Mayer Sulzberger moved to make the nomina-tion unanimous. This was seconded by Aller-man Jacob R. Massey. The question was then put and carried amidst the wildest enthusiasm. the delegates rising to their feet and cheering lustily for the nominee of the Convention.

A Committee of five to wait upon Mr. Gibbons and inform him of the action of the Convention, was appointed by the chair. A vote of thanks was tendered to Mr. Suppard and the other officers for the manner in which they lis-charged their duties, and half-past 5 o'clock the Convention adjourned sine die, with nine rousing cheers for Grant, Colfax, Gibbons, the

whole ticket, and victory. THE HEAT .- Peter Schantz was overcome with the heat at the Port Richmond coal wharves He was removed to his home, No. 624 N. Third street.

-One of the horses on the Green and Coates streets line became exhausted about 9 o'clock last night, at Eighth and Sansom streets, and the car was obliged to be thrown from the track until a fresh team was brought.

Shight Fire. - The alarm of fire last night about quarter before 12 o'clock, was caused by the burning of Mr. Joseph Burton's grocery store Northwest corner of Twelliu and Locus streets. The smoke was seen issuing from the doors, and when they were broken open by the police officers, it was discovered that the fire was under the counter. Its origin is unknown. The less is estimated at \$600, principally by

Hospital Cases.—The following persons were admitted to the Pennsylvania Hospital:—Michael Quinn, aged 40 years, residing at No. 98 Morris street, met with as accident yesterday at Gloncester, New Jersey. A plank fell upon his leg and broke it. John Smith, aged 22 years, had his hand

badly cut with a knife ye terday. FATAL FALL .- Yesterday afternoon, about 3 o'clock, a house painter fell from the roof of house No. 802 N. Third street and was almost instantly killed. The deceased was named Francis Schrack.

STRUCK BY LIGHTNING .- During the thunder storm yesterday afternoon, the house at the Northeast corner of Eleventh and Lombard streets, was struck by lightning. The damage done was but trifling.

#### MISCELLANEOUS CITY JOTTINGS.

-Mr. Piersol, the City Treasurer, has appointed the following gentlemen collectors of the outstanding mercantile tax for 1868;—Isatah H. Butler, for the First, Second, Third, Fourth, Seventh, Eighth, and Twenty sixth Wards; Wil liam C. Gillingham, for the Fifth, Sixth, Ninth, Tenth, and Eleventh Wards; Samuel McCahen, for the Twelfth, Thurteenth, Four earth, Fif-teenth, and Twentieth Wards; John Huplet, for the Sixteenth, Seventeenth, Eighteenth, Nine-teenth, and Twenty-fifth Wards; James Mahoney, for the Twenty first, Twenty-second, Tweuty-third, and Twenty eighth Wards; John McNeil, for the Twenty-fourth and Twenty-seventh

-Our streets are in a filthy condition, especially in the upper portion of the city. The Board of Health is considering the proposition of declaring them prejudicial to health, and having them cleaned, it the contractors cannot

-A meeting of the Journeymen Felt Hat Finishers' Association will be held this evening, at the northwest corner of Second and Callow-

A handsome flag was presented to Samuel Laird, of the Mansion House, Long Branch, by Mr. Horstmann, of this city last week. The work on the new reservoir for the Twenty-tourth Ward Water Works is progressing rapidly, and it is now about half completed.

Quicksilver-The Market and the Mines. Mr. R. W. Raymond writes from California to the American Journal of Mining:

"As from time to time quicksilver mines are offered for sale in New York, and many persons imagine that this branch of mining involves large, prompt and sure profits, it will be worth while for us, perhaps, to exhibit the commercial aspect of the question for the benefit of the public. Mr. Butterworth very courteously answered all our questions, and gave us every information concerning the operations of his company. The facts we are about to give, though partly derived from him, are not secret. but well known to those familiar with the business, and quite within the reach of any inquirer. Otherwise, we are far too deeply indebted to Mr. Butterworth and his pleasant family circle to reward their hospitality with a breach of confidence.

"The quicksilver trade of the world is an armed truce between Spain and California. The mine of Old Almaden, in Spain, supplies the market of London, and a large part of Europe, and ships its product as far West as the city of Mexico. Until recently it also controlled the great Chinese market, but Mr. Butterworth, shipping ten thousand flasks to Hong Kong, and selling at far below the cost, forced the reshipment to Spain of all the Spanish quicksilver; and the market has since been in his hands. The same tactics on the part of Spain keep him from the London market, and the two great producers are thus forced to divide the world between them. But the New Almaden Company is not the only producer of quicksilver in California, and liged for self-preservation to accede to a combination with the New Idria Company and the Rediugton; and it is this combination which now controls the production of quicksilver, and will probably, for a long time to

