Evening Telegraph

PUBLISHED EVERY AFTERNOOM.

SUNDAYS EXCEPTED) AT THE EVENING TELEGRAPH BUILDING,

NO. 108 S. THIRD STREET. Price, Three Cents per Copy (Double Sheet), or Eighteen Cents per Week, payable to the Carrier, and Mailed to Subscribers out of the city at Nine Dollars per Annum: One Dollar and Fifty Cents for Two Months, invariably in advance for the period ordered

SATURDAY, DECEMBER 21, 1867.

Notice.-In consequence of a great pressure of advertising favors to-day, we are compelled to issue THE EVENING TELEGRAPH with an unnsually small amount of reading matter. We solicit the indulgence of our readers, in consequence, until after the holidays, when we will be able to furnish the usual modicum of

Why Our Eyes Ache.

THE general complaint made by our citizens in regard to the wretched quality of the gas furnished at present, has caused public attention to be directed to the matter. In THE EVENING TELEGRAPH, a few days since, we laid these complaints before our readers, and suggested, as a remedy, a renovation of the system of management. Mr. Joseph Manuel, in reply to the numerous murmurs, publishes a card, in which he gives a very plausible and probably correct explanation of the matter, which causes us to envy the days of tallow dips. He states that the gas manufactured is of as good quality as it has ever been, but the fault is due to a deficiency of pressure; that the insufficient capacity of the main pipes prevents the current of gas requisite for consumption passing freely through. Let us illustrate what the Engineer says:-In 1860, from December 1 to December 15, there was consumed 37,125,000 cubic feet of gas. During the same time in 1867 the consumption reached 56,809,000 feet, which is an increase of 53 per cent. While the consumption has thus increased, the size of the pipes has remained the same; so that the same mains must now furnish 57,000,000 feet, which before were capable of carrying but 37,000,000. The consequence is that the lightwhen all the pressure is on, is about one-half as good as formerly. When, however, the pressure is reduced by a number of the burners being extinguished, the flame is as bright as ever. As Mr. Manuel himself explains:-"Any consumer may notice that on Sanday

before ten or eleven o'clock, and good gas after that time, or on Sunday evenings? Such a thing would be impossible." This looks sensible, and seems to furnish a true reason. But the force of our argument in favor of selling our Gas Works to private companies is not in the least affected by these facts. We complained of defects, not of any special grievance. The fact remains the same. We have poor gas, and it seems probable that it will continue so for an indefinite length of time. If a private corporation had control, we could compel the relaying of the mains, and it would be actually accomplished. There are numerous errors which can only be remedied by a renovation of our system. If the works be let, they will be economically and satisfactorily managed, and become a source of revenue and not of outlay to our city, as they have been too often before. We hope the matter will receive candid and unbiassed attention from Councils.

o'clock, when heavy consumption ceases, there is plenty of light, or the gas is good. Now, does any sensible person believe that we manufacture poor gas and deliver it to the consumer

COTTON TAX .- The failure of the Senate yesterday to pass the bill removing the tax on cotton, and by this delay sending it over until January, is a result to be deplored. The interests not only of the South, but also of the whole country, demand that the tax be abolished. We do not feel a willingness to do anything which would in the least degree injure the North, even if the South would be more largely benefited thereby; but, in the present case, both sections would be enriched by the correction of this past mistake. As it is, the question remains unsettled; and will probably not be reached until February. Meanwhile anxiety and uncertainty will delay improvement in the cotton-growing States, and keep capital from being invested there. Where a feeling is exhibited in all parts of the land for the repeal of any law, the danger of precipitate action, on the part of both Houses. is much less than the evil which is liable to result from injudicious delay. We hope, therefore, that this bill will be the first thing to monopolize attention after the recess.

CALIFORNIA SENATORSHIP.-It would seem that the post of United States Senator is gradually becoming a cheap gift in the hands of the State Legislatures. The news from California tells us that Eugene Casserly has been elected to that position. Who Mr. Casserly is we have not an idea. He has no national reputation. In fact, his fame hardly extends throughout his State. He has held no position of trust or honor, and from what we are told in the despatch announcing his success, it would seem that he is a renegade Republican. He has tried for political office persistently for seven years at least. He wanted to be Governor in 1860, and failed; Senator in 1861, ditto; Senator in 1862, with the same result. His final success is an encouragement to hungry aspirants, and says to them in cheering language, "Never give up," but "try, try again !" He is about fifty years old, and was an Abolitionist in 1848.

POCKETED. - The President has failed to either veto or sign the bill striking out the word "white" in the laws in the District of Columbia. The ten days allowed by law expired yesterday and no message was received. It is said, however, that by some abstruse calou-

lation of his own the President extends the time until to-day, when, as Congress has taken a recess, he will have the entire sixteen days' vacation to consider the subject. So far as the ultimate result is concerned, it matters little, as his veto would be defeated beyond a doubt.

RECESS OF SIXTEEN DAYS .- We see no good reason why Congress should adjourn from the 20th of December to the 6th of January. When we remember that the taxes have not yet been touched, the finances not considered, and a number of foreign complications passed by, we deem such an adjournment unnecessarily long. It will require debate and care in the settlement of these questions, and we hope no previous question will be moved.

