

Grand Exposition at Wannamaker's New Clothing House.

Spring has at last opened fairly. The weather is warm, pleasant, and cheerful. Heavy and oppressive frosts, which for months, are now to be far away...

The large show windows are filled with choice fabrics, selected from the immense stock of cloths, silks, and light-colored materials. The windows are devoted exclusively to children's clothing, and a beautiful wax figure of a little boy in a complete spring outfit is the centre of attraction...

On the upper left hand of the ready-made clothing department is a space allotted to gentlemen's furnishing goods. The stock is well selected, and as fine as can be had, including neckties, collars, cuffs, cravats, canes, umbrellas, valises, and all toilet articles...

Immediately in the rear of the ready-made clothing department is the dome, which is set apart especially for custom work. Large tables filled with specimens of the various styles of ready-made clothing are placed around the dome. Two mammoth looking-glasses at the east and west ends aid in increasing the effect...

The opening yesterday was quite a success. Between the hours of nine and twelve, a number of our most influential citizens, with their wives and children, visited the handsome clothing mart, and admired the facilities with which it abounded for supplying the wants of the community.

WHAT IS DYSPEPSIA?

1. A Constant Pain or Uneasiness in the Pit of the Stomach, which is caused by a permanent contraction of the stomach upon undigested food. It generally begins immediately or a short time after eating; is generally very severe and obstinate.

2. Flatulence and Acidity.—These symptoms arise from the indigestion of food, which ferments, instead of digesting.

3. Costiveness and Loss of Appetite.—These symptoms are the effects of the unnatural condition of the food in the stomach, and the want of pure bile and gastric juice. The stomach is often painfully distended by wind; the appetite is sometimes voracious.

4. Gloom and Depression of Spirits.—This state unites many for the enjoyment of life, and is caused by the impure blood furnished by imperfect digestion. In this stage of the disease many persons commit suicide. There is a constant foreboding of evil, and an indifference and positive inability to perform the offices of life.

5. Diarrhoea.—After being at first costive, the sufferer is afflicted with diarrhoea, which is owing to a diseased condition of the bowels produced by the undigested food, which is evacuated in the same condition as when eaten, and, of course, gives no strength to the system.

6. Pains in all parts of the System.—Arise from the action of impure blood upon the nerves. They are felt chiefly in the head, sides, and breast and in the extremities. In many cases there is an uneasiness in the throat, with a sense of choking or suffocation; the mouth is often clammy, with a bad taste and furred tongue.

7. Consumptive Symptoms and Palpitation of the Heart.—Many persons pronounced as having these diseases, have, in fact, nothing but Dyspepsia, the lung and heart disease being only symptoms.

8. Cough.—This is a very frequent symptom of Dyspepsia, and leads very often into confirmed Consumption.

9. Want of Sleep.—A very distressing symptom, resulting often in mental derangement.

10. Symptoms of External Relation.—The patient is affected painfully by cold and heat, which is owing to unnatural dryness of skin, and the skin is often affected by eruptions and tetter. The gloomy dyspeptic avoids society as much as possible.

11. Vomiting.—A frequent and distressing symptom. It relieves the pain, but evacuates and weakens out the patient.

12. Dizziness, Dizziness of Vision, Headache, and Staggering in Walking.—These are very alarming symptoms, which are speedily removed by our medicine, but if neglected are quickly followed by numbness and sudden death.

13. It is impossible for us to give all the symptoms of Dyspepsia in so small a space, but the above are considered sufficient. If we add, that the patient loses his memory and regard to surrounding objects, and frequently becomes morose and sour in disposition. We should say, however, that pains in the joints and stiffness of the limbs, which go by the name of Rheumatism and Neuralgia, are produced by Dyspepsia. Also, a hardness of the muscles of the abdomen, which becomes contracted and hard; and in some cases the belly sinks, instead of being gently prominent.

A touch of the Dyspepsia has changed a man's whole life, and an irregularity of the bile has made many an angel almost a fiend. If the gastric juice is all right, and the blood in swimming order, the world is a nice, bright, pleasant place; but if in that queer, mysterious fluid there is an alloy, the sky of life is all cloud, the winds howl, and everything is dark and dismal. If you want to feel happy, look after your digestive and circulating systems.
