Prof. Prof. G. I. Riche was called to the chair. Mr. Riche stated that the object of the meeting was so well understood by these present that he would not cousume time by any lengthy remarks, but would simply state that the committee appointed to secure the testimonial had invited F. F. Christine, Esq., of the Rittenhouse Boys' Grammar School, to deliver the presentation speech. A committee, consisting of Messrs, Shoch, Sterling, and Stephens, was appointed to invite Mr. Suppen to a seat on the platform. Mr. Christine then made the presentation speech which was responded to by the recipient. The offering consists of a clock in bronze and marble, surmounted by a tigure representing History. miscs that Torkey will withdraw the last point | shallow waters. It appears, indeed, that, so of fer ultimatum touching the observance of international law. The Conference maintains the policy of strict non-intervention.

PARIS, Jap. 17 .- The Turkish Minister bas agreed to the main policies of the settlement proposed by the Conference, but awaits instructions from Constantinople before signing the resolves of that body.

Rangabe, representative of Greece, has in ormed M. Lauslette, the French Munister of Foreign Affairs, that his instructions from the Government at Athens are delayed in consequence of an intercuption of the telegraph. The latest advances from Athens show that preparations for war ary actively going on iu all paris of Greece. The backs of Athens have loaned the Government \$20,060,000 for war purposes.

LONDON, Jan. 16 .- Charles Dickens publishes a card in the London papers of to-day, denying the story of the recent death of his brother's widow in Chicago. He says: - "The how is still alive and well, resides in England, and never was in Chicago." He bimself is the trustee of her estate under settlement.

The final signing of the treaty for the settlement of the Alabama claims has elicited favorable comments from nearly all the London papers to-day.

A neeting of those favoring the ballot in Parlian entary elections was held in this city last evening. Able speeches were made by Milner Gibson, Charles Buxton, Edmund Beales, and others. The assemblage was large, and much enthusiasm was manife-ted. LONDON, Jan. 17.-Despatches from the East

report that a difficulty has arisen between Turkey and Persia, Disturbances have taken place upon the eastern frontier of Asiatic Turkey, between the Toras and Persians, which have led to the withdrawal of the ambassador of Turkey from Teberan. Since these occur iences Persia has been massing troops on the

northwestern frontier. BREMEN, Jan. 16.-On February 1 a money order system between the large towns of North Germany and the United States will be inaugurated. The arrangement will be similar to those already made by the American Post Office Department with the Government of Switzerland, except that on the American side the business will be done by the North German Lloyd instead of the post offices, the Post Office Department having declined to enter into the arrangement.

FLORENCE, Jan. 16 .- Bicts occasioned by attempts to collect the mill tax have been renewed recently in various parts of the kingdom. The country to day, however, is tranquil. didates. MADELD, Jan. 17 .- Additional reinforcements or the army in Cuba will soon sail, under General Pelacz. Returns from the provinces increase overwhelmingly the majority of Government candidates elected.

Last Year's Corn and Cotton Crops.

The Department of Agriculture furnishes estinates, in detail, of the corn and cotton crups of

last year, as follows: Corn—We are unable to figure out the thou sand millions of bushels promised by sunguine calculators. A handsome increase upon last year of 137,000 bushels, it not all that could be desired at the present time, affords an aggregate of 67,000,000 larger than in 1859, without including the Pacific States, which are unsuited to ccrn production, but a decrease in proportion of the entire production, and an increase of about sixteen per cent, in nine years-a good result, though barely abreast with the increase of ropulation.

The following is the estimate:-

far from being lifeless, the deep sea bottom teems with animal life and with oreatures of a very remarkable kind, some of which connect long past geological periods with the geological action going on in our own time. The high importance of this fact will be manifest to all who have studied the question from a scientific point of view. And now fresh corroboration comes from abroad. The soundings and dredgings under the United States' Coast Survey were resumed last year; and though, through interruption by yellow fever, the season was but a short one, the fact was clearly ascertained that, in the sea between Key West and Havana, "animal life exists at great depths in as great diversity and as great an abundance as in shallow water." And in the exploration in the present year the dredge brought up, from a depth of 517 fathoms, "a very handsome Mopsea, a crab, an Ophinrian, and some annelids."

