In accordance with his recommendation, the Surveyor of the Port was requested by the Secretary to send to him was requested by the Secretary to send to him the names of such inspectors as could be dis-pensed with. This officer did so, and the Secretary made a like request of the Collector, who, instead of reporting to him the names of such persons as should be dispensed with, informed the Secretary that he had dis-continued twelve inspectors. The Secretary, in September last, wrote the Collector a letter disapproving his action, and directed him to restore them to duty, reserving for future consideration the subject of reduction. The Surveyor was instructed to remain on duty the inspectors who had been discontinued by the Collector, and the Collector was then directed to discontinue the service of the twelve inspectors named by the Surveyor. On November 20 the Collector reported that he had dismisse twelve inspectors, but instead of dismissing the twelve named by the Surveyor he had substituted the names of twelve others, in violation of the instructions of the department. Upon the reception of the Collector's letter stating the action he had taken, a letter was sent to the Surveyor to discontinue the twelve inspectors named in the department letter to the Collector, and reinstating all the others until the department approved the removals, and the Collector was informed that his action was disapproved by the Secretary. In December the Surveyor reported that the Collector refused to pay the inspectors whose dismissal the department had disapproved, and on December 11 a letter was

NOTICE.—THE UNDERSIGNED

would call the attention of the public to his

NEW GOLDEN EAGLE FURNACE.

This is an entirely new heater. It is so constructed as to at once commenditiell to general favor, being a combination of wrought and cast iron. It is very simple in its construction, and is perfectly airtight; self-cleaning, havingno ripes or drums to be taken out and cleaned. It is so arranged with upright flues as to produce a larger amount of heat from the same weight of coal than any furnace now in use. The hypometic condition of the air as produced by my new arrangement of evaporation will at once demonstrate that it is the only hot Air Furnace that will produce a perefetly heatthy atmosphere.

Those in want of a complete Heating Apparatus would do well to call and examine the Golden Eagle, OHARLES WILLIAMS.
