PLACED OUTSIDE OF BUILDINGS !! FERRIS & CO.'S

AUTOMATIC GAS MACHINES

Have been in successful operation for eleven years, and in all cases given perfect satisfaction. The light is much superior to that of city gas, at much less cost. The many accidents arising from the use of KEROSENE and COAL OIL LAMPS and worthless gas machines should induce persons to adopt a safe, economical, and satisfactory light. The simplicity of our machine, its slow motion, its superiority over all others on account of its REVOLVING evaporator, which takes up all the carbon from the material, and the fact that it will run for years without cost for repairs, recommend it above all others in the market. The machine can be seen in operation at our Office, where explanations and references will be given.
