CITY INTELLIGENCE. THE PUBLIC BUILDINGS.

A Meeting of the Building Commission—A Model of the Buildings Ordered to be Constructed. At 11 o'clock this morning the Public Building

At 11 c'clock this morning the Public Building Commission met in their room in the new Court House, President W. S. Stokiey in the chair.

The President stated that the meeting had been called for the purpose of considering a communication of the City Controller, asking for estimates of the expenses, the amount of revenue, and the amount that may be due on the 1st of January next, over and above the appropriations of the Department.

ment. Mr. Spering, after making a few remarks, offered that the following reply be sent:—
George Getz, Esq., City Controller—Dear Sir:—In compliance with your note of request, dated October 18, 1866, I would state that the amount required to carry on the business of the Commission for the year 1870 will be as

Item!. The first annual instalment towards the erection
of public buildings, \$300,000, as per ordinance approved
December 31, 1899.
I would further state that we have no source from which

Twonld further state that we have no source from which any revenue may be derived.

There will be no deficiency in the appropriation for the year 1889.

Yours, very respectfully,
W. S. STOKLEY,

President Building Commission. Mr. Robbins suggested that, as the ordinance provided for the amount, Mr. Spering strike out his amount of \$300,000 and insert one-tenth of one per

amount of \$300,000 and insert one-tenth of one per cent of the taxable property in the city (\$460,000). Mr. *Walter considered that the first year's ex-penses would be the least that would be incurred, and he believed that the smallest limit fixed by the ordinance (\$300,000) would be sufficient for all pur-

General Wagner thought as this was a special tax, and that as the unexpended amount at the termina-tion of the year would not be merged for any other purpose, the maximum amount, one-tenth of one per cent. (\$460,600, should be asked for.

After further discussion, the amendment of Mr.

Robbins was agreed to.
Mr. Walter said that the Committee on Plans and Architecture considered that it is necessary to have a model made, and they agreed to employ a person at an expense not greater than \$750. They found a person who was willing to do the work for \$500. They think they have no right to make any such arrangements without authority from the commis-sion. The plans are being drawn as rapidly as The horizontal sections have been decided upon

by the committee, and the architect is engaged upon the elevations. Now is the time to begin the conthe elevations. Now is the time to begin the construction of a model. Such a representation of the buildings would convey a far better idea of what it is intended to construct, than any drawings could. The Committee therefore ask that a resolution should be passed as follows:

Resolved, That the Committee on Plans and Architecture be authorized to have a model made of the plans for the new public buildings, provided that the expense shall not exceed the sum of \$750.

After some objection being interposed by Mr. Billington, who conceived that the commission should have the plans first completed and agreed upon, Mr. Walter said that the committee believed that the model should be made, so that the commission could

oe, but also what the plans were.

Mr. Stokley asked whether it would be possible for
the plans to be completed prior to the time when
Councils would fix the rate of taxation for 1870. Mr. Robbins also inquired whether that was actually necessary.

Mr. Stokley did not think it essentially necessary

but he considered that the model would help the passage of the appropriation through Common Council. Council.

Mr. Walter suggested that the plans would be ready by the middle of December.

The resolution of Mr. Walter was then agreed to.

Mr. Spering, chairman of the Auditing Committee, presented bills, which were ordered to be paid.

RATIONALIST CONVENTION.—A convention of the gods and goddesses of infidelity, utilitarianism and gods and goddesses of infidelity, utilitarianism and atheism met to-day in the unfurnished uppber room (third story) of house No. 445 N. Fifth street. The meeting was opened by a request from one of the members that reporters should not interfere with the private and unimportant business of the convention. Archangel Robert Wallin then called the meeting to order with an appropriate address.

On motion, Infidel Cooper, ex-Irishman, was appointed Secretary.

On motion, finder Cooper, ex-trisminan, was appointed Secretary.

A report of the pecuniary losses of the Central Committee for the past year was read.

Resolutions were passed lamenting the loss of some hundred or more dollars, and calling for more general attendance of the public on the meetings and lectures connected with the course.

