THE STEAM FIRE-PROOF SAFE .- Sanborn's patent steam improvement for fire-proof Safes, which is to be tested at the trial in Norristown to-morrow, in a fire, with Marvin's, Herring's, Lillie's, Hassendorfer's, Maiser's, and other Safes, consists of a lining of copper vessels, between the book-case and the walls of the Safe, containing water, ingeniously protected against change or accident. The invention is said to be simple and practical, and has been thoroughly tested in Boston, Providence, Portland, and other places. The inventor claims that a Safe containing his improvement will preserve its papers unimpaired in fire that will utterly destroy the contents of the best Sate without it. Messus, Evans & Watson, of this city, have adopted it for their Sates, and business men will have an opportunity to inquire into its merits, which the trial at Norristown will be likely to test. We learn that the fire will be kindled early in the morning, and the Safes will be opened at 3 o'clock P. M.

Protection of Rebels.

A special despatch from Washington to the New York World says:— The Government has received intelligence that the radicals in Maryland contemplate the inauguration of a scheme at the election on the 18th instant, when the new State Convention is to be submitted for ratification, which will surely lead to riot and bloodshed. Under the assumption that a colored man has as much right to vote in Maryland as he has in Virgi-nia, the more desperate radical leaders in the

nia, the more desperate radical leaders in the former State are urging the colored men to present themselves at the polls and demand the right to vote on the new Constitution.

The so-called Border State Convention which assembled in Baitimore to-day, evidently means mischief in that direction. Prominent conservative citizens of the State have been here to-day, among them ex-Governor Prast, conferring with officials on the impending trouble. The State authorities icel confident of the beautiful or preserved the peace; but it is not being able to preserve the peace; but it is not improbable that Governor Swann will have to call on the General Government for aid to be urnished in the manner prescribed in Constitution.

The New Constitution of Maryland,

A Washington despatch to the Boston Post says:—"Ex-Governor Pratt of Maryland had a long interview with the President this evening, long interview with the President this evening, touching political affairs of his State. General Sheridan this evening received a telegram from the commander of Fort Laramie, stating that the hostile Indians will not come in to meet the Commissioners at that point at the time expected. They will send in runners to listen to the propositions to be made, as they fear some trap will be sprung, and suspect bad faith. If they are satisfied the Commissioners are acting in good faith, the hostile chiefs will come in and hold a council in the full of the moon of November. Under this aspect of affairs. the Commissioners will hold a meeting in the morning to settle upon what course to pursue. Montana advices state that an exploring party which was sent to the head-waters of the Yellow Stone river has just returned, and reports see-

ing one of the greatest wonders of the world. For eight days they travelled through a volcanic country emitting blue flames and streams of brimstone. The country was smooth and rolling, with long level plains intervening. The summits of these rolling mounds were craters, from four to eight feet in diameter, and everywhere on the levels were smaller craters from four to six inches in diameter, from which streamed a blaze and constant whistling sounds. The hollow ground resounded beneath their feet as they travelled, and every moment seemed to break through. Not a living thing was seen in the vicinity, and the explorers gave

it the significant name of "Hell." The Peace Commissioners held a meeting at Omaha yesterday, and expected to start for the North Platte on the 14th, to meet Spotted Tail, who promises to bring in the principal men of his band.