any rival enterprise. "It must be borne in mind that the consumption of this metal is limited. A certain amount for manufactures, a certain amount for metallurgical purposes, and the diminishing quantity required for calomel, with what the Chinese manufacture into vermilion, com-prise the principal demands. Now the quantity used in metallurgy, which is the most considerable, is hardly affected by the price of mercury. If it were a dollar a pound instead of sixty cents there would be no less consumed; if it were twenty-five cents the demand would scarcely increase. In fact, the cost of quicksilver lost in amalgamation is (to wasteful men like our mill-men) very trifling. In Mexico, where the patio process is employed, perhaps a pound and a half of quicksilver is lost for every pound of silver extracted; but in Washoe the loss is (we are told) not more than a third as much. The Pacific States and territories require altogether about 1200 flasks, or 91,500 pounds per month; Mexico and South America, 1000 flasks each; China,

is divided among different companies, as fol-

to the above limited amounts (the works at like States of Europe, no less than of America Wand have been or would be dismissed with

half their capacity to furnish the a lotted 24,000 flasks) and to buy up the quicksilver made by all other companies. There are a number of smaller mines, like those of Guadanumber of smaller mines, like those of Guadanumber of smaller mines. number of smaller mines, like those of Guadalupe, which we visited, about eight miles from New Almaden, and which produce perhaps a

hundred and fifty flasks monthly. "All these mines are forced to sell to the before-mentioned combination, which pays them forty cents a pound, and sells to the public at sixty. This margin of profit may seem excessive, but it must be remembered that the returns from sales are extremely slow. The metal is sent to distant agents, and must be sold at retail before the money is received by the producer. It takes perhaps two years to work off the whole of one annual crop. With money at two per cent. a month, this delay is no joke. The present combination, which includes the Barons (who were in a certain degree forced to go into it to save their profits on a large amount of quicksilver, which they had scattered through the Western Hemisphere at the expiration of their well-known contract with New Almaden), is able to command foreign capital at comparatively low rates; and hence can afford to wait for the slow remuneration of the trade."

# AN ARMY OF AMAZONS IN PARAGAUY. President Lopez and his "Potticoat Re-serve."

The London Times says: "An army of four thousand female combatants actually in the field must be acknowledged to be a somewhat novel incident in the world's history. Yet there seems to be little doubt that this strange phenomenon is now being exhibited on the banks of the Paraguay river. President Lopez has been for the last three years draining his little republic of nearly the whole male population. He has now fallen back on his Petticoat Reserve.' The names of the commanding officers at the head of these female divisions — Mrs. Brigadier General Eliza Lynch, Mrs. Lieu'enant-Colonel Ferreira, Mrs. Captain Her-rero-are already known, together with the positions their respective corps occupy near Vil'a Rica and the Tebicuary Ford. The Brazilish and Argentine journals which acquaint us with these strange particulars cry out Sname! and declare that General Loose is scandalizing the civilized world. They, of course, take it for granted that young girls and mothers of families are pressed into service in Paraguay against their will; that Lopez is carrying on hostilities by such desperate measures as the most reckless consumers of *chair a canon*—say Frederick II of Napoteon I—would hardly, in their nimost straits, have dreamt of re-sorting to. And, indeed, whatever place some of the reformers of our day may feel disposed to assign to woman in the Coun-cil Chamber or at the polling-booth, all of us in old Europe agree to dispense with her presence in the field of battle. The exploits of Joan of Arc against the English at Orleans, those of Jeanne Hachette against the Burgandians at Beauvais, or those of Caterina Regurana egainst the Torks at Nice, are held out for the admiration, but not for the imitation of our wives and daughters. They are isolated deeds of heroism, and, with whatever color the superstitious reverence of after ages may have painted them, they were prompted by such transcendent feelings as it would be impossible for sober modern strategy to reckon upon. It was not might of arm or weight of word that those amazons brought into the field; they stood up in the throng like super human apparitions, encouraging their men their men, sharing them into action rather than actually sharing it with them; and it was precisely the contrast between their puny physical strength and their great moral courage which gave them their ascendency. It was the faith and gallantry

with which man was inspired that constituted the woman's miracle.

