WANT OF SLEEP.-Opium or morphine is usually prescribed as a soporific. Both are violent remedies. and react violently; producing nausea, headache and prostration. They are often given when they are not needed; and not unfrequently they increase the irritation of the brain instead of soothing it. Probably in seventy-five cases out of a bundred in which they are administered. PLANTATION BITTERS, given in moderate doses and at proper intervals, would have the desired effect. Persons who find it difficuit to compose their minds to sleep after lying down at night, or whose slumbers are disturbed by bad dreams, or are too brief to afford due nourishment, are advised to try the Plantation Bitters as an anodyne; for this comprehensive medicine is not only a tonic and alterative, but a delightful sedative -a "balm of hart minds," as well as a revivilier of enfeebled frames.

Its use, as a means of producing healthful sleep, involves none of the unpleasant secondary consequences of a resort to the former narcotics. They all, without exception, excite the stomach; while the effect of the Bitters is to tone, and without irritating that sensitive organ.

PRESERVE THE MEALTH AND COMPORT OF YOUR CHILDREN by using Dr. Jayne's Tonic Vermifuge for the removal of Worms, the restoration of the appetite, debility of the stomach and digestive organs, and in all cases where a general tonic is needed. This old-established remedy will be found safe and sure in its action, pleasant to the taste, and a most useful auxiliary in maintaining the general health.

FROM WASHINGTON.

The New York Collectorship. Special Despatch to The Evening Telegraph.

Washington, July 5 .- Tae Senators from New York, Messrs. Fenton and Conkling, have been earnest in their efforts to obtain votes for and against the nomination of Murphy as Collector of New York city. Senators generally are non-committal on the subject, preferring not to say how they will vote until the time for decision arrives. They wait to hear all that can be said on Mr. Murphy's behalf, or hear all the charges that can be made against him, before they decide. Strict party men, it is thought, will sustain the nomination, as to oppose it would seem to be like fighting the President. It is not possible to say, however, what the result will be.

Affray with the Indians. Despatch to the Associated Press.

early to-morrow morning.

WASHINGTON, July 5 .- The Commissioner of Indian Affairs is in receipt of a letter from the Indian Agent at Saste, stating that recently one Cook, a white overseer on an excavation, deliberately shot an Indian through the head because the latter did not throw the dirt far enough. Three other Indians in the same pit, seeing

Cook reloading his gun, wrenched it from him and struck him over the head, killing him instantly. The Indians were arrested. Navat Order. Lieutenant Commander Keyser has been de-

tached from the receiving ship Vandala, and ordered to the receiving ship Vermont. The President. The President will return to Washington

CONGRESS.

