NEWS SUMMARY.

City Affairs. -Hon. Leonard Myers was serenaded last night at his residence on North Sixth street, -An adjourned meeting of the convention of companies intending to participate in the reception of the Hope and Mechanic fire companies of New Orleans was held last evening at the Fairmount Engine house, with William McCully, of the Hibernia Engine Company, in the chair, and William McDevitt, of the Philadelphia Engine, as Secretary. The Committee on Arrangements and on Route reported progress. It was announced that the New Orleans firemen intended leaving that city on the 15th (yesterday), and that they would give at least twenty days' notice of their arrival. Credentials were received from seven additional companies, making the number represented forty.

Domestic Affairs.

-Gold closed yesterday at 1131. -The Pension bill has passed the Senate. -Hon. Sidney Parham is the Republican nominee for Governor of Maine.

-Mr. Whittemore, of cadetship notoriety, was upon the floer of the House yesterday. Several thousand persons were present at the Lincoln University commencement yes-

terday -Yesterday's internal revenue receipts were again considerably over a million. -The opening ceremonies of the Wilming-

ton and Reading Railroad occurred yesterday in the former city.

—Postmaster General Creswell has accepted the offer of the Cunard and Inman companies to carry the English mails for the sea

In the United States Senate yesterday, after the close of our report, the House bill to prescribe the mode of paying pensions was passed, with amendments. The Franking bill was discussed until adjournment.

In the House, the Cuban resolutions were discussed, and the previous question was seconded.

-Attorney-General Hoar has resigned, and his resignation has been accepted by the President.

Foreign Affairs.

-A satisfactory grain harvest is expected in Eastern Europe. Breadstuffs have advanced alarmingly in

Paris, owing to the drought. -Dean Stanley is to preach in Westminster Abbey on Sunday, on the late Charles Dickens.

-The directors of the Monarch Insurance Company, of London, have been committed for fraud.

-The infallibility dogma, including the anathema clause, has been adopted by the Œenmenical Council

-Scarcely any change has been effected by the elections in the Prussian Chamber, and a ministerial crisis is therefore antici-

THE CONVENTIONS.

The Balloting and Nominations. The following completes the proceedings of those conventions whose concluding deliberations were not contained in THE TELE-GRAPH of yesterday: -

WARD NOMINATIONS. Second Ward-Common Council, Andrew J. Hergesheimer; James E. Eaton, Joseph W. Schooley; School Directors, Thomas Nes-bit, R. H. Wevil, M. D., E. S. Redstreak, Davis Moore; Constable, James Seimers. Third Ward-Postponed.

Fourth Ward-Postponed. Fifth Ward-Adjourned until Tuesday

Sixth Ward-Common Council, Colonel Peter Sides; School Directors, William H. Wakefield, William Cooms, and William A.

Seventh Ward-Common Council, William Grier; School Directors, Robert Grier, John, Barr, and William Lynn.

Righth Ward-Common Council, George Schaffer; School Directors, Wesley Hartman, A. B. Waters, Theodore Barrett, and Joseph

Ninth Ward-Common Council, Walter Allison; School Directors, A. J. Bair, William Simpson, and J. J. Buchy; Constable; John

Tenth Ward-Select Council, William B. Hanna; Common Council, George W. Hall, Alexander Omensetter (for the unexpired term of William B. Hanna); School Directors, F. M. Pfouts, George Von Phul, Adam Matsinger, and John F. Pole (for unexpired term).

Eleventh Ward—School Director, Henry Arbuckle. Adjourned for the present.

Twelfth Ward-Select Council, Wm. E Littleton: Common Council, Joseph Edwards Adjourned until the call of the Chairman.

Walker; School Directors, Samuel Allen, John V. Green, Henry T. Hays; Constables, John J. Miller, Joseph E. Shaw. Fourteenth Ward—Select Council, Robert

Downing; Common Council, W. Fisher Mitchell; School Directors, John Haff, Wm. B. Webb, James McNichol.

