THE DAILY EVENING TELEGRAPH-PHILADELPHIA, WEDNESDAY, AUGUST 3, 1870.

PITTSBURG.

From an Occasional Correspondent.

MONONGAHELA HOUSE, PITTSBURG, July 30. 1870 .- Well may this be called the "Smoky City." On our arrival here, a few days since, I was not able to distinguish houses or objects on the opposite side of the river at Birmingham, though it was early in the afternoon and the distance but a few hundred yards from our windows. Dozens and scores of foundries, factories, rolling-mills, and river steamers are continually emitting from their chimneys the black and thick smoke, which at times totally obscures the vision. Yet occasionally the smoke is lessened, the breeze wafts it away, and a beautiful prospect is opened up.

Having fine quarters on the Monongahela front of this pleasant and well-kept hotel, we all find it very interesting to watch the varied movements on the water of the many barges and steamers busily plying to and fro, and to catch lovely glimpses of scenery on the beautiful hills opposite. We passed two hours of the early morning very agreeably in strolling along Mount Washington heights, and enjoyed the clear and bracing atmosphere and the fine extended views of the country in the rear, and very often would have quite a satisfactory view of different parts of the city proper, Allegheny City, and both rivers, when the temporary cessation of the dense smoke aided by the wind would permit.

A novel and very useful railway has been in operation during the past season. I refer to the inclined plane reaching from the foot of the bridge on the other side, opposite an hotel, to the top of Mt. Washington, thus bringing places within a minute's easy and pleasant ride that were nearly half an hour away by the steep and tedious ascent of the road. This railway is at an angle of thirtyfive degrees, and is laid solid and strong on three heavy tubes reaching to the rocky side three hundred and eighty feet by three spans, behind and under which the Pan Handle Railroad runs, and the rest of the way, about three hundred feet, is upon the earth and rock of the hillside. A fine brick building on the summit contains the engine and machinery, with huge wheels or rollers which wind up and lower the cars alternately by means of inch and a half wire cables, and in one minute the ascent or descent is made. It seems firm as the mountain itself, and accidents are almost impossible, yet a few timid ones, especially ladies, refuse to ride upon it. The cars will accommodate twenty-five or thirty, though forty have been crowded in, as a car is never known to be full. The average rate of travel is 1200 a day, on Sundays more than double that, and on the fourth of July nearly 5000 were taken up and down. As the affair has been demonstrated a success, it will soon lead to others being constructed along the bluff, and so bring much valuable building property into the market. The whole structure cost about \$50,000, and would have appeared a great risk to any but an enterprising community. Though in the hottest of the season, the mercury ranging here for days together high up among the nineties, as with you, yet still there is a life and animation among the citizens that I cannot but admire. Everybody seems busy and no one idles away his time. Corner loafers are scarce, and of beggars I have seen none. It would be strange if, in such a huge manufacturing centre, there were a single person seeking it that could not find employment in some capacity or other. As an evidence of the growth and prosperity of business men in Pittsburg, I noticed the improvement in various factories in the introduction of new and valuable machinery. There has been recently introduced into the largest bakery here an automatic cracker machine, at a cost of over five thousand dollars. I believe there are only three of these in use all over the United States. Quite a number of persons have examined it, and observed its wonderful operation. It is capable of turning out about ten thousand prackers a day. But a few years since this business was commenced on a small scale by the present proprietor, Mr. Marvin, and now. though it has increased to a consumption of over eight thousand barrels of flour annually, the supply is hardly equal to the demand. For four days past rain has fallen here in great quantities, not steadily, but in frequent copious showers, accompanied by much thunder and vivid lightning. The sun has shone out bright and beautiful at intervals. It is a libel upon Pittsburg to say that we never see the sun or the blue sky, for I have seen them many times this week, even from the heart of the city. There is a story that at stated times the children of the poorer classes are gathered at the river bank and undergo a summary process of ablution and scrubbing, and then their parents come and select their own, having been unable before to identify them from their neighbors' offspring. Believe it those who wish to.

