CITY INTELLIGENCE.

THE FUNERAL OF THE LATE ADMIRAL DAHL enen.—The remains of the late Admiral Dahl-gren will arrive in Philadelphia this evening, at about a quarter before 7 o'clock, by way of the Baltimore Railroad. The funeral services proper to be held to-day in the Presbyterian church, on Four-and-a-half street, in Washington city, will terminate in time for the procession to meet the Philadelphia train, and the body, at the conclu-sion of the services, is to be escorted to the depot. On account of the display in Washington there will be tittle or no formality here, all not necessary to the mere interment being dispensed with. The funeral procession, which will meet the train on its arrival at the depot, will consist only of four carriages and a hearse. The hearse will be heavily draped with flags and will be drawn by four black horses, but this is all that there will be to mark the peculiar character of the funeral. The four carriages are all that will be necessary to accommodate the family and escort who have charge of the body, and who accompany it from Washington. A file of marines from the Navy Yard will be in attendance for the purpose of firlig the customary salute over the grave. Owing to the late hour at which the train will arrive, the funeral will not move much before seven o'clock, or later. The interment will take place at Laurel Hill, and to allow time for the procession to reach the cemetery, the Interment will have to take place after sundown. The grave is to be prepared between that of the Admiral's first wife and that of Colonel Ulric Dahlgren, whose remains now lie buried in the family let. The funeral in this city is in charge of Mr. William H. Moore, who, as far as the family will allow, has left nothing undone which should be done for the appropriate rendering of the last honors to the deceased Admiral.

FROM WASHINGTON.

The President's Message to Congress. To the Senate and House of Representatives: -Your attention is respectfully called to the necessity of passing an Indian Appropriation bill before the members of Congress separate. Without such appropriation Indian hostilities are sure to ensue, and with them suffering, loss of life, and expenditures vast as compared with the amount asked.

The latest intelligence from Europe indicates the imminence of a war between France and North Germany, and in view of this, sound policy indicates the importance of some legislation tending to enlarge the commercial marine of this country. The vessels of this country at the present time are insufficient to meet the increase which the existence of a war in Europe will impose on the commerce of the United States, and I submit to the consideration of Congress that the interests of the country will be advanced by the opportunity afforded to our citizens to purchase vessels of foreign construction for the foreign trade of

the country. An act to this effect may be limited in its duration to meet the immediate exigencies. The foreign mail service of the United States is in a large degree dependent upon the Bremen and amburg lines of steamers. Department has entered into contracts in writing with the two companies above named, and with the Williams & Gulon line, respectively, for a regular and continuous service of two years. The only arrangement that could be made with the Inman and Canard lines is temporary, and may be driven off at any time. The North German lines are first-class in point of

speed and equipment. Their steamers are regularly making the trip across the Atlantic in from twenty-four to thirty-six hours in advance of the Williams &

Guion line. Should the North German steamers be blockaded or impeded by France, our postal intercourse with foreign nations will be greatly embarrassed, unless Congress shall interpose for its relief. I suggest to Congress the propriety of further postponing the time for adjournment, with the view of considering the questions herein communicated. U. S. GRANT.