Continued from Second Edition. When told that his theory would overrun the country with a bigoted and degraded race, his answer was, no matter as to consequences or the political effect this theory of mine must be fully indicated. Mr. Williams further argued that the efforts of capital to import cheap labor from abroad should be closely watched, for cheap labor meant not the home of the laborer and its comforts, but the hovel and its miseries. Referring to the immediate effects of Mr. Sumner's amendment, he said that eighty thousand Chinamen on the Pacific coast could at once make themselves voters, and that one hundred millions of Chinese could cross the Pacific and dwell in this country without being missed at home. He pre-dicted that the passage of the bill would unite the laborers of the country, white and black, in a com-mon effort to crush out a party that had invited this competition from China to oppress them, and that not enough Republicans would be left in the next Congress to tell the story of the party destruction—Mr. Schurz, of Missouri, said the Chinese question was one that appealed to many interests, and regretted that the excitement it had occasioned in certain quarters had found its way into the Senate. The Senator from Oregon (Mr. Williams) had drawn the picture of one hundred million Chinamen suddenly sweeping from their native homes across the Pacific and fairly submerging this country. What were the facts? Chinese immigranton across the acific fairly commenced in 148, and the yearly average to 1868 was not quite six thousand. year the number of Chinamen arriving on the Pacific coast was twelve thousand. Upon a liberal estimate of twenty thousand a year, allowing for deaths and the return of Chinese to their native land in was fair to presume that to bring a million Chinamen to this country would take seventy-five years. Therefore there was no immediate danger of the threatened Chinese deluge. He was in favor of the bill of the Senator from Nevada (Mr. Stewart) to prohibit Chinese coolie contracts, which would also prevent the introduction of coolies to be held here in a species of slavery. The character of Chinese immigration being thus far changed, the Chinaman transplanting himself permanently would gradually identify himself with and accommodate himself to the requirements of our civilization, and the number of immigrants would be reduced. Could we, ther exclude him from our party and political system? It might be remembered that the children of the Chinese born on the soil of this republic will be American citizens ipso facto. therefore, such of the Chinese who come here to remain and identify themselves with us, must be ncluded in our naturalization system. As to the meiuded in our naturalization system. As to the coolle trade, scarcely any prohibitory legislation could prove too stringent; but that class were among us and had found their way into the heart of Massachusetts. The question was now what to do with them. He would suggest to the Senator from Massachusetts whether it would not be better to educate than to persecute them. He believed that a the Chinapan was seen to the control of the country of the countr educate than to persecute them. He believed that as the Chinaman was weaned from the customs of his own home, he would gradually acquire the wants of our civilization, and if he could get higher wages he would seek for them to supply those wants. Interspersed with our population, the Chinese would not long remain the cheap producers and small consumers they now are. On the contrary, they would carry home with them these new wants and propagate them, thus creating in Asia new markets for the pro-

them, thus creating in Asia new markets for the products of our civilization. While strongly opposed to coolle immigration, he (Mr. Schurz) did not see how, in point of principle, we could throw any obstacle in the way of those Chinese who voluntarily came to reside among us. American civilization would eventually entirely absorb them.

After further discussion by Messrs. Carpenter, Sumner, and Conkling, at five O'clock the Senate took a recess until evening.

LAST EVENING'S SESSION. At half-past 7 o'clock the Senate proceeded with the bill, and after remarks by Messra. Fowler and Sumner the vote by which Mr. Sumner's amend-ment striking out the word "white" from the naturalization laws was adopted was reconsidered— yeas, 27; nays, 14.

Mr. Sumner's amendment was then rejected—

yeas, 14; nays, 30. PROCEEDINGS THIS MORNING. Washington, July 5 — Mr. Ramsey called up the bill granting land to the State of Minnesota to aid in the improvement of the harbor of Duluth, Lake Superior. Passed.

Mr. Sherman, from the Finance Committee, reported back the Funding bill, and moved that the Senate disagree to the House amendments, and agree to a committee of conference. The motion was serged to.

Sherman also reported, without amendment, the House bill to declare the construction of section 55 of the National Currency act approved June 1s,

1864, the object of the bill being to clear up an am biguity of law.

Mr. Fenton introduced a bill to incorporate the Tehauntepec Railway and Ship Canal Company. Referred.

Mr. Washburn, in submitting his report, stated that he hoped to obtain action on the question early in December. The report was lengthy and had appended to it

the speeches before the committee of Mr. Orton, President of Western Union, and Mr. Hubbard He hoped that members would take time during the vacancy to read the report and speeches, and he proposed to act understandingly on the assembling of Congress in December. If they would do so, they would find that this country is far behind the countries of Europe in furnishing to the people a cheap, swift, reliable and comprehensive system of telegraphy; that in those countries, as well as in the far-oif countries of Au tralia and New Zealand, the telegraph is operated and train and New Zeniand, the degraph is operated in connection with the postal service with entire success. In England the Government, slways slow and conservative, assumed the control of the lines by puchase on the 5th of February last, and reduced the tariff to a uniform rate of one shilling