REVIE	W	OF	N	E	W	B

-Claxton, Remsen & Haffelfinger send us the following recent publications of Harper & Brothers:-

Harper's complete edition of the sermons of Rev. Frederick W. Robertson will be likely to find readers among many who do not, as a general rule, have much taste for this style of literature. We commented favorably upon this work a short time ago, and we are pleased to take the occasion of a second copy being laid upon our table to again recommend it to the attention of Christians of all sects as containing much sound doctrine and eloquent exposition of the principles of Christianity.

"The Speeches, Letters, and Sayings of Charles Dickens," by George Augustus Sala, is a book manufactured to supply a demand created by the death of the great novelist. Mr. Sala is reported to have been the intimate friend and to some extent the pupil of Mr. Dickens, and under these circumstances a catch-penny performance like the one before us, hurried through the press almost before the subject of it is cold in his grave, is offensive to good taste, to say the least of it. Mr. Sala supplements his collection of odds and ends by a sketch of Dickens and by Dean Stanley's funeral sermon, neither of which contains any facts with which the public are not already familiar. The speeches of Mr. Dickens, which compose the bulk of the book, are for the most part uninteresting, apart from the fact that they were delivered by him, and except some meagre reminiscences there is little to redeem the affair from the charge of being a vulgar attempt by one literary man to make money out of the public regard for a brother writer.

"Harper's Hand-Book for Travellers in Europe and the East," edited by W. Pembroke Fetridge, has entered upon its ninth year of usefulness. This guide-book is a standard authority with European tourists, and its practical utility has been proved over and over again. No pains are spared by the publishers or the editor to make it as complete as possible, and to bring its information down to the latest date. During the past year the work has been almost entirely rewritten, and additions and corrections were made up to May, 1870. Full directions about obtaining passports, securing passage on steamers, exchange, and other matters of interest to travellers, are given in a plain and understandable manner. The book is strongly bound in leather, and is accompanied by a railroad map. "John," by Mrs. Oliphant, is a love story

from the pen of a lady who has a well-established reputation as a graceful and fascinating writer. We recommend it as very pleasant reading.

-"The Old Countess," translated from the German of Edmund Hofer, and published by J. B. Lippincott & Co., is a more than sually interesting story of German life. The plot is ingenious and with a spice of sensationalism in it that will not make it less attractive to many readers, and there are some admirably drawn characters that show the hand of a master artist. Edmund Hofer, the author of the story, has a high reputation in Germany, and the translator has done the American public a service by introducing him to their notice through the medium of the volume before us. J. B. Lippincott & Co. also send us the August numbers of The Sunday Magazine, Good Words, and Good Words for the Young, which are, as usual, elegantly illustrated and filled with choice reading matter from the pens of some of the best English writers of the day. -The Presbyterian Publication Committee send us "Rufus the Unready," by Martha Farquharson, a religious story for young people, and "Heavenward Bound," by Oliver A. Wadsworth, a book of religious counsel for young Christians. Both of these works will be valuable additions to Sunday-school libraries. -The Aldine Press for August has a specmen from Dore's "Dante"-"Dante at the Tomb of Farinata," from the tenth canto of "The Inferno"-which is an admirable illustration of the style in which the French artist has interpreted the Florentine poet. The other illustrations are "The Great Falls of the Missouri;" "Falstaff and his Recruits;" "A Roman Farm-yard Scene:" "The Flushed Partridge;" and "A Conflict of Authority." The literary articles are up to a high standard of excellence. The Aldine Press is an admirable specimen of typography, albeit the impression of Dore's design is not equal to the French prints of the same subject. Received from the Central News Company, No. 505 Chesnut street. -The August number of The Schoolday Visitor, which has been sent us by Turner & Co., is filled with attractive stories, sketches,

JAPANESE NUBSERY TALES .- The Japanese writes a correspondent of the Boston Traveller, as rude and unpoetical as they seem to be, have their fairies, genii, Peris, and imps, answering to those of which European juveniles tell such wonderful tales. Some of these stories are very ingenious and would bear copying into the fairy lore of America, while others would be far from acceptable, owing to the great difference in customs and religion. I do not know that the subjoined tales which were told by a Japanese nurse to the European children at Hiogo, some of whom were under her charge, are really a part of Japanese folk lore, or made up for the present amusement of the children. But in either case the children were pleased, and when they repeated some of the stories to me, they were very enthusiastic in the praise of the old Japanese grandmother who had thus entertained them.

