools for burgiars to grind through chilled iron or hardened steel, began experimenting to avoid the difficulty, and after much labor and expense he has perfected a system for chiling iron and combining metals that is entirely proof against the burgiar's drill, or any other of his tools, even the wedge, warranted to stand the hardest test practicable for any burgiar to make. As a proof of his success, the following certificate is now offered from the Novelty Works, New York:—

OFFICE NOVELTY IRON WORKS,

Messrs, Lewis Little & Son:—

Gentlement,—We have subjected the sample of Chiled fron you furnished us to the most severe tests (as vegards drilling through it) that we could bring to bear upon it, and without success.

It is our opinion that it can only be penetrated by the use of a large number of drills, and the expenditure of much power, with days of time.

And we think it impossible for a burgiar, with his time and power, to penetrate it at all.

Yours truly,

ISAAC V. HOLMES, Superintendent,

LYMAN G. HALL, Foreman.

And the following extensive Iron manufacturers in Philadelphia, Boston, and Chicago, after the most thorough tests, find the result to be substantially the same.

And their principal Iron Workers so certify:

same. And their principal Iron Workers so certify: Measrs. Merrick & Son, Southwark Foundry, Phila-

delphia.

The Finkley & Williams Works, Boston, Mass.
The Union Foundry and the Northwestern Foundry, Chicago, Ill.

dry, Chicago, III.

FACT V.—The proposition made the public heretofore is now renewed: I will furnish Sales or Vault
Doors, of same size and capacity of other best makers,
and at one-third less price; and the same may be
tested when finished, and I will furnish the man to
test the work of any other maker, and he shall furnish the man to test my work; and the party so ordertog may accept the work which stands the most resistance, in any wayor manner practicable for a purpler sistance, in any wayor manner practicable for a burgi

Fact VI.—I would now say to any of the owners of Lillie's Safes, that, in view of the preceding facts, if they feel the need of additional ascurity. I will exchange with them, on fair terms, giving them all the late improvements, and the increased security, which is claimed to be beyond the reach of Burglars, until some new system shall be developed in the working of Iron, which would now seem hardly possible.

FACT VIL-It is true that the Sheet-Iron or common gaie, as how made, under ordinary circumstances (and when not crushed by the fall of walls or timbers) usually saves the written matter, but if the fire is severe it has to be copied, for the ink will soon fade out besides, the safe is twisted up and useless.

It is equally true that the Chilled-iron Safe saves the written matter in a perfect state, that it does not fade out or require copying, and that the safe itself is ready for further use. Any number of trials in fires, certified to, prove these facts, and if any of the safe venders who are distributing secret, anonymous circulars to injure the reputation of Lillie's Safe. are not satisfied with these statements, they can have the opportunity of testing by fire one of their own safes with Lillie's, on equal terms, whenever they so decide.

they so decide.

FACT VIII.—In answer to the story circulated by increated parties, that Lallie's Safe had gone up, and had runed Lillie, etc., I would say that at no time in the last two years could Lillie & Son hair supply the demand for Safes, and were under the necessity of the story and the safe of t demand for Siles, and were inder the necessity of forming a large stock company, with a very large capital, to meet the demand; and Mr. Lewis Lillie, Sr., is now the president of that company, which is located on the Delaware, in Pennsylvania, near Easton, and is the largest Safe Works probably in existence, and will be able to supply all demands for Safes, Locks, Chilled-Iron Vaults, etc.

Chilled-Iron Vaulus, etc.

In conclusion, I beg to call the attention of my patrons and friends, and the public, to the facts here presented, and to say that I am very thankful for past ravers, and that I am prepared to furnish LILLIE'S BURGLAR AND FIRE AND BURGLAR PROOF SAFES VAULT DOURS, CHILLED IRON VAULTS and COMBINATION LOCKS, all at short notice, warranted to be the best and cheapest in market. I also keep constantly a large assortment of second-hand Fire Proofs, taken in exchange for Lillie's Burglar Proofs, of the best-known makers, all put in good order, and offered at below usual auction prices.
