#### CHEATS AND CHECKS.

The Dishonesty of Theatrical Employes. The Pall Mall Gazette makes the announcement following:—"Mr. Calvert, manager of one of the Liverpool theatres, has invented an instrument which appears destined to defeat the machinations of the most astute check-taker, and render impossible one peculiar violation of the Eighth Commandment. He makes his checks or vouchers not of card but of copper, and these he inserts in a fitting cylinder, with a vertical opening through which the whole pile is visible. The trouble of counting is not required, the cylinder being marked on a graduated scale, the single degree of which corresponds to the thickness of the vouchers, so that the manager way at a gleace see the state of the manager may at a glance see the state of his prosperity, as he could that of the weather by the thermometer. But this mystery of the cylinder is not revealed to the money-taker, who receives it enclosed in a mahogany case (locked, of course), with a trap at the bottom, which it is his function to open, allowing the youthers. is his function to open, allowing the vouchers, one at a time, to fall. The check-taker is provided with a similar engine, similarly enclosed, but so far differing from the other that the opening is at the top, not at the bottom. Every check dropped in is duly registered by the cyling der. The scheme is brought to perfection by the connection of each machine with an electric clock, on the dial of which the state of the cylinders is instantaneously recorded whenever a voucher is taken from the one and dropped into the other. Mr. Calvert's patent right to the "Recorder" (as he terms it) is now the property of Mr. Chatteris, of the Strand, and the ma-chines have already been largely purchased by managers. Will its utility be compromised by a strike on the part of oppressed check-takers, deprived of the right prescriptive of doing wrong which they and their predecessors have exercised for many generations—possibly from the days of Shakespeare? We have heard a story told about a machine invented some years ago, which, though less perfect than Mr. Cal vert's, at least threatened to make the practice of fraud a little more difficult than before. The check-taker, instructed as to the purpose of the invention, presented himself boldly to the manager, and said, "Sir, If this machine is used, my office is not worth holding." And there-upon he took his leave. MUSICAL AND DRAMATIC.

HAVE YOU HEARD ABOUT THIS?— Owing to the high price of meats of all kinds, a company has been organized to manufacture pork out of pig iron. Whatever doubts may arise in regard to the success of this novel enterprise, there can be none concerning the superiority of the Honeybrook Lehigh Coal sold by J. C. HANCOCK, at the northwest corner of Ninth and Master streets. This superb vein of anthracite maintains the high reputation it gained when first introduced to our market. It is just the fuel that every house-keeper should use, and when prepared under HAN-COCK'S supervision is entirely free from dust or slate. Test it for yourselves. 9 9 3m