和 动和职 语言的 经

Once there was a little Japanese boy dressed in a nice suit of black linen, and he said to himself one day, "I will be a great Daimio. I will have big swords and fine dress, and my mother and father shall be happy with plenty of rice and jewel rings. But the little boy was poor, and all he had was this one suit of clothes. He was walking on the side of Fusiyama one day, thinking how he should be great, when the mountain shook and great smoke-devils came out of the top. The boy was afraid, until a little fairy, awakened by the noise, rose up at his feet, and taking him by the hand led him away from the mountain. When the little spirit was about to leave the boy said, "You know how to save me from smoke-devils, and you must know how to make me a great Daimio. Will you tell me?" "Go and pull a turnip," said the fairy spirit as she took her way back to the sacred mountain. So the little boy looked about him for a garden, and when he had found one he searched for a turnip. He soon found a great one with tall leaves, and he set about digging around the roots. "No, no !" said the turnip, "my root is deep and you cannot dig so low, but take hold of my head and pull, for my root will follow where my head goes." So he seized hold of the stalk and pulled. Lo! it came up so easy that the boy fell in the mud. "Ho, ho !" laughed the turnip, "you have some-thing to learn if you would be a great Daimio. Men, like turnips, pull easiest by the head but you had better leave them where they have taken root than to venture yourself in pulling them up." And the little boy took the advice, and made the acquaintance of leaders only. He was never, however, overanxious to be in the company of great men, and soon the Tycoon, seeing his great care and wisdom, made him a prince. So he was

Once a little girl was told by her mother to make rice cakes. But the little girl wanted to play shuttlecock, and left the dough in the bowl. A little imp in the shape of frog came, and when the girl was about to hit the cork a blow, he threw the dough into the air. It fell upon the girl's head and streamed down over her shoulders until she was entirely covered. Her mother came, and, supposing it was all dough, threw her into the oven, and so the naughty little girl was baked.

One man worked in his rice and wheat fields, while his neighbors spent their time in Pe wrestling, drinking saki, and playing ball. Finally winter came, and they had no food. So they went to the industrious man and said, "Give us rice and bread." But the other said, "No; you serve the spirit of amusement, I serve the spirit of work. Go to your spirit for food, and I will go to mine.' So they all starved.

WATER-MARKS, PRINTING, ING PAPER STYLE OF MANUFACTURE.

MANUFACTURE. ove Envelopes and Wrappers must be postage stamps, of such denomina-and colors, must have such water-r devices to prevent imitation, and ning and ruling as the Postmaster-irect. The envelopes must be made orough manaer, equal in every respect furnished to bidders by the Depart-aper must be of approved quality, factured for the purpose. avelopes are order of the styles known d" or "Self-ruled," (lines printed in-on the face), the same shall be fur-at additional cost, the contractor harges for royalty in the use of

arges for royalty in the use of ations for said lined or raled envelopes DIES. The dies for embossing the postage stamps on the envelopes and wrappers are to be executed to

the satisfaction of the Postmaster-General, in the best style, and they are to be provided, renewed and kept in order at the expense of the contractor The Department reserves the right of requiring new dies for any stamps, or denominations of stamps

not now used, and any changes of dies or colors shall be made without extra charge. Before closing a contract the successful bidder may be required to prepare and submit new dies for the approval of the Department. The use of the

The dies may or may not be continued. The dies shall be safely and securely kept by the contractor, and should the use of any of them be temporarily or permanently discontinued they shall be promptly turned over to the Department, or its igent, as the Postmaster-General may direct.

GUM.

GUM. The envelopes must be thoroughly and perfectly gummed, the gumming on the flap of each (except for circulars) to be put on by hand not less than half an inch the entire length; the wrappers to be also hand-gummed not less than three-fourths of an inch in width across the end.

SECURITY FROM FIRE AND THEFT.

