The forty-second annual meeting of the Tract Society was held yesterday afternoon. Samuel H. Perkins, Esq., was elected President, Thomas A. Robinson, Secretary, and David W. Prescott Treasurer; also, thirty-five Vice-Presidents. The Treasurer's report was presented, showing receipts for the year amounting to \$7140.83; expenses, \$7047.25. During the same period the society distributed 516,434 tracts printed in English; 90,723 in German; and 1503 in French. They likewise distributed among sailors and watermen along the Delaware and Schuylkill fronts 39,333 tracts, in different languages, and 900 religious books and 96 Bibles donated to the destitute. "An Analytical History of India," by Sewell, and "A History of Ancient India; Literature, Architecture, and Commerce," by Mrs. Manning, with "Notes on the Northwest Provinces of India," by a District Officer, are forthcoming works on most important subjects. Not less important, but in another way, is a promised and long-wanted work, "A Geography of India, for the Use of Schools and Students."

—The Abbe Urbain Magnard is writing (in

the Bibliographic Catholique) the lives of all the Academicians of the French Academy, in the order in which they have occupied the respec-tive chairs. The Abbe is now at the thirty-first chair. When he has finished the other ninc seats, it is hoped that these biographical chapters will be published in volumes, as they will contain a complete history of the Academiclans. There was no lack of eccentrics among them. One of many was the Abbe Regnier du Marais (called, from his obstinacy, Abbe Pertinax). When he and an equally obstinate scholar had been quarrelling for an hour, a lady who was present exclaimed, "Eh! gentlemen, do agree about something, let it be never so absurd.

-Dr. Cullen, of Kustenji, has communicated to the Levant Herald the following inscription-

It was found, about a year ago, in the sand of the sea-shore, near Kustenji, the ancient Con-stantia, and consequently near the wall which ran from the Danube to the Black Sea, pretty much in the same course as the Danube and the Black Sca Railway now does. The inscription was on a bronze plate, nine inches by six, en-graved within a shallow border. Dr. Cullen states that this good-conduct discharge is remarkable as being of the time of Vespasian, and being a Practorian guard's diploma, of which Cardinali only records four, and those all of later date. The other class, given to troops of the line and auxiliaries, is more numerous; and there are nearly forty of them, ranging from Claudius to Maximus. Dr. Cullen points out as peculiar the words tribuo and subject, instead of the subjectmus of the later forms, Vespasian not having adopted the imperial plural style for these downments. Dr. Cullen has paid much attention to the archæology of the Lower Danu-

To PIANOS.—It will be welcome news to the musical public that Steinways have succeeded, by the most gigantic improvements, in raising the Upright Piano from its well-known state of imperfection to that of the most perfect amongst the different shapes of pianos. The Upright Piano of Steinway & Sons now is more durable, keeps better in tune and in order, has more power, a purer and more musical tone, and a better touch than the square piano, and rivals in most of these points even the Grand Piano. Its advantages are so plain and striking that the most prejudiced squants this shape of a piano are converted by examining them: and out of twenty who want to buy a Square Piano, nineteen prefer now already an Upright one of S. & S. Purchasers will do well to examine them, at the warroom of BLASIUS BROS.