Supernumerary Walker, editor of the Chicago Liberal, addressed the meeting. The distinguished "Supe" gave a sketch of the progress of liberalism in the West. The want of a good library was noticed. Letters were produced from different cities asking for the employment of lecturers who shall devote the complete the progress of the complete the themselves entirely to travelling throughout the country, and in the end convert the world. Great reverence was expressed for the "great and good men" who have devoted their lives to the disaemination of liberal ideas. A more noble occupation could not be found. Young men out of employment take notice. A general desire was manifested on the part of the Convention to receive the learned gentleman's address with profound and silent respect. PENROSE FERRY BRIDGE .- We have noticed in the PENROSE FERRY BRIDGE.—We have noticed in the columns of the daily papers that an effort is being made to have the Fenrose Ferry Bridge torn away and a new one erected a short distance further up the river. A false impression is made upon the minds of the readers that this bridge is totally worthless; that the late flood has destroyed it entirely. We desire to correct this impression by stating that, with the exception of one pier and a single span, this bridge is as strong as any in the city, and at a cost not exceeding \$10,000 a new pier could be subcost not exceeding \$15,000 a new pler could be sub stantially built and the bridge repaired. The cost of erecting a new bridge would be at least \$400,000, and would not be of as much benefit as a bridge at the present site, as the road leading to Penrose ferry is now connected by roads and new bridges built across Darby creek and other small streams, thereby making a short route to the lower counties. The inconvenience that the residents south of this bridge are subject to at the present time should prompt alls to have the repairs made to Penrose Ferry

The Inman Line.—The following telegraphic despatch was received this morning by Messra. FIRE IN THE FIFTEENTH WARD.

Destruction of a Planing Mill and Sash Factory—Loss, \$7600.

This morning, about half-past 8 o'clock, an alarm of fire was sounded from the Green and Coates Streets Railway Depot. On proceeding to that neighborhood, the planing mill and sash factory of Messrs. Campbeil & Atkinson, a four-story brick building, on the west side of Twenty-fourth street, above Green, was found in flames, and despite the evertions of the firemen, was soon reduced to a exertions of the firemen, was soon reduced to a mass of charred ruins. The fire originated directly over the boiler, and so rapid was its progress that over the botler, and so rapid was its progress that the workmen employed in the upper stories narrowly escaped with their lives, a number of whom were compelled to leap from the second-story windows, and were considerably injured, one severely. From the main building the flames communicated with a roughcast building in the rear, occupied only on the first floor by Messrs. Ollis & Brother, wood turners; the roof and upper stories of this building were somewhat damaged.

The buildings were owned by Christopher Stiver, tobacconist, Third and Green streets, who leased them to a Mr. Albert Cook, who sub-leased them to the occupants named. The front building was valued at \$3000, upon which there is an insurance in the Fire Association.

Messrs, Campbell & Atkinson lose on stock and machinery about \$5000, insured as follows:—Mecha-

THE AMERICAN ASSOCIATION FOR THE PROMOTION or Social Science.—This association is formed for the scientific discussion of education, public health, economy, trade, finance, jurisprudence, and the amendment of the laws. It has local branches in Albany, with two hundred and fifty members in Bos-ton, with nearly as many in New York and in Washington, and a large number of members in other

places. In Philadelphia there are twenty-five members, and it is believed that there are many others here who would be glad to join the association, and advance its objects by their subscriptions and assistance. The co-operation of all who are engaged in the study of law, of medicine, of commerce, of education, of manufacturing industry, is sought, in the firm conviction that much practical good can be done by local associations, making part of a general

By thorough organization throughout the country substantial reform can, it is believed, be secured legislation, national, State, and municipal. A gentleman well known to our citizens is now engaged in securing members here. By signing the constitu-tion and paying a subscription of five dollars persons become members of the association, receive all its publications, and are entitled to take part in its meetings here and elsewhere.

New Method of Illumination,—The Reading Railroad Company, with the help of Professor Morton, have been experimenting with a view of lighting up their track at the Richmond coal wharves. The results thus far have been very satisfactory. With a single oxy-hydrogen light and a good reflector they were able to illuminate the road for the distance of one mile. It is proposed to use two such burners, to be placed on high towers, which will give all the light necessary. The jets and gas reservoirs have already been ordered. The region around the coal wherves is usually in total darkness. The gas for the light is to be furnished by a New York company, formed, who intend to manufacture oxyge by a new process and pump it into reservoirs for the small cost of five cents per cubic foot. The great decrease of expense will bring the oxy-hydrogen light into much more general use. It can be employed for lighting store windows, for parades, and the like. An agency is about being established in

ATTEMPTED INCENDIARISM .- About 11 o'clock last attempted incernitation.—About 11 octoos assing the an attempt was made to fire the row of new dwellings on Sansom street, above Thirty-fourth. Officers Greer and Rowe, whilst passing along Chesnut street, discovered a light in one of them, and on entering found that a lot of shavings had been piled up against the door and fired. A hole had already been burnt through the floor, and the door was in tames. It was specific wrested from its hinges and flames. flames. It was speedly wrested from its hinges and thrown into the street. On entering another build-ing the same state of affairs existed. Whilst crossng the lots the officers saw a man run from the mildings and jump into a Chesuut street car. For some reason unexplained they allowed him to