-At the close of the year we may note how the work of some of our antiquarian societies stands. The Early Euglish Text Society has its last book of the Original Series for 1868, Part III of "The Romance of Mer-" all printed; in its Extra Series it is still lin. behindhand; only two-thirds of Chancer's Proze Works, Part I (Mr. Ellis' "Treatise on the Pronunciation of Chancer and Shakespeare") being in type; and Part II, the "Boethins," though all in type, not being wholly revised and prefaced; but Mr. Gibbs "Chevelere Assigne" is ready, and Mr. Sheat's "Havelok the Dane" will be ready the first week in January. The Chaucer Society has four of its six texts of "The Prologue" and "Knight's Tale" finished, and the other two in type, with Mr. H. Ward's side-marks. showing exactly what lines of the "Knight's Tale" are translated, what paraphrased, and what imitated from Boccaccio's "Tesside." Mr. Hoets' translation of Professor Rbert's review of Sandras' "Etude sur Chaucer" is also in type, and Mr. Brock's edition of the "Treatise on the Chilindre" 18 Latin nearly ready. For the Ballad So-ciety the first part is nearly ready of Mr. Furnivall's "Ballads from Manuscripts on the Condition of England during the Reigns of Henry the Eighth and Edward the Sixth, including the State of the Clergy," with a long introduction inquiring whether Mr. Froude or the contemporary Ballads are right as to the prosperity or misery of the people. The second part of the same volume is half in type, and contains ballads on Wolsey, Anne Boleyn, Queen Elizabeth, Buckingham, Essex, etc. Richard Williams' "Poore Man's Pittance" is also in the press; three poems on Campion, Essex, and the Ganpowder Plot; "Captain Cox, his Ballads and Books," or a reprint of Laneham's famous Kenilworth Tract, is to follow. The Roxburghe collection and the Civil War Ballads will begin, it is hoped, in 1869. The Roxburghe Library's last volume for the yearthree fare tracts; one on Serving-Men, illustrating the social state of England in Elizabeth's time-is just ready.

Foreign Affairs.

HAVANA, Jan. 17.-The neglect of the Ameri-can and English Ministers at Madrid to arrange a reciprocity treaty concerning tonnage dues which Spain conceded in June last to all nations, and the advantages of which are at present enjoyed by all excepting American and English vessels, causes American ships an additional expense of \$1 per top, thus injuring American commerce. Letters received here state that General Grant and President Johnson are both positively in favor of Cuban independence, and that Grant promises to aid in securing that end after his inauguration.

Commerce is languishing, and distrust and suspicion of the stability of certain houses are increasing. The notes of the Spanish Bank are quoted at four per cent. di count. The bank is oaily besieged by people attempting to obtain money. The President of that institution died Sesterday.

HAVANA, Jan. 16 .- The Bank del Comercio known as Feesel's Back, which for some time past been in a weak condition, suspended pay-

ment yesterday. The habilities are heavy. PARIS, Jan. 16, -- Another session of the Con-ference was held to day for the purpose of affording an opportunity for the members to sign a declaration of their opinions. The public newspapers of this evening say the declaration asks of Greece, for the interests of European peace, to suppress the bands and vessels in-tended for incursions into the neighboring States of the Ottoman Empire, and counsels Tarkey to withdraw her ulimstum. It concludes by expressing hopes of the speedy renewal of diplomatic relations between Tarkey and Greece

-The Cambridge Local Examinations of girls make rapid progress. Six new local centres have been added to the former ten, and the number of candidates, which was last year 232, is this year 401, consisting of 160 seniors and 241 juniors. It has been remarked that the proportion of seniors to juniors is much greater among girls than among boys, being two or three in the case of girls, and less than three to sixteen in that of boys. In London the number of candidates has increased from 62 to 136.

-Has it yet been settled, asks the London Athenaum, in what year women were declared incapable to sit in Parliament, in the face of the early summonses to them to do so ? We note in the "Rolls of Parliament," iv. 270, that in 1425, Roger Hunt, for the Lord Marshal, says that to a woman "no place in Parlement myght apperteyne." The passage is: -"And as tochyng ye vie Article allegged by the said Sir Wauter Beanchamp, Kuyght, that makyng mynde that the place in Parlement of the Eris of Arundell, which is not of the blod Riall, hath he ever above the Erls Mareschal. To whiche Article the said Roger seith, that of all tymes with-oute mynde, the Erlse of Norfolk, Mareschall of Englond, have seten in Parlementes above Erles of Arundell; but for as muche as Thomas of Broyerton, Ecl of Northfolk, Mareschall of Eugland, had issue Margaret, his heir, Conntesse of Northfolk, to whom no place in Parlemont might apperteyne, by cause she was a woman, and Thomas, fadre to his Lorde, nowe Erl Mareschall, com never in Parlement after the decease of the said Margaret, whos heir he was, both to the armes and to the heritage.

-Facts are multiplying in disproof of the late Prof. Edward Forbes' theory that the depths of ccean would be found devoid of life and color. More than fifty years ago General Sabine witnessed the bringing up of a living star-fish of large size from a depth of 800 fathoms in Baffin's bay, and since then other evidence, similar in kind, has been brought forward by Dr. Wallich and other investigators. The latest facts bearing on the question, gathered by Dr. Carpenter and Dr. Wyville Thomson, were laid before the Royal Society last week, when Mr. Gwyn Jeffreys stated in confirmation that shells brought up from his deepest dredgings, off the Shetlands, were as brightly colored as those found in
