The party was greatly pleased, and highly complimented the Messrs. Bullock on their enterprise and liberality.

They then turned their attention to a large pigeon-house that stood in the yard, and carried off sixteen pairs of pigeons. CASE IN ADMIRALTY .- Before United States Commissioner Phillips this morning, a hearing was had in the case of Walter Scott against the schooner General Patterson, involving a question of wages for the plantiff, who was employed as a hand on an oyster boat. It appeared from the hearing that several legal processes had been before instituted in the case before other officers. As a record used in one of these cases was required, the hearing was continued until 2 o'clock to-morrow, that it might be produced.

FOUND DROWNED .- About 4:30 o'clock this morning the body of an unknown white man was found floating in the Delaware at Vine street wharf. Tidings of another terrible disaster of the deep are at hand, and its horrors akin to the many stories of suffering and death that of late have been chroalcled of the ocean's sad vagaries. It was the fate of the ship sunbeam-a good and true craft, built in Chelsea, Massachusetts, but at the time engaged in the Pacific Ocean trade-to be the victim of the latter disaster on the 31st of March last. She was destroved by fire eighty miles from shore, and bat twelve of a crew of eighteen saved. Captain Joseph Chadwick and his son, a youth

The Paris Troubles.

PARIS, May 11-Noon .- The trouble throughout the city last evening were much more serious than anticipated. The authorities were forced to make a large display of the military power to restore order. The barricades which had been erected in the Belleville district were stubbornly defended by the rioters, though they were subsequently earried by the soldiers at the point of the bayonet. Several were killed and wounded on both sides.

During the night other engagements occurred in which a number of soldiers, policemen, and citizens were killed. The Belleville district was occupied during the night by the military in great force and no persons permitted to pass. The police made several charges upon the crowds of people which had collected out of curiosity. In some cases they used their swords and slung-shots, whereby many were seriously wounded, mainly those who had nothing to do with the disorder.

AN OPEN LIGHT.

About noon of the latter date this officer, destrous of giving the upper deck a little neater appearance, suggested to the captain that he intended to varnish it, which, meeting his appre-bation, he foolishly procured an open light, and descended to the afterhold, where the article desired was conveniently stowed, and attempted to draw it; but it was the last act of ship's duty he ever did, as the flames of the lamp coming in contact with the fumes of the flowing varnish a terrific explosion occurred, and the demon fire with a hundred hands was working destruction on every side. In an instant it seemed to pervade the entire hold, and before the frightened and burned mate, with his clothes on fire, could reach the deck.

EXPLOSION AFTER EXPLOSION

was heard as the fire licked up the inflammable saltpetre, and the flames danced with glee up the hatch way. So sudden did the terrible truth break upon the crew that for a moment they were paralyzed the crew that for a moment they were paralyzed, but, looking around and realizing that beneath them was a secthing volcano, and the forked tongues of their enemy were working to every part of the vessel, creeping through the decks and climbing the masts, they must act. It was a critical second.

MEN LEAPED INTO THE SEA

and attempted to cling to the spars and boards they had already thrown overboard, but in vain for man of them. In ten minutes from the ignition of the of them. In ten minutes from the ignition of the varnish the mainmast was toppling, and in fifteen minutes it went over the side, and the gasp-ing, drowning men clung with life in view of its charred remains. When this had gone and the fire was creeping along the rigging to the foremast Captain Chadwick took his little son in his arms and jumped over the side into the ocean. Happily he took hold of a studding-sail boom, which saved his and his son's lives. So terrible was the the heat at this time that the faces of some of the men by the shin's side were blistered and cooked. men by the ship's side were blistered and cooked, and thus to change their positions and place their backs to the burning mass, six poor fellows dropped exhausted, and sank to rise no more.

GOING DOWN.

Twenty minutes from the first explosion the Sun beam sank from sight. It was fearful how the fire still kept creeping through the vessel. Varnish and saltpetre, thousands of sacks of the latter, sent the wicked darts of fire upward and around. Mast after mast fell, and about ten minutes past 12 o'clock P. M. on the Sist of March last, in latitude thirty degrees forty-four minutes about eighty miles from shore, the last bubbling his was heard and the noble craft of an hour before was a thing of the past.

THE WHALING BARK CHARLES W. MORGAN,

Captain Athern, then on a cruise, having seen the fire miles away, bore down to their position and took them on board, subsequently landing them at Talcahuano, Chile. From this place the party made their way up to Panama.

None of the names of the six lost have been divulged. They were the second mate, carpenter, steward, and three seamen. Perhaps their tragic fate may never be ascertained by their friends.

of Boston. It is understood that Captain Chadwick and son left this city for their home in Massachusetts last night.