Bidders are notified that the Department will re-quire, as a condition of the contract, that the en-velopes and wrappers shall be manufactured and stored in such a manner as to insure security against loss by fire or theft. The manufactory must at all times be subject to the inspection of an agent of the Department, who will require the stipulations of the contract to be

faithfully observed. PACKING.

All envelopes and wrappers must be banded in parcels of twenty-five, and packed in strong pasteboard or straw boxes, securely bound on all the edges and corners with cotton and linen cloth, glued on, each to contain not less than two hundred and ifty of the note and letter sizes, and one hundred and fity of the official or extra official size, separately. The newspaper wrappers to be packed in boxes, to contain not less than two hundred and fifty each. The boxes are to be wrapped and securely fastened in strong manifla paper, and sealed, so as to safely bear transportation by mail for delivery to post-masters. When two thousand or more envelopes are required to fill the order of a postmaster, the transportation by a postmaster, the straw or pasteboard boxes containing the same must be packed in strong wooden cases, well strapped with hoop-iron, and addressed; but when less than two thousand are required, proper labels of direction, to be furnished by an agent of the Deor intector, must be placed upon each package by the contractor. Wooden cases, containing envelopes or wrappers, to be transported by water routes, must be provided with suitable water-proofing. The whole to be done under the inspection and direction of an agent of the Department. DELIVERY.

PROPOSALS.

TO CONTRACTORS AND BUILDERS. -SEALED PROPOSALS, indorsed "Proposals for Building a Public School-house in the Twentleth Ward," will be received by the undersigned at the office, south-east corner of SIXTH and ADELPHI Streets, until THURSDAY, August 4, 1870, at 12 o'clock M., for building a Public School-house on a lot of ground situate on Eleventh street, below Thompson, Twentieth ward.

Said school house to be built in accordance with the plans of L. H. Esler, Superintendent of School Buildings, to be seen at the office of the Board of Public Education.

No bids will be considered unless accompanied by a certificate from the City Solicitor that the provi-sious of an ordinance approved May 25, 1860, have been complied with. The contract will be awarded only to known mas-

ter builders. By order of the Committee on Property. H. W. HALLIWELL

OITY ORDINANCES.

COMMON COUNCIL OF PHILADELPHIA. CLERK'S OFFICE, }

PHILADELPHIA, July 8, 1870. In accordance with a resolution adopted by the Common Council of the city of Philadelphia on Thursday, the 7th day of July, 1870, the annexed bill, entitled "An Ordinance to Create a Loan for a House of Correction," is hereby

published for public information. JOHN ECKSTEIN, Clerk of Common Council

N ORDINANCE

A To Create a Loan for a House of Correction. Section 1. The Select and Common Councils of the City of Philadelphia do ordain, That the Mayor of Philadelphia be and he is hereby authorized to borrow, at not less than par, on the credit of the city, from time to time, for a House of Correction, five hundred thousand dollars, for which interest, not to exceed the rate of six per cent. per annum, shall be paid half yearly on the first days of January and July, at the office of the City Treasurer. The principal of said loan shall be payable and paid at the expiration of thirty years from the date of the same, and not before, without the consent of the holders thereof; and the certificates therefor, in the usual form of the certificates of city loan, shall be issued in such amounts as the lenders may require, but not far any fractional part of one hundred dollars, or, if required amounts of five hundred or one thousan dollars; and it shall be expressed in said certificates that the loan therein mentioned and the interest thereof are payable free from all taxes. Section 2. Whenever any loan shall be made by virtue thereof, there shall be, by force of this ordinance, annually appropriated out of the income of the corport'e estates and from the sum raised by taxation a sum sufficient to pay the interest on said certificates; and the further sum of three-tenths of one per centum on the par value of such certificates so issued, shall be appropriated quarterly out of said income and taxes to a sinking fund, which fund and its accumulations are hereby especially pledged the redemption and payment of said certifi-

Altogether, we think better of Pittsburg the more we see of it, and have been much pleased with our visit.

Before coming here our party spent a week at Niagara Falls, finding, of course, enough to interest us and occupy our time. The mighty cataract presents few changes from former years, but it is always grand, and one need never the looking upon it in all its varied aspects. The hotels were not full by any means. Saratoga and the seaside watering-places seem to monopolize the bulk of visitors this season. Dozens of newly married couples were there for a day or two. most of them, as some one said, trying to look as if they had been married for years. but deceiving nobody.

