difficulty in procuring details, so that we are still without reliable particulars. LONDON, Jan. 27.—Official despatches have been received by the War Office from New Zealand. At Biracoa everal chiels gave themselves up and were par doned. Other accounts from the interior, received through Spanish channels, represent that the insurgents are surrendering at many points, to receive the bench's of General Duice's proclamation; but in the victaity of Santiago the rebels continue very active. They carry off slaves and, harass the troops, and it is reported that they have destroyed by fire half-a-dozen large p antations near the town.

HAVANA, Jan. 27, via Key West, Jan. 27 .- A reign of terror has commenced in this city caused by open hestility between Caban and Spanish factions, whose haired for each other cannot be described. There is httle security outside the city walls. The Cubans from their housetops fire upon the volunteers and soldiers passing through the streets. The military enter 2the houses from which shots are fired and massacre the inhabitants. The attack made by the volunteers on the Louvre codee house is denounced as brutal and unprovoked On the same night the volunteers should "Kill Dulce," because he was known to be taking measures to put a stop to their excesses. The velunteers by their behavior provoke the resistance of the people, and then fire into them

indiscriminately. The officers and men of the regular force are opposed to giving such discretionary powers to the volunteers. The older volunteers behave well, having become somewhat accustomed to discipline. The conduct of the 1st Battalion during the Louvre affair and afterwards is especially praised, but the newly recruited volunteers are unrestrainable. Many private persons, citizons, strangers, and foreigners, have been fired upon in different parts of the city. The Government is taking measures to put a stop to the disorder. The houses of suspected persons are being registered by the police, and the Government will also make special, and it is hoped effectual, efforts to protect American citizens.

Pensions and Female Pensioners. WASHINGTON, January 27.

Furing the morning hour to day the House was engaged in discussing a bill relating to the operation of the Pension laws. The debute centred on the second section of the bill, which provides that upon the presentation of satisfac-tory evidence to the Commissioner of Pensions any female pensioner is living a life of thut prostitution, or is cohabiting with or living with or being supported by any man as his wife or mistress, to whom she is not lawfully married, shall be deprived of her pension, except she can produce satisfactory rebutting evidence that the charges preferred against her are not true. General Scheack characterized the bill as the most infumous and disgraceful measure ever brought into Congress, Mr. Ingersoll, of Vermont, said the bill should include male prostitutes as well as female. By inference, it proclaims that the widow of every soldier is a common prostitute. The debate relating mostly to prostitutes, occasioned considerable merriment in the House.

Important Arrests.

Rochesster, N. Y., Jan. 27.-There is con-siderable excitement here to day in consequence of the arrest of Albert Hyatt and five other persons, some of whom were always considered among our best citizens, for alleged conspiracy to defrand and swindle the Union Life Insurance Company of Maine. It is ascertained the rapped Company of Maine. It is ascertained the plan adopted by the gaug, and which has been successful to a considerable extent, was in producing bogue certificates of the decease of insured parties. The extent of the frands has not yet oven made public.

Death of Ex-Governor Pickens, of Gierergette.

Augusta, Ga., Jan. 27.-Ex-Governor Pickens, formerly Minister to St. Petersburg, diel on Monday last, at his residence in Edgefield, S.C.

ness of the branch mint at Carson City, Nevada was received yesterday. The receipts at the Mint in this city, for the three last fiscal years, from the coinage of gold and silver, were \$218,067 in gold, and the expenses \$637,830 in currency; the average anunal expenses over the income for the past three years have been \$339,\$21. During the same period the amount of minor collage manufactured and issued was \$4,239,495; expense of manu-\$4,239,495; facture, \$21,342,032; the income over expenses, estimating these coins at their nominal value, being \$2,897,462, of which \$2.875,000 has been paid into the Treasury, the annual average income from the source being \$065,820. The receipts of the United States Assay Office for three years were \$188.74, and the expenses \$400,301, and the average annual expense over the income being \$93,853. The incepts of the branch mint at San Francisco for three years were, in gold, \$166,577, and the expenses, in gold, \$638,829, and the average aunual expense over the income being \$63,888. The expenditures of the branch mint at Denver since the date of its establishment in 1862 were \$235.611, and the total receipts only \$9513. A buil to transfer this institution into an assay office wa transmitted to Congress in February, 1867, and a similar bill has again been sent in during the present session, to which the attention of Conress is called.

The expenses of the branch mint at Charlotte N. C., opened as an assay office in 1867, have been \$5321, and the receipts only \$2435. The ecretary recommends that the branch mists in North Carolina and Georgia and at New Orleans be disposed of to the best advantage. The total cost of the branch mint at Caston City. Nevada. including machinery and fixtures, was \$276 187, of which amount \$250,000 has already been appropriated by Congress. It is not thought that a branch mint, complete in its appoint-ments, can be crected on the Pacific coast at an expense of much less than the cost of this establishment. The production of buliou in Nevada is chiefly silver. Silver is only coined for purposes of change, and all silver being exported in bars, the coinage in Nevada must therefore con-ist chiefly of the gold bullion produced in that State, which is estimated at \$1,000,000. In 1864 an produced in that State, which is estimated at \$1,000,090. In 1854 an act was passed establishing a branch mint at Dallas City, Oregon, and \$100,000 was appropriated for that parpose. The plans have been prepared, and work is soon to be commenced, and it is possible the building fixtures will cost as much as the branch mint in Nevada. In conclusion, the Secretary expresses the hope, so frequently made proviously, that no more branch mints will be authorized by Congress. Two mints are located in the Atlantic one in the Pacific States, which are suffi cient to supply the coinage for the whole country. All other similar establishments require not only the erection of expensive buildings, but large annual appropriations for their maintenance, without returning corresponding benefits to the Government.