MOST IMPORTANT DISCOVERY .- We learn from our foreign scientific exchanges that M. Milliott, of Paris, has devised a method of introducing light of an intense brilliancy into the human stomach. He passes into that organ two platinum wires, connected with the poles of a powerful battery, the apparatus of Middedorff being preferred, and in this way kindles a very bright light in the entire cavity. Now, if M. Milliott will only modify his apparatus so as, by passing his wires through the ears of some individuals to illuminate the inside of their skulls, he will take rank forever with the world's foremost benefactors. The apparatus of Middedorff will accomplish a task which all great teachers, from Socrates to Coleridge, have tried in vain.

RELIGIOUS NOTICES.

REV. GEORGE B. IDE.
of Springfield, Mass. (formerly of Philadelphila), will preach the third of a series of Sermous
before the
YOUNG PEOPLE'S ASSOCIATION

TABERNACLE BAPTIST CHURCH, CHESNUT Stree:, west of Eighteenth, to-morrow (Sunday) evening, at 7½ o'clock. Subject—

Refreshments provided.

CONSUMPTION CURED | LADIES' NOTICE.

The True Remedy at last Discovered

UPHAM'S FRESH MEAT CURE.

PREPARED ACCORDING TO THE FOR-MULA OF PROFESSOR TROUSSEAU. OF PARIS.

The new plan of treating pulmonary diseases with Fresh Meat is creating a profound sensation in Europe. Its beneficial results have been heralded through the press in both hemispheres. The Fresh Meat Treatment was first tried in Russia by Dr. Weisse. The results were no less gratifying than surprising. Consumptive cases, in his hands, which had previously baffled the most skilled of the profession, yielded rapidly, as by charm, under the new treatment. But it is to Professor Trousseau, of Paris, that the world is chiefly indebted for making known to the afflicted the great feature of the Fresh Meat Cure. It is positively asserted that "in no less than TWO THOUSAND CASES in which it has been tried, it proved successful in NEARLY ALL." The Fresh Meat Cure is now first offered to the American Public as a Proprietary Remedy. It is put up in the form of a Syrup, each bottle containing the nutritious properties of one aud a half pounds of Raw Meat. It is pleasant to the taste, and a single bottle of the medicine will convince the most skeptical of its virtue as the great healing remedy of the nineteenth

TESTIMONIAL FROM THE PRESIDENT OF THE BERKS COUNTY MEDICAL SOCIETY.

"Consumption has been for centuries considered as incurable by the medical faculty. and more especially that feature of it called Tuberculous Consumption. In a practice of nearly forty years I never cured but one case, and that was a Miss Trostel, then about seventeen years of age, residing about ten miles from

"A member of my own family, and the dearest of all, became affected with this deadly malady, and, as may well be judged, everything that science, experience, and affection could do were called into requisition without avail, when, by the merest accident, a paper was placed in my hands which covered the whole subject. I at once observed that it corresponded with a life-long opinion of my own -that consumption cannot be cured by any agent or combination of agents of the materia medica, except by mere chance, as it happened in my case, as above stated. I at once sent to Philadelphia for the remedy, and on opening my office, on Monday morning, I found the Howard Express before my door with the article required. I immediately administered 'UPHAM'S FRESH MEAT CURE,' as ordered, when, to my astonishment, she found considerable relief the very first day. This was on the 28th of October last. She has continued its use ever since, and, as if by a charm, she is daily and geometrically improving in health. The truth is, her relatives and the whole neighborhood are astonished at the effects of this valuable remedy. ANTHONY A. McDonough, M. D.,

"Nos. 215 and 217 S. Fifth street. "Reading, Nov. 11, 1867."

A CASE OF BRONCHITIS CURED.

PHILADELPHIA, May 20, 1867. S. C. UPHAM-Sir:-My wife has had the Bronchitis with a violent cough of several weeks' standing. At last she could not speak above a whisper. I purchased a bottle of "UPHAM'S FRESH MEAT CURE," and she commenced using it according to directions. After taking the first dose her cough was better, and after four or five doses she was cured of her cough and soreness, and her speech was restored. I will always keep a bottle of the "MEAT CURE" in my house, for I am satisfied that all that is necessary to convince any one of its merits is to make a trial of it, and I cheerfully recommend it to all whose condition demands anything of this nature. I want some of your circulars to send to my friends in New York JOSEPH J. RIVERS, and Boston. No. 753 Howard street.

CONSUMPTION POSITIVELY CURED. UPHAM'S FRESH MEAT CURE, for CON-SUMPTION AND BRONCHIAL AFFEC-TIONS, is prescribed and recommended by Physicians all over the country, and is performing more cures than all other remedies combined. A trial will convince the most skep-

In order to place UPHAM'S Fresh Meat Core within the reach of all classes, the price will be as follows:-\$1 a bottle, or 6 bottles for \$5. A package of six bottles, sent by express, securely packed, to any part of the United States, on receipt of \$5. Sold wholesale and retail by S. C. UPHAM, No. 25 South EIGHTH Street, Philadelphia, and principal druggists throughout the United States. None genuine without the signature on the wrapper of each bottle of "SAMUEL C. UPHAM, Sole Proprietor." Circulars sent free to any address.