THE USE OF THE BLACKJACK.—Thomas Morris entered a drinking saloon, corner of Grape and Cresson streets, Manayunk, kept by one James Lodge, on Saturday hight, when he asked for drinks and lodging. SUICIDE.—As one of the Camden ferry-boats was about leaving Federal street slip, Camden, late on Saturday night, an unknown man, evidently intoxicated, mounted the guards and peafed into the river. The boat was stopped as speedily as possible, and a search made for the unfortunate man, but resulted unsuccessfully. The individual was doubtless laboring under an attack of mania-a-potu. Nothing was left behind him that might lead to his identification.

ATTEMPTED HIGHWAY ROBBERY.—Two good for nothing scamps named John Adams and John Heston were arrested about 4 o'clock on Saturday afternoon for attempting to steal a satchel from a lady who was passing along Ridge avenue, near Green street. Alderman Massey held the pair in \$1500 bail

Hearings at the Central Station,—Before Alderman Kerr, at the Central Station, this afternoon, were arraigned John Walsh, alias Long John, alias Scott, on the charge of being drunk and disorderly and having burglars' tools in his possession. John is a somewhat notorious hotel thief. The Alderman stated that he was wanted in Indiana to serve out an unexpired sentence, and would therefore hold him for a further hearing on Monday next.

Wm. Harris, colored, was charged with assaulting and robbing Moses Myers, residing No. 1240 South street, on Friday night last, of a pocket-book containing a promissory note for \$100 and \$1.55 in cash. The prisoner was committed to answer at court.

Edward Strange, charged with embezzling his emplyyer's funds, Mr. J. W. Proctor, No. 920 Chesnut street, was up for a further hearing. The prisoner confessed to have taken about \$500, and upon this was held in \$800 ball to answer at court.

THE NILE.

The Annual Inundation. The yearly inundation of the Nile has been even greater than usual this year. The London News

says:— "The Nile mud has fertilized the Desert sands and "The Nile mud has fertilized the Desert sands and drawn a belt of garden-ground all down the long course of the river, and the Desert atr has made the atmosphere the brightest and most salubrious in the world. But the struggle between Nile and Desert, sand and mud, drought and flood, has gone on with varied fortunes. Year by year the one anxiety of the Egyptian people, whether under a Pharaoh or a Khedive, has been the rise of the Nile. When it folleshed the Desert man was the west formers. falls short the Desert gains upon them, and famine stares them in the face; when it rises above its normal flood, it sweeps away their villages and drowns the fields it should fertilize. This year has been a year of excess. The river has risen to an un-usual height and flooded the cotton-fields. Hitherto an excess of water has been a smaller calamity than a deficiency; now, the new cotton culture has made an excess probably as much dreaded as a failure. By the last advices, however, we hear that the waters are subsiding, and that the cotton crop, which ias not yet sustained any fatal damage, will probably

THE NEW YORK MONEY MARKET.

The following extracts show the state of the New York money market on Saturday :-

From the Herald. "The week in Wall street has been full of incidents, and the various departments of business have shown interesting phases. Perhaps the most striking feature was the decline in gold to 120k—the lowest point touched since March, 1866. The downward movement in the precious metal caused considerable alarm among those who have been holders ever since the days of the panic, and was employed by the speculative fraterality for a rather successful raid upon the Government bond market. The de-cline was assisted by the curious position in which the culmination of the gold corner left the street. On the day that the price tumbled from 165, specula-tors who had capital enough to keep from bank-runtey found themselves all possessed of gold at ruptcy found themselves all possessed of gold at prices ranging from 185 upwards. The mability of the 'bulls' to take gold at the high figures of the eventful Friday placed the 'bears' on the other side eventful Friday placed the bears on the other side of the market; for they had bought gold to deliver which the buils' were unable to buy from them. The lowest point touched on the last day of the corner was 132%, which is therefore the starting point of the present decline. A few shrewd operators, foreseeing the effect of such a condition of affairs, sold for a further decline, and have therefore rallied the market by stages as it went down. The short interest at the present time is not large; for among merchants and business men who have for among merchants and business men wh for among merchants and business men who have conducted transactions on a basis of gold at 130, and above, it is difficult to dissipate the impression that gold is cheap at the prices of the week, and hence there was a great deal of buying, under which the price reached to 127%, and then fell to 126% at the close. The rates paid for carrying gold have been the best index of the fact that the outside purchases were very large.

