The chair appointed Joseph Robinson, T. E. Hawkins, James Rolen, A. W. Frick, and H. Dieck, who, after a short absence, presented the following, which

Was adopted:—

Exoticed, That the P. cas Club of Philadelphia has learned with unfelred regret of the solden death of Mr. Louis Morwitz, of the Philadelphia Democrat who was beloved and respected by the members of this Club for his nany manly and commendable qualities. These had endeared him to the members of this organization, with which he had been long and honorably connected. His great kindness of heart, uniform and gentlemanly connessy and high toned bearing served to impress us of his deep and lasting respect for him, and their resolitation embalms his memory.

The Chair appointed Dr. Julius Hein to pre pare the memorial.

Addresses in reference to the memory of the deceased were then made by T. E. Harkins, Dr. Junus Heln, James Nolen, and Joseph Robinson, after which the meeting adjourned.

THE LATE JOHN F. M'DEVITT, Captain Stephen Winslow, from the commit-c to prepare a memorial of the late John F. McDevitt, presented the following, which was unanimously adopted and ordered to be entered

npon the minutes:—

The memory of the just is blessed. That grateful thought remains with us as we sadly reflect that in the death of our late colleague, John F. McDevitt, his family have lost an affectionate son and brother, our profession an invaluable and well-beloved member, and society one of its brightest ornanears. A simple narrative of the life and character and works of such as he constitutes the highest eulogy that

can be paid their memories.

John F. McDevitt was born in this city in the year 1840. He entered the Locust Street Grammar School at an early age, and pursued his studies with such marked fidelity and zeal as to earn the frequent commendations of his teachers. In July, 1854, he was admitted to the Central High School, and entered upon the full course of four years' study. He speedly became popular alike with pupils and professors, and always held a high position in his class. He was especially successful in declamation, but he had already imbibed a taste for the newspaper profession, and devoted himself particularly to acquiring a knowledge of the phonographic art, in the practice of which he became very expert in the course of a few months. the year 1858, he graduated from the institution with distinguished honors and the esteem of all with whom he had been associated. In the fol-lowing year he became connected with the Commercial Lest, as a reporter and amanuensis for Mr. Stephen N. Winslow, Sr. He was also a contributor for a length of time to the local colmms of the Inquirer, his reports being invaria-bly marked by good sense and accuracy. Subrespectly he became attached to the staff of the Fress as a reporter, and discharged his duties in this capacity with such commendable ability and industry that he was soon elevated to the more responsible position of financial editor. Atterwards he devoted his attention solely to the financial department which, under his judictous supervision, attained a high reputation for reliability. While discharging this important trust, he never for a day neglected the phonographic art, but was constantly employed in reporting the proceedings of conventions and trials at law, as well as sermons and lectures for the Press. As a phonographer his ability was admitted to be of the highest order, and many of his law reports will be of incalculable service to the legal profession in all future years. At the same time be contributed frequently to the columns of the Catholic Slandard and the Universe, and during the late Easter festival at the Cathedrai. he edited a little daily journal, entitled "Tue Cathedral Tablet, or Plea ant Memories." It is a signal proof of the undagging energy of the subject of our memoir, that while busied with these multifarious cares and duties and others arising from his position as secretary of the High School Alamni Association, secretary of the Philopatrian Institute, and membership with various literary societies, he nevertheless found time to commence the study of the law. for which he had acquired a taste, and in which he had gained considerable insight in his re-portorial practice. About six months ago he was admitted to the bar, and contemplated fully adopting this profession, when teath closed his bright and promising career of nonle usefulness. NOTICE TO MARINERS.

The foundation stones of the new Lighthouse on Little Guil Island, Long Island Sound, were laid on Monday last, at a depth of 19 feet below the surface of the ground. The old lighthouse has been entirely taken down: and the stone of which it is composed will be used in the erection of the new double house to be put up for the joint occupancy of the keeper and assistant keeper. For the present the light is shown on the old bell tower which is also to be replaced by the new structure, and instead of the present inefficient method of fog signalling by means of a bell rung by horse power, and requiring constant attendance, a powerful fog trumpet will be employed. When all the imprevements now in progress at this important station are completed, the commerce of Long Island Sound will have received a substantial and lasting benefit.—Greenport (L. I.) Watchman, Aug. 1.

The Indian Netherlands Government has given notice, that since the 1st of July, 1867, a light has been exhibited at Cheribon, north coast of Java.

The light is a fixed white light, elevated 26 feet above the high water level of the sea, and in clear weather should be seen from a distance of 8 miles.

The liuminating apparatus is dioptric or by lenses. The light is placed at the extremity of the North Mole of the port, and serves as a guide at night to the Roads of theribon.