Fifteenth Ward-Common Conneil, Henry Huhn, Egbert Nichols, Joseph Charlton; School Directors, Charles Brown, Joseph L. Caren, Jonathan Moore, Enos Harris, and Henry McAllister. Stateenth Ward-Adjourned without nomi-

nation. Seventeenth Ward - Common Council, Kennedy Brown; School Directors, Harrison Snyder, Wm. J. Roney, Victor Marshall. Bighteenth Ward—Common Council, Jo-

seph Mershon; School Directors, William Taxis, John Sidebotham, David Clun, James Wolfenden, James Fort, Joseph R. Black; Constable, L. Derr.

Nineteenth Ward-Select Conneil, William F. Miller; Common Council, Samuel A. Miller, Daniel Curry, Thomas B. M. Addis.

Twentieth Ward—Common Council, William

S. Allen, George Weidner, George Dorlan, James Dingey; School Directors, William H. Buck, William Griffiths, Simon Shugart, William Gurlager, William Buckley, J. H. Yearsley, Dr. John Huston; Constable, William Royal.

Twenty-second Ward-Select Council, James R. Gates, in place of W. F. Smith, resigned; Common Council, Louis Wagner.

THE FRANKLIN INSTITUTE.

The meeting of this association last evening was called to order with the president, Coleman Sellers, in the chair. After the usual business of minutes, etc., at the request of the president, Mr. Robert Briggs, who had just returned from a visit to Europe, gave a description of several matters he had there observed interesting to engineers. He spoke of the improvements in wood-working machinery, in iron furnaces, with special reference to stoves and heaters for the hot blast of gas works, and of the architectural improvements in Paris, which seemed to solve some of the most pressing social problems of the day. His remarks were of great interest, and were highly applauded.

The resident Secretary then read his report. which touched upon many interesting topics, and included a description of the reversible filter of J. A. Joseph, and the signal apparatus of W. W. Cooley and W. H. Deitrich.

A letter was then read from Prefessor Morton, tendering his resignation, as fol-

To the President and Members of the Franklin Institute—Gentlemen: Having accepted a position in a distant city, which necessitates my removal from this vicinity, it is with deep regret that I now tender my resignation of the office of resident Secretary to your institution, an office which your kind and generous support has rendered it a great plea-sure to hold. It would be impossible to express adequately my sense of your unvarying kindness, but I hope by various means to demonstrate in the future my abiding sense of the same, and my lively interest in this venerable and useful society. With renewed expressions of my thanks, I remain, Respectfully yours, HENRY MORTON.

Respectfully yours, Mr. Robert Briggs moved the acceptance of this resignation, and in connection with his motion spoke in the highest terms of Professor Morton, and of the success of his administration in the institute, and in its journal, which had now assumed a prominent position both at home and abroad.

Mr. Hector Orr seconded the motion with sentiments of regret, and with the best wishes

for the retiring secretary.

The president stated that Professor Mo had consented to continue his charge of the journal of the institute, which had met with such success under his management. Professor Morton's resignation was then accepted. and a vote of thanks tendered for his ser-

The meeting was then adjourned. The position accepted by Professor Morton is that of president of a college of mechanical engineering, to be erected in Hoboken, opposite New York, under an endowment of \$650,000 by Mr. Edwin Stevens, late of that

THE ANCIENT LAKES OF NORTH AMERICA.

