HEALTH DEPENDS UPON GOOD DIGESTION,- 'Weakness of the Stomach" is the source of more evils than were contained in Pandora's box. Debility headache, nervous tremors, palpitation of the heart, and local pains innumerable are its direct consequences. It obscures the intellect and gives birth to the most absurd and incoherent fancies; incapacitates a man for business, and renders persistent exertion next to impossible. Yet, strange to say, indigestion is the most replected of all allments. And this is the more extraordinary from the fact that an absolute, infallible specific for the disorder can be obtained in every city, town, and village of the United States.

HOSTETTER'S FTOMACH BITTERS takes as wide a range as the malady which it cures. It pervales every civilized portion of the Western Hemisphere, and its celebrity as a topic and alterative is everywhere established. It is due to the common sense of the American public to say that the demand for it is im meuse, and continually on the increase; but still thousands continue to suffer from dyspensia, with the great fact staring them in the face that a remedy for it exists, as it were, within arm's length of every sufferer. Such is the inconsistency of human nature! Day by day, however, the number of those who manifest this insane indifference to their own health and comfort diminishes; and the time will come, it is confidently believed, when the disease will be expelled from the category of prevalent disorders by this incomparable alterative and restorative.

WARM WEATHER AND SICK NESS .- Individuals suf fering from affections of the Liver, Kidneys, general derangement of the system, with prestrating debility, will find Speer's "Standard Wine Bitters" to be the best suited to their aliments. They are really " Utill dulci"-the useful with the agreeable-simply the pure I ulce of the grape, made bitter with the most simple herbs and roots. Sold by Druggists.

MARQUETTE!

Another letter from the great fire at Marquette. HERRING'S BAFES preserve their contents where Safes of other makers fail !

Marquette, Michigan, July 20, 1868.

Gentlement—On the lith ult, the entire business portion of our tewn was destroyed by fire. Our cafe, which was one of your manufacture, was subject to an interse heat, but proved itself adequate to the severe test. It lay in the ruins fourteen days, and when taken out from its appearance (the outside covering being burned through in many places), and in view of the fact that several other safes previously taken out were entirely destroyed, it was a great surprise to us to find the contents legible and in good condition. MARQUETTE, Michigan, July 20, 1868.

several orders for new sales have already been sent you, which is the best proof of this most satisfactory test, and of the confidence of this community in your safes. Respectfully yours.

The Chinese Government having (through the Hon Anson Burlingame) conceded to this Company the privilege of connecting the great scaports of the Empire by submarine electric telegraph cable, we propose commenc ing operations in China, and laying down a line of 90

miles at once, between the following ports, viz:-Macon ... Hong Kong .... 250,000 Swatow ...... 200 000 Amoy ... 250,00 Foo-Chow. Wan-Chu ... 300 000 Ningpo .... 400,000 Bang-Chean. ....1,200,000 Shanghat. ...1,000,000 Total... ...5 910,000

These ports have a foreign commerce of \$900 000.0.0 and an enormous domestic trade besides which we have the immesse internal commerce of the Empire. radiating from these points, through its canals and navigable rivers The cable being laid, this company propose erecting

land lines and establishing a speedy and treatworthy means of communication, which must command there, as everywhere else, the communications of the Government, of bush ess, and of social life, especially in China. She has no postal system, and her only means now of communicating information is by courier on land, and by steamers on water. The Western World kn we that Chine is a very

large country, in the main densely peopled; but few yet realize that she contains more than a third of the human race. The lates, returns made to her central suthorities for taxing purposes, by the local mag'strates make her population Four Hundred and Fourteen Millions, and tr is is mere likely to be under than over the actual aggregate. Nearly all of these who are over 'en years old not only can, but do read and write. Her civilization is pecudar, but her literature is as extensive as that of Europe. China is a land of teachers and traders; and the latter are exceedingly quick to avail themselves of every proffered facility for procuring early information. It is observed to Carifornia that the Chinese make great use of the telegraph, though it there transmits messages in Enpers of first steamers are owned by Chinese merchants, and used by them exclusively for the transmission of early intelligence. If the telegraph we propose, connecting all their great seaports, were now in existence, it is believed that its business would pay its cost within the first two years of its successful operation, and would steadily

increase thereafter. No enterprise commends itself as in a greater degree remonerative to capitalists, and to our whole people. It is of vast national importance commerciaily, politically, and evangelically,

Shares of this company to a limited number, may be obtained at \$10 each. \$10 payable down, \$15 on the 1st of November, and \$25 payable in monthly install ments of \$2.50 each, commencing December 1, 1868 on application to

WHOLE LINE TO THE PACIFIC WILL BE COMPLETED IN 1869.

The Company have ample means of which the Gov ernment grants the right of way, and all necessary timber and other materials found along the line of it; operations; also 12,800 acres of land to the mile, taken in alternate sections on each side of its road; als United States Thirty-year Bonds, amounting to from \$16,000 to \$18,000 per mile, according to the difficulties to be surmounted on the various sections to be built for which it takes a second mortgage as security, and it is expected that not only the interest, but the principal an ount may be paid in services rendered by the Company in transporting troops, mails, etc. THE EARNINGS OF THE UNION PACIFIC RAILROAD, from its Way or Local Susiness only during the year ending June 30, 1868, amounted to

Upon such a troperty costing nearly three times their an ount.

ARE ENTIRELY SECURE. The Union Pacific Bonds run thirty years, are for annual interest, payable on the first days of January and July, at the Company's office in the City of New York, at the rate of six per cent, in gold. The princi pal is payable in gold at maturity. The price is 102"

and at the present rate of gold, they pay a liberal neome on their cost. A very important consideration in determining the

value of these bonds is the length of time they have to It is well known that a long bond always commands a much higher price than a short one. It is safe to assume that during the next thirty years, the rate o interest in the United States will decline as it has done in Europe, and we have a right to expect that such six per cent. securities as these will be held at as high a premium as those of this Government, which in 1857 were bought in at from 20 to 23 per cent. above par. The export demand alone may produce this re-

sult, and as the issue of a private corporation, they are beyond the reach of political action, The Company believe that their Bonds, at the present rate, are the cheapest security in the market, and the right to advance the price at any time is reserved.
