Foreign Affairs.

LONDON, Nov. 4 .- The Post aunounces the following programme: - A quasi official dissolu-tion of Parliament will take place on the 11th in-t. All uncontested elections are to commence on the 16th; contested elections in borougus on the 11th, and in counties at a later date. The new Parliament will be summoned to meet on Wednesday, December 9, when the Queen's speech will be delivered and the policy of the Ministry on the questions at issue announced. Mr. Dennison will be re-elected Speaker.

It is believed that the House will be ready to proceed to business by Monday, the 14th of December. The Opposition will probably move as a test question an amendment to the Queen's speech, which the House will debate on Friday, the 18th, when it is supposed the motion will be carried by a large majori y, and the House will be adjourned until the following Monday. On reassembling the House the Premier will announce his resignation and that of his coll agues in the Ministry. Mr. Glad-tone will follow with a motion to adjourn over for the holidays, to afford an opportunity for the formation of a new

He said that new sources of revenue were needed to provide for the increased expenditures; that the relations with all foreign powers were satisfactory and friendly, hoped Spain would succeed in independently reconstructing her affairs on a basis which would render the future welfare of her people secure. The King concluded by declar-ing that the wishes of sovereigns and a popular craving for peace would secure peace, and should remove those groundless fears of which advantage is too often taken by the enemies of

Peace.

London, Nov. 4. -The report that American

vessels of war were sent up the Paragusy river to Asuncion is conditined. They have been ordered to demand the immediate release of the members of the United States Legation. President Sarmiento, of the Argentine Con-

federation, desires to assumilate the civil laws of his country to those of the United States. HAVANA, Nov. 4 .- The Haytien war vessels Petion and Salpave, late from Matanzas, have bombarded Port Jeremie seven days. President Sainave commanded in person. The American, English, and French Consuls demanded that time be allowed for the removal of the women and children, but the request was denied and

the bompardment commenced without further Many women and children were killed, and all the houses in the city, including consular offices, were destroyed or badly injured. Au attack was made on the town by the land forces of Salnave during the bombardment, but failed. A British man-of-war is on the way to Jeremie to watch the proceedings of the Haytien fleet and prevent any violation of the rights of foreign

residents, for which the Haytiens show little respect.
The excitement and indigration in Hayti against Americans are increasing. This hostility is caused in part by the fact that the Haytien Government was furnished with its war vessels by American ship-owners, and that these vessels are manned by Americans, who do not refuse to execute the cruel orders of Sainave.

FROM WASHINGTON.

Special Desputch to The Evening Telegraph. WASHINGTON, NOV. 4.

The President

kept close house to-day and received but few visitors. The leading Democrats give him a wide berth and most of them are invisible, as

Can't Stand the Storm of ridicule which meets them on every side-Secretary Welles visited Johnson to condole with him, and Schoffeld also called on some War Office business. These were the only visitors of note at the Executive mansion.

Postmaster-General Randall is philosophic over the result, which he expected.

Montgomery Blair is reported sick, with a mustard plaster on his throat, which keeps him from public sight. At Grant's Headquarters

everything was quiet. General Dent, his bro-ther-in-law, received a few visitors, who inquired as to when Grant would return, which question Dent could not answer; but from the fact that last week a request came from Galena to send all the winter clothing of the family out there, it is supposed they will not return much before

Congress Meets.

in December. It is conceded no session will be held next week.

Secretary McCulloch

is overwhelmed with approcations to be reinstated from the male and female clerks discharged last week, but has been compelled to decline such requests, as there are no appropriations to pay these people. The ladies are xceedingly importunate, and the Secretary can scarcely get rid of them.

THE ELECTIONS.

The Frauds in New York,

Special Despatch to The Evening Telegraph, NEW YORK, Nov. 4, - The authorities have evidence that fifteen thousand illegal votes were cast in this city, and Mr. Hodman's election will be contested. The translatent vote is estimated as high as twenty-five thousand. Inspectors and canvassers of election last pight retused to obey the instructions of the Police Commissioner to make a prompt canvass of the votes cast, and it is said their action was dictated by the Tammany leaders, and agreed upon early in the day. Returns were purposely kept back, and the conduct of many canvassers can only be accounted for on the supposition that they intended to tamper with the ballots. The Court of Appeals will closely scrutinize the matter.