(wenry-five cents) for twenty words, exclusive of a ldress, throughout the United Kingdom. The result has been that the number of despatches The result has been that the number of despatches has increased from week to week, or from 127,000 per week in February to 191,443 for the week ending June 1s. Mr. Scudamore, the Secretary of the British Post Office, writes that the success of the scheme is fully writes that the success of the scheme is fully assured; that in Ireiand, under a uniform tariif of one shilling, they were receiving 33 per cent. more money than the Continental Telegraph Company before received at three shillings and four shillings, and assurance is given that the British public will soon be favored with a uniform tariif of sixpence throughout the kingdom. In France, the telegraph under the Government management is brought within the reach of all. For ten cents a despatch of twenty words may be sent from a place in any department to any other place in the same depart. partment to any other place in the same department, and for twenty cents from one extreme of the empire to the other, a distance of over six hundred miles, and at these rates the system is not only selfsustaining but a source of over one million francs of revenue to the Government exclusive of a vast amount of Government despatches transmitted

In Switzerland and Belgium at an internal rate of 10c, the system is perfect and self-sustaining. To comprehend the vast strides other nations are mak-ing you have but to reflect that it was but the other day that a submarine cable was opened connecting England with Bombay, and thence by land lines with

Calcutta and Rangoon, in the Burman empire, also with Madras and the Point du Galle, at the southern extremity of the Island of Ceylon.

Contracts are already made, and twelve months will see a cable laid from Rangoon, from Singapore, and thence to Hong Kong and Shanghae, also from Singapore to Batavia in the island of Java; thence to Australia, traversing that country its entire length to Melbourne; thence crossing by submarine cable to Tasmania, crossing that country to Hobart Town; and thence by another submarine cable of 1200 miles in length to New Zealand, connecting both in Aus-tralia and New Zealand with a comprehensive sys-

tem of postal telegraphs.

But this is not all. Another line, starting at Vienna, passing down the Danube to Peterwaradin, striking across the country through Turkey to Con-stantinople, crossing the Bosphorus, traversing Asia Minor, down the valley of the Euphrates to the mouth of that sacred river, passing on its way the ancient city of Bagdad, the ruins of Babylon, and the site of the Garden of Eden, then by submarine cable in the Persian Gulf and Gulf of Ormus to the mouth of the Incus, where it connects with the telegraph sys-tem of India and still another line has been re-cently opened in facilitate correspondence with British India. The reaching Odessa it continues its course through the Crimea and the Caucasus across the Black Sea, thence via Tiflis and Tabris to Teheran in Persia, from whence it will soon connect

Siberia, and to-day her capital is in daily communication with the mouth of the Amoor in the sea of Cchkotsk and Poysat, in the sea of Japan, whence a cable will soon be laid with Hakodadi in Japan. While so much is being done the world over for the transmission of swift and cheap intelligence, may I not ask the careful and candid consideration of the House to the report and bill that I have just

submitted. A conference report on the bill for paving Pennsylvania avenue, was made and agreed to. The House then took up the Kentucky contested election case of Barnes against Adams, the resolutions reported being that Adams, the sitting member, is entitled to the seat, and that Barnes, the con-testant, is entitled to be paid his expenses in the

Movements of Insurgents Near Paceto Principe-The Upton. HAVANA, July 4 .- The rebel leader Bembeta entered the Puerto Principe jurisdiction again on the 27th ult. The loyal guerillas started in pursuit, and led to his camp by a rebel prisoner, sharp fight ensued lasting an hour and a half. Bembetta, after reforming his line three times, was finally routed. Sixteen Spaniards and forty-six Cubans were killed. Bembeta's force numbered six hundred.

The commanding officer in the Holgain dis-trict reports that he has captured the seven remaining men of the second George B. Upton expedition, and that they are now in jail at Holguin. He also states that the rebel Colonel who commanded the filibusters, was killed by a corporal and two soldiers, after a desperate resistance, during which the corporal was badly wounded.
