The greater part of the road is already in operation, and the present earnings are largely in exces of the operating expenses and interest on the bonds. The balance of the work necessary to establish through connections, thereby shortening the distance between St. Paul and Chicago 45 miles, and 90 miles to St. Louis, is rapidly progressing, in time for the movement of the coming grain crops, which, it is estimated, will double the present income of the

The established character of this road, running as it does through the heart of the most thickly-settled and richest portion of the great State of Iowa, together with its present advanced condition and large earnings, warrant us in unhesitatingly recommending these bonds to investors as, in every respect, an undoubted security. A small quantity of the issue only remains ansold, and when the enterprise is completed, which will be this fall, an immediate advance over subscription price may be looked for.

The bonds have fifty years to run, are convertible at the option of the holder into the stock of the Company at par, and the payment of the principal is provided for by a sinking fund. The convertibility privilege attached to these bonds cannot fail to cause them, at an early day, to command a market price considerably above par. U. S. Five-twenties at present prices return only 4% per cent, currency interest, while these bonds pay 9% per cent, and we regard them to be as safe and fully equal as a security to any Railroad Bond Issued; and until they are placed upon the New York Stock Exchange, the rules of which require the road to be completed, we obligate ourselves to rebuy at any time any of these bends sold by us after this date at the same price as realized by us on their sale.

All marketable securities taken in payment free of ommission and express charges.