New York State. Lockfort, N. Y., Nov. 4.—Niagara county, corrected, complete, with estimates for one district, gives Grawold 319 majority; Grant, 391 majority. Skeels (Democrat) is elected in the First district by 14 majority.

Fulton county, Rep. majority 700. Onondaga county, Rep. majority 3300.

The Western States. CLEVELAND, Nov. 4.—Nothing later has been received to indicate any change in the Western States from previous despatches. Kentacky is reported to give 75,000 Democratic majority, and elects nine Democratic Congressmen.

NEW JERSEY.

NEW YORK, Nov. 4 .- The Seventh ward of Jersey City, in the sparsely inhabited Seventh district, voted yesterday as follows:-Grant, 1671; Seymour, 1165. It is claimed that this is twice the number of people in the ward, and deleated Republicans who have lost that district will contest the election.

The whole State is reported about 1000 malority for Seymour. Hudson county elects the Democratic ticket by 3000, six Representatives

to the Legislature, and one Senator.

Newark, Nov. 4.—The State gives about 1000
Democratic majority. Randolph (Dem.) for
Governor has 2500 majority. The Senate will
have 12 Democrats and 9 Republicans, and the Assembly 32 Democrats and 28 Republicans, thus securing a Democrat in place of Freling-

Moore (Rep.) 3000 majority, Haight (Dem.) 8000, Bird (Dem.) 3500. Hill (Rep.) 100, Claveland (Dem.) 1000. Halsey will contest this.

Literary Items. HANS ANDERSEN .- The announcement that

Hans Christian Andersen was to contribute new stories to the "Riverside Magazine for Young People" doubtless took some by surprise, since he existed in their minds almost as an ancient, as little likely to turn up in the guise of a regular contributor as Æsop himself. Andersen's stories have indeed been the nursery tales of two generations, yet the great etery-teller is living still, and continues to weave his delightful tissues. He is not so very old, for he was born in 1805, in Odense, Denmark, and last year a great festival was held there on the occasion of Andersen being made a citizen of honor-a popular demonstration towards one who has achieved a wider literary fame than any other native in Denmark. Andersen never married. and lives a rambling sort of life, sometimes in Copenhagen, but as often travelling in Spain, Switzerland, France, and Holland. He is a great favorite at various courts, but his true distinction consists in the fact that every home is open to him, and the poor as well as the rich know his kindly nature. He himself, in the "True Story of Life," relates a bright little scene. He was away from home, at Hamburg, we believe, and, in company with Otto Speckter, the clever artist who has illustrated his stories, was setting out for the opera house:-

"On our way," he says, "we came to an elegant house. "We must go first in here, dear friend," said Speckter, 'a wealthy family lives here, friends of mine, and friends of your stories; the children will be happy.'

"But the opera,' said I. "Only for two minutes,' returned he, and drew me into the house, mentioned my name, and the circle of children collected around me. " 'And now tell us a tale,' said he, 'only

"I told one, and then hastened away to the theatre.

" 'That was an extraordinary visit,' I said. "An excellent one; one entirely out of the common way!' said he, exultingly. 'Only think! the children are full of Andersen and his stories. He suddenly makes his appearance among them, tells one of them himself, and then is gone ! vanished ! That is of itself like a fairy tale to the children, that will remain vivid in their remembrance.

"I myself was amused by it. "There is something very pleasant in the knowledge that henceforth Andersen will make monthly visits to American families through 'The Riverside,' even before his own countrymen hear his stories. It is a tribute to the world-wide fame he has acquired."

Lava.