"But it is otherwise in those wild regions of the Plate. It is a red Indian race that General Lopez has under his orders; the admixture of indigenous blood observable in all Spanish-American colonies is particularly strong in Paraguay, in that inland community which the Jesuits originally organized and disciplined out of their Indian converts, which subsequently Dr. Francia and his successors shut up against all foreign intercourse. The description we have read of the savage fortitude with which the Paraguayan soldiers refuse quarter when writhing on the ground in the last pangs of death, not belong to the ordinary European Much must be allowed for the warfare. peculiarities of that untamed savage nature. The whole of Paraguay has stood the ordeal of its present unequal struggle with the unflinching endurance of a wild Indian at the stake, and the women have already shared the hardships and the dangers of the campaign -digging trenches, lading and unlading vessels and doing duty as couriers and messengers-to such an extent that their coming forward in second line on the field at the present moment, and bearing their own share of the brunt of battle, may seem scarcely an aggravation of their We do not know, however, how far the to carry on the war "to the bitter end."

cuemies of Paraguay may be entitled to taunt General Lopez with barbarism for employing the desperate resources to which they drive him. Whatever may have been the causes which originally induced Paraguay to draw the sword, there seems to be no doubt that its adversaries are now determined Emperor of Brazil, in the speech by which he opened the General Assembly on the 9th of last month, declared his determination not to desist from hostilities till the honor of his empire be 'completely avenged.' His Majesty had but lately, as he informed us, declined with thanks the 'gracious tender of mediation' of the Government of the United States, anxious for the re-establishment of peace. Whatever may be he disposition of the Emperor himself, there s a large and influential party in Brazil which will hear of no other terms with Paraguay than the expulsion of Lopez, and the annihilation of the inland republic. No other course than resistance is thus left to the Paraguayans; and we cannot conceive how one man at the head of the Government could command such unlimited sacrifices both of life and property from women as well as from men as Lopez has hitherto obtained, if the instinct of self-immolation were not strong at the heart of the whole popuation, if the determination to do or die did spring as spontaneously from the heart of the meanest Paraguayan as from that of the Chief whom his enemies designate as the 'cruel and cowardly Lopez.' Whatever share of the blame, with respect to this wretched war, may fall upon the Paraguayan dictator, it is evident that e is fighting for existence, and hitherto fighting to good surpose. What the fortune of arms, and still more the fickleness of the allies of Brazil, the Argentines and Uruguayans, may produce, it is difficult to foresee; but what is quite sure is that, after the most decisive defeat, his enemies can in pose on him no worse terms than they are come, prevent the successful establishment of willing to grant him now. It is natural that he should dely them to do their utmost, and with the advantages the allies boast of having obtained lately, there seems little chance of either the position of Humaita or of Tebiouary being forced, so long as there are mer, or women, to line their bastions. It is upon Brazil and its allies that diplomacy may still exercise all the pressure it can bring to bear. The losses of Brazil, both in men and money, exceed all the resources of that vast but disorganized and more than half bankrupt empire. It is harrowing to read the description of the mortality endured by the Brazilian army in its late cam-paign. We do not know how many victims to the cholera must go to fill up the measure of revenue due to the outraged honor of Brazil; we do not knew how low the funds of the empire must fall, how high the price of gold must rise, before the war party at Rio Janeiro are brought to declare that they have had enough. All we can say is that a war n which thousands of women are sent to butchered should not be silowed to proceed in a Christian country, if the good offices of all Christendom could possibly prevent it. The Emperor of Brazil has rejected the mediation of the United States. But why is it that the 1000. The total annual demand does not exceed 50,000 flasks, the production of which lows:-New Almaden, 24,000; New Idria, ab'net at Washington has been allowed to act 10,000, and Redington, 10,000. These three slone in this business? And how can we be mpanies have agreed to confine themselves

A Jury Story from England.

An English paper, alluding to a recent verdict of £960 against the London Teegraph in a slander suit brought by one Risk Allah, apprehends that "the institution of trial by jury would suffer a shock if the deliberations of Enclish juries were usually made public." "A Quadrance," in a letter to the London Star. tells strange story, which in substance is as for

"In the first place, if I am rightly informed, the jury, upon their retirement, were remarka-ble for the manner in which they disagreed. A najority of them (probably agreeing with Mr. Coleridge as to his client's literary style and taste) were for making your contemporary pay heavily for its indulgence in "tall writing, proposed to fix the damages at £2500. T were, however, three who thought the injuries sustained by the 'Oriental person' would be amply compensated by a £5 note. They stood out manifully for some time; but at length, on out manually for some time; but at length, on the suggestion that the sum proposed by the majority should be reduced to £1500, two of them yielded. The third, who was what is called in Irelaid a boot-eater, i. e. a man who will go through a vast amount of privation to gain his eads held firm. And some further time had been was ed in vainly endeavoring to persuade the recalcitrant jurymen to agree to the sum settled on by the others (who, it must be remembered, had already given up £1000 of the amount originally named by them), the foreman suggested that each jury man should write down what he considered the proper amount of damages, that the sum should be divided by twelve, and the amount thus arrived at should be awarded to the plaintiff.
To this the 'boot-eater' agreed, and the quotient £960, was accepted, when one of the jury, re marking that it was a 'ragged sum.' proposed to make it 'in round numbers' £1000. This rouse the slumbering anger of the original objector, who declared that unless the compromise were beld to be should go back to his original idea of £5, and, perhaps, even less! So that eventually the result of the division was accepted as the amount of damages awarded."