Another Burning Vessel.

Captain Tingley, of the British brig Leona, ten days from Matanzas, arrived in New York last evening, and reported that on the 1st inst., in the Straits of Florida, he saw a vessel on fire. He could not get close enough to distinguish what she was, but she seemed to be laden with cotton. At the time a vessel was lying near her, and in his opinion the crew were in all probability saved.

A CARDINAL ON THE POPE.

Which is Infallible ?-Schwarzenberg on Papal Authority in Matters of Faith and Morals. From the Eastern Budget.

The first printed protest by a cardinal against the doctrine of the Papal infallibility has just been pub-lished at Naples, under the title of "De Sammi Pon-uncis Infallibilitate Personati." Its author, the Austrian Cardinal Prince Schwarzenberg, begins by guarding himself against the view that the oppoients of Papal infallibility are also the adversaries which, he says, is obviously unjust and uncharitable. He next proceeds to combat the argument in favor of Papal infaltibility of the Jesuit Bellarmin, and especially of Dr. Manning. In opposition to these arguments he brings for-

ward the following points:-1. A coctrine which is neither indicated in the Holy Scriptures nor in tradition so is to be at once recognized everywhere by all-and such a doctrine is that of personal infailbility-can never be a subject of dogmatical defini-tion. 2. The principal defect of the doctrine is that it gives the right of decision in matters of faith to the Pope alone, and thereby deprives of such right the other depositors of the apostolic office. 3. It should be remembered that neither the Pope nor the bishops are masters of God's Word; they are its ser-vants, and they must learn before they can teach. 4. Hitherto, as a matter of practice, all the Popes, including Flus IX himself, have always consulted the bishops, etc., before coming to any important religious decision: but this will be impossible if the Pope is made personally infallible, for in such case he cannot ask or accept advice. 5. What is to become of Papal infallibility if the Pope should fall ill in mind or body? if a long vacancy were to occur in the Holy See? or if, in consequence of a schism, the validity of the Papal election should be doubtful? The pamphies concludes by warmly urging the abandonment of the dogma of Papal infallibility as the only means of securing peace in the Church.

According to reports received at Vienna, a speech made at a recent sitting of the Council by Cardinal Prince Schwarzenberg created even a greater uprear than the famous one of Bishop Strossinayer. He than the famous one of Bishop Strossmayer. He said that the time for religious wars was past, and said that the time for religious wars was past, and that an epoch of conciliation was at hand. It was equally unchristian, unintelligible, and incorrect to place the Protestants in the same category with heathens and atheists. The Roman Church and the Roman bishops must accept a word of advice on this subject from the German and Austrian prelates. The latter are in daily communication with Protestants, and know them better than those who never see them or read their books. The presiding legate, Cardinal de Angelis, here interrupted the speaker, and a warm dispute between the two Cardinals enand a warm dispute between the two Cardinals en-sued. The President strove repeatedly, but in vain, to silence the Cardinal with his bell, and at length the bishops drowned his protests in a storm of hisses, in the midst of which the Cardinal was carr ed from the tribune, half fainting from excitement to his seat.

A member of the Ways and Means Comof a fraction over \$500,000. Mr. Morrill explained that the area to be included was one square on each mittee, who called upon him to-day states that side of the entrance in front of the Capitol. The amendment was agreed to without a division. the President expressed the opinion that it would be better to lay the Tariff bill aside and take up the Internal Tax bill.

He had no intention, however, of interfering with the legislation of Congress, except in a legitimate way. From conversation with mem-bers, he gathered that there would not be suffi-cient time to get the Tariff bill through the two houses. He intimated that it would be well to pass the second section of the bill, relative to the free list, and he did not think it would give rise to any debate. The Committee on Ways and Means are hard at work on the Tax bill, sitting night and day. As soon as they get it ready, they will report it, leaving it to the majority to say whether they will lay the Tariff bill

aside or not. The Telegraph Bill.

William Orton, President of the Western Union Telegraph Company, was before the Postal Committee of the House to-day, making

an argument in opposition to Washburn's telegraph bill. The Northern Pacific Ratiroad.

As soon as the journal was read to-day, Mr. Orth, of Indiana, one of the filibusters on the Northern Pacific Railroad bill, stated to the House that if the bill was referred to the committee, with amendments, they would cease making dilatory motions and allow the business of the House to proceed. Those in charge of the bill refused to accede to this. The House refused to order the bill to a third reading.

Continued from the Third Edition. PARIS, May 11 .- The police and rioters used firearms, but the troops made no general use of them. Once during the night a company of cavalry were assailed with a shower of stones, and becoming exasperated they fired on their assailants; but this is the only instance known where the troops have departed from their determination to use firearms only as a last resort.