M. Sivestri's analysis of the lava recently thrown out from Vesuvius shows that out of 100 parts, 39 consist of silica, 18 of line, 13 of protoxice of iron, 2 of water, and 1 of potasn; or in other words, the specimen he examined closely resembled common wine bottle glass. A considerable variety appears to prevail, however, in the constitution of lava, not merely when we compare specimens which have come from different vents, but when the comparison is instituted between masses of lava poured torth from the same vent at different epochs. The lavas which flowed from Vesnyins before the mountain had fallen into the state of quiescence described by Strabo contain disseminated crystals of leucite, a mineral which is very rarely found in the modern lavas from this vent. in general the latter are less crystaline than the older forms of lava. Indeed, the old lavas which flowed from Vesuvius (or Somma, as the ancient volcano was named) indicate a decided tendency to a columnar structure, corresponding to what is seen in the Giant's Causeway, the Isle of Staffa

It is a remarkable fact that the lavas of Vesuvius contain a greater variety of minerals than perhaps any other in the world. Hany mentions that out of three hundred and eventy sin ple minerals known to him, no less that fighty-two have been found on Vesuvius; and these several are peculiar to the locality Sir Charles Liell expresses the opinion that there have not been thrown up in fragments from some other formation, through which the gaseous explosions have burst, but have been sublimed in the crevices of lava, 'just as several new earthy and metallic compounds are known to have been procured by fumeroies since the eruption of 1822."

-The Erie Railroad, within the past few months, has laid down 9000 tons of steel rail. -The first sewing-silk factory in America was erected at Mansfield, Conn., in 1810.

-The Lawrence factories have a free read ing room and a library of five thousand volumes.

IMPORTANT TO MASPERS OF COASPING VESSELS.

The Treasury Department, in a communication received at the Custom House in Baltimore, has decided that under the eighteenth section of the act of February 18, 1782, all masters of coasting vessels trading from one collection district to another must be provided with a manifest, and if they fall to be thus provided when called upon to exhibit one by a customs officer, they are liable to a penaity of twenty dollars; but if coasting vessels confine their trade and trips to the home district, there appears to be no provision of law requiring their masters to have a manifest; it must be understood however, that the provisions of said section of said set do not apply to coasting vessels emiloyed on the northers, northesastern, or northwestern frontier, the masters of suca vessels being subject in the matter of manifests to special statules.

Under the above decision it will be well for all consting vessels to be provided with a manifest even when they are not required by law to enter and clear at the custom houses.

MOUNT MORIAH. embracing an area of one hundred and fifty-five acres, and comprising every various of scenery, is by far the largest and most beautiful of all the cemeteries near Ph.ladelphia.

As the tide of improvement tends northward, MOUNT MORIAH. by geographical position, is

At a convenient distance from the city, readily access ble by an excellent road and by the street cars of the Darby Passenger Railway, Mount Moriah, by its undisturbed quiet, fu fils, the solemn purpose of its dedication as a last resulug-place of the dead. No funeral service here is ever interrupted by the shrill whistle of the locomotive, nor the sensibilities of friends or visitors shocked by the rush and rattle of long trains of passing freight or coal cars, as must of necessity be the case in other burial-places, now established or projected, on the immediate line of steam railroads, or through the grounds of which such railroads run. Just now the hues of Autumn tinge with gorgeous colors and infinite variety the fellage of the various groups of fine old forest trees adorning the margin of the stream which meanders through the grounds, and adds so great a charm to the attractions of the place,

Churches of all the principal Protestant denomina tions have here purchased sections of ground for the use of their congregations, and more than seven thousand families have given this great Rural Ceme tery the preference over all others.

NEW GOLDEN EAGLE FURNACE.
This is an entirely new heater. It is so constructed as to at once commend itself to general favor, being a combination of wrought and cast from. It is very simple in its construction, and is perfectly alright; self-cleaning, having no pipes or drums to be taken out and cleaned. It is so arranged with upright flues as to produce a larger amount of heat from the same weight of coal them any fornace now in use. The hygrometric condition of the air as produced by my new arrangement of evaporation will at once demonstrate that it is the only Hot Air Furnace that will produce a perfectly healthy atmosphere.