were very large.
"Foreign exchange was steady and firm at the close, on the basis of 105% for prime bankers sixty day, and 100% for sight sterling bills, the difference of five-eighths per cent, in the two classes being due to the advance in the Bank of England rate of dis

e market for commercial paper was characterted by high rates, the dealings outside the banks being quite limited. Prime paper was singgish at ten to fifteen per cent. The suspension of a prominent gracery and liquor house was reported on Saturday, but their embarrassment is ascribed to speculations outside their legitimate line of basiness, one of the firm being a reputed operator in mining stocks.

mining stocks. "The money market was irregular, and the rate on call ranged from four to seven per cent. At the close on Saturday there was more steadiness at five

close on Saturday there was more steadiness at five to six per cent.

"The weekly statement of the associated banks reflects the movement of the crops, the supments of currency leading to a decrease in the item of legal-tenders amounting to over two millions of dollars. Innsmuch as the Treasury operations of the week in gold sales and bond purchases were in favor of the street, this loss is quite large, and exhibits the extent of the demand which the banks have been called upon to meet. The increase in specie through the Government sales of gold and disbursements of the November coin interest is over three millions; so that the banks actually gain a million in reserve. As the deposits have lucreased about two millions, the gain in surplus over the legal reserve is only half a million. The pressure for discounts is reflected in the increase of the Items of loads."

Banking Facilities.

Special Despatch to The Evening Telegraph.
WASHINGTON, Nov. S.—Secretary Boutwell, General Spinner and other Treasury officials have come to the conclusion that the volume of currency is inadequate to the wants of the country. The Secretary, therefore, is maturing a plan, which will be set forth in his report, to give the Southwest sufficient banking facilities.

The Death of Admiral Stewart. The order issued by Secretary Robeson, an-nouncing the death of Admiral Stewart, says his name is most intimately associated with the early glory of the navy, and his deeds have been and will remain bright examples for study and emulation to all its officers.

Senator Morton and Cuban Affairs. Senator Morton had a protracted interview with the President to-day concerning Cuban and financial affairs. Mr. Morton holds that the recognition of the Cubans as belligerents is a matter entirely belonging to the Executive, and he informed the President that as he has full authority to do so, if, in his judgment, circumstances warrant it. He should issue his proclamation at once, and not wait for Congress to

The New York Custom House.

There is considerable commotion about affairs in the New York Custom House. An effort is being made to get Collector Grinnell out, but it appears that there is nothing thus far to justify the removal of that officer. He arrived this morning, and had a long interview with the Secretary and President.

FROM NEW YORK.

A Fallure.

Despatch to The Evening Telegraph. NEW YORK, Nov. 8 .- The firm of A. Binney & Co., the oldest liquor house, probably, in the city, failed, this morning, for a large amount. They say that their assets are double their liabilitles, but their inability to get paper discounted forces them to suspend.

The Money Market. Money is easy at 5@6. Discounts extremely light, 12 to 20. This has already caused one failure-A. Binney & Co .- and creates much difficulty among mercantile men. Even the best paper is a drug in the market. Capitalists are feeling insecure of the action of the next Congress. Stocks and Governments are strong and irregular. Official Announcement of the Death of Admiral Stewart.

WASHINGTON, Nov. 8 .- The following Gene-

NAVY DEPARTMENT, Nov. 8, 1860.—The Department has the melancholy duty of announcing to the Navy and the Marine Corps the death

of Rear-Admiral Charles Stewart, the oldest and

one of the most distinguished of its officers,

after more than seventy-one years of service to

his country. He died in the ninety-second year of his age, at his residence in Bordentown, New

Jersey, at fifteen minutes past three o'clock on

the afternoon of Saturday, the sixth day of

November, inst. His name is most intimately

associated with the earliest glories of the Navy, and his deeds have been, and will remain, bright examples for the study and emulation of all its

He will be buried at Philadelphia, at 3 o'clock

on the afternoon of Wednesday, the 10th instant.

The flag will be displayed at half-mast at all the

navy yards and stations, and on all United

States ships of war in commission in our ewn

waters on the day of the funeral, and on all

United States ships of war in foreign waters on

the day of the receipt of this order, and thirteen

minute-guns will be fired at noon on the day of

the funeral at all the navy yards and stations where this order is received in time. The com-

mandant of the Navy Yard at Philadelphia will

also render to the deceased such further

honors, not inconsistent with regulations, as