Professor J. S. Newberry, of Cleveland, recently read a paper in that city. We extract the following:-

The changes that have taken place in the topography of the Western Continent have affected greatly the animal and vegetable life of a country at that time as beautiful and fertile as any other. The tertiary deposits of the eastern portion of the continent were marine, and at the Far West also there is a series of tertiary deposits—in California, in the region of the Sierra Nevada—marine in character. But in the interior of the continent is a far more interesting series of certain fresh-water deposits-fresh water containing a great number of fossil plants and the most remarkable series of animal deposits to be found on this continent east of the Rocky Mountains. There are two species of rhinoceros, the elephant, hippine quadrupeds, the sabre-tooth cat, whose tooth was in one specimen eight inches beyond the jaw, the most formidable tooth of any animal of which we have any knowledge. These deposits of the West were formed in fresh-water basins, and yet now there are almost no fresh water

basins in that region. Some slight idea of the nature of these deposits may be formed from the fact that almost everybody going to California talks about chalk deposits. Following in the old emigrant train, you will see various slabs of this chalklike earth set up for grave-stones. These infusorial beds are portions of the fresh water deposits. On the western side of the Rocky Mountains the deposits are similar, and are rich in diatomes. The fauna are interesting. On the east side of the Rocky Mountains the tertiary deposits have been but little studied,

although I have paid some attention to them. There are many alterations. The rivers run through a country comparatively level, and have cut down through the bottom of broad valleys, forming canons, whose walls are 1200 to 2000 feet high, and nearly vertical. The material entering into the deposits show vol-canic proximity. From them you can get an idea of the material thrown down in these ancient lakes. The conclusion of this is that on all these sides of the Rocky Mountains there were found extensive sheets of tertiary deposits full of the most interesting fauna on this continent. These lakes covered an area many times greater than our present freshwater lakes. They characterize a time in the history of this continent when it was exceedingly well watered, and contain a fauna richer than any other portion of the world at the present time, and almost all of them extinct. The climate indicated by the plants and animals was sub-tropical, and fern plants grew in great abundance from the Upper Missouri even beyond the British line, and flora covered all the northern part of the continent, so that men lived and vegetation luxuriated even in Greenland. Salt Lake represents only a series of such lakes—anciently fresh, but be-coming salt because of want of drainage. A

great many salt lakes and alkaline plains were

Thirteenth Word-Common Council, R. J. | here. The drainage now by the Klamath and other rivers is very great and shows that it has been greatly improved.

> -The editor of the Atlanta (Ga.) Intelligence —The editor of the Atlanta (Ga.) Intelligencer says that he held conversations with many gentlemen attending the Cobb County Fair, and that all agreed in saying that they were afraid they had planted "a little too much cotton," and not enough grain. Some planters are selling their coming cotton crop even now, for supplies to carry them through the year.
>
> —A man in York county, Me., complained of a widow for badly beating him because he drove his team across a platform she had laid to accommodate picnic guests at a beach. He as-

> commodate picnic guests at a beach. He asserted that a big dog held him behind while she belabored him in front, but notwithstanding these grievances the jury upheld the woman, and declared her action to have been justifiable. -The Missouri Republican State Committee has issued an address directing the election of

Congressional district, county, and township committees, in accordance with the plan of organization adopted by the Republicans of the State in 1868, to which they were largely indebted for their magnificent victory in that year. The plan provided for the election of these

committees every two years.

—Cornell University is about to send a scientific expedition to Brazil, the party to consist of "the most promising young men" at Cornell, and to be under the leadership of Professor Hartt, who has twice visited the country with Professor Agassiz. Their operations will be in the Amazonian Valley and on the coast southward to Bahia. The aid of the Brazilian authorities has been generously extended, and many friends along the Brazilian coast are ready to do all in their power to help it. The funds for the journey have been secured, but \$5000 more is

C. SMITH & CO. A. TIN, COPPER, AND IRON ROOFERS, No. 1624 SOUTH Street and No. 931 RIDGE Avenue, Patentees of the SPIRAL EXPANSIVE CONDUCTOR SPOUT. This spout has by a two years' trial proved to be a success, having put up some 500 stacks, every one of which has given entire satisfaction. It is a spiral coil, thus dispensing with the upright seam, which invariably breaks first in the spout. We guarantee it to be firm, more durable, to bear more freezing, and cost less than any other good spout. Roofing and Guttering at reason-able prices. Old Roofs Repaired and Painted. [5 21 im
