The New Structure-A Plan Agreed Upon by the Committee of Councils.

At a meeting of the Committee of Councils on House of Correction held yesterday, the following plan of structure was agreed upon, and will be reported to Councils to-day:-

The main building will have a brown-stone front, four stories in height. In the centre of the building will be a chapel, the roof rising far above that of the main structure. Upon each side of this connecting building are three wings, each about 200 feet long, standing parallel with each other, while at the rear end there projects on either side another wing, at an angle of 30 degrees with the main structure, the whole covering an area of over 500 square feet.

Northern Pacific Railroad. New York, June 1 .- The proposals for constructing the Minnesota division of the Northern Pacific Railroad, 223 miles long, were opened to-day. The number was extraordinarily large, and the competition between the bidders very sharp. It will take some time to classify the proposals. As soon as this is done they will be considered, and the acceptances made and declared. The most experienced railroad builders and contractors in the United States and in Canada were represented. The proposals for iron locomotives, cars, switches, etc. etc., embraced houses of the best reputation in the United States. The great work is to be put through with vigor, and the road, in its construction and equipment, will in every respect be first-class.

THE ASSEMBLY.

Yesterday Atternoon's Session. The Assembly met yesterday afternoon at the usual hour, E. M. Gregory presenting the report of the Standing Committee on Freed-men. Attention is called to the increasing ratio of black to white missionaries. The

committee believe it desirable that this increase should continue, and hence there is necessity for a special effort to train preachers and teachers for the freedmen.

The work of the board has largely increased during the past year: -Total funds received, \$52,997.22; total expended, \$49,029.10. Balance in treasury May 1, 1870, \$3878.12. The report was accepted.

The finance report was considered and an amendment made creating a committee of twenty-one to report at the next Assembly. That portion of the report which relates to

the five million fund was discussed at length. This fund is to be devoted to theological seminaries and colleges, including buildings and endowments for the same; literary institutions for the raising of a native Gospel ministry in heathen lands; church buildings and manses originating subsequently to the Union, and otherwise entitled to public aid; hospitals and orphan asylums in connection with the Church; institutions for the education and evangelization of the freedmen; special contributions for the increase of the Permanent Fund for the support of disabled ministers and their families. The report was

Pending the discussion of some secondary resolutions, the Assembly adjourned to meet this morning at 91 o'clock.

Incidentals.

-A Texas Historical Society was organized by ome of those present at the recent State Fair in Houston.

-Some leading citizens of New Hampshire are organizing a society for the relief and aid of those liberated from penal institutions in that —A gentleman in Ohio, who twenty-five years ago settled with his creditors for ten per cent.,

has just paid them all in full, with interest. -Virginia fears it will not be able to pay the interest on its public debt before the January, 1871, and will not be surprised if it can not before July 1, 1871.

-Wisconsin papers claim that Oconomowoc, about thirty miles from Milwaukee, is the most beautiful town in the West, and call it the fisherman's paradise. It is situated between two lakes, one emptying into the other over a fall of nine or ten feet, and within a circuit of a dozen miles are about twenty lakes, from one mile to three miles in length.

-The first mosquito story of the season comes from Maine. The Ellsworth American tells it, and it is to the effect that the mosquitoes are so numerous in Orland that three boys "concluded to see how many they could gather. They scraped them up and put them into a large-sized factory pail until it was crowded and heaped fail, and they judged they scraped off of the water and put on the ground and crushed more than two pailfulls more.'

ALARMING INTELLIGENCE FOR TALL MEN .-An amiable tribe in Hindostan, called Booteahs, among whom music is warmly encouraged, are ingenious enough to make trumpets out of human thigh bones. The invention is, says the Orchestra, creditable in a constructive point of view, but inconvenient to tall people; for as the Booteahs require long bones for their purpose, and the supply is inadequate, they are apt to keep an eye upon any goodly-sized neighbor, and impatiently wait until he shall have no further use for his own particular trumpet-material. An Indian newspaper, in reporting the sudden death of the jailer of Darjeeling, says a suspicion arose of his having come by his death by foul means, on the ground that, as he was a very tall man, the Booteahs had probably had poison administered to him. In the present case, however, a post-mortem examination showed that the jailer died of unsuspected abscess of the liver.