. We shall soon return to Philadelphia. hoping to find the weather moderated from the excessive heat of the past few weeks, which seems to have affected all parts of the Yours, truly, country. Sto.

The weather in Virginia has been remarkably pleasant this summer. According to the Lynchburg Virginian, the thermometer has not gone above 89 degrees in the shade at any time since the beginning of the heated term.

and poetry for young readers. -The Philadelphia Photographer for August contains, among other matters of interest, a list of the exhibitors at the late National Photographic Exhibition in Cleveland. The 'specimen" is a fine view of the interior of the exhibition building.

-Van Nostrand's Eclectic Engineering Magazine for August presents an excellent selection of articles from the best foreign engineering and scientific journals.

-The July number of The American Architects' and Builders' Monthly contains a view and plan of the Cincinnati Work-house and two pages of illuminated letters from manuscripts of the fourteenth century, together with a variety of well-written articles on subjects connected with art, architecture, and building.

-The accidental fall and bursting open of a trunk has recently been the means of displaying the charms of a very pretty young lady, to whom the article belonged. She was on her way to the Catskill Mountains with a party of friends. Among the number was a geotleman, the acquaintance of a day. He assisted her to replace the contents of the truck, and was so struck by the happy way in which she took her "misfortune," that he made a proposition of marriage on the spot, and was accepted. In this particular instance the romance is quite refreshing, but it is not always well to allow marriage to be the result of accident.

FURNITURE, ETC.

HOVER'S

Celebrated Patent Sofa Bedstead

Is now being made and sold in large numbers both fin France and England. Can be had only at the manufac-tory. This piece of furniture is in the form of a handsome PARLOK SOFA, yet in one minute, without unscrewing or detaching in any way, it can be extended into a beau-tiful FRENCH BEDSTEAD, with Spring Hair Mattress complete. It has the convenience of a Bureau for holding, is easily managed, and it is impossible for it to get out of order. This Sofa Bedstead requires no props, hinges, feet, or ropes to support it when extended, as all other sofa beds and lounges have, which are all very unsafe and liable to get out of repair, but the Bedstead is formed by simply turning out the ends or closing them when the Sofa is wanted. The price is about the same as a lounge. An examination of this novel invention is solicited.

NOTICE-PAVING PENNSYLVANIA AVENUE. The Commission appointed by "An Act to Provide

The Commission appointed by "An Act to Provide for the Paving of Pennsylvania Avenue," approved July 8, 1870, is authorized to select and determine the best kind of Pavement to be used in paving Penn-sylvania avenue, and to have said thoroughfare paved therewith from the northwest gate of the Capitol to the crossing of Fifteenth street, west. The Commission met and organized in accordance with the above law and proceeded to the election of

The Commission met and organized in accordance with the above law, and proceeded to the election of a President and Scoretary. It was decided to invite all patcatees, owners, or inventors of any of the improved pavements, of whatever material com-posed, whether of stone, wood, asphalt, concrete, or any other kind, to furnish accurate and detailed drawings or models, descriptions, specifications, inany other kind, to furnish accurate and detailed drawings or models, descriptions, specifications, in-cluding the nature of the foundation to be laid, how packed, and, in fact, all information as to their con-struction and durability. This information is desired to enable the Commission to decide in the first in-stance upon the general nature of the material to be used in paying the avenue, and then to specify the used in paving the avenue, and then to specify the preference that may be agreed upon in regard to some particular method to be adopted. A reference some particular method to be adopted. A reference to the law (public, No. 144) will give the required information as to how the payments for said pave-ment will be made. It is provided therein "That the cost of laying such pavement shall not exceed the sum of four dollars per square yard." The esti-mated area of said pavement is in the neighborhood of sixty-five thousand (65,000) square yards All communications in relation to pavements should be addressed to the Secretary, Gen. N. MIOHLER, Office of Public Buildings, Grounds, and Works, U. S. Capitol, WASHINTON, D. C. 729 lot
