-In the House of Representatives yesterday, after the close of our report, Mr. Butler objected to the introduction of anything that would prevent him bringing his Ku-klux bill before the House, and the Democrats "filibustered" against Butler. The Speaker said it could only be done by general consent, whereupon several Republican members objected. Mr. Butler asked whether it would be in order to have read a despatch stating that the Ku-Klux in Mississippi murdered four men last night; and Mr. Garfield remarked, "That is another Democratic victory." Mr. Butler sent up his Ku-Klux bill, when Mr. Cox raised the point that a day's notice of its introduction had not been given. The Speaker sustained the point, Mr. Peters then offered a resolution providing for the appointment of a select committee of thirteen to inquire into the condition of affairs in the late insurrectionary States, so far as regards the execution of the laws and the safety of life and property, and to report in December next-said committee being authorized to take testimony during the recess, and send a sub-committee to visit the South. The New British Census. A census of the people of Great Britain is to be taken at midnight on the 2d of April. The manner of taking the census there has the recommendation of being prompt, thorough, and accurate. It is confined to the enumeration of inhabitants. Four days before the enu mera-tion blank schedules are delivered at every ing at midnight on Sunday, April 2. No child born after midnight is to be included, nor is any person dying before that hour on that night. These schedules include the age, birth-place,

and occupation. The districts are made sufficiently small to enable the agents to collect all the schedules on Monday, they taking the pains to see that each has been filled out according to the directions. Each family makes its own record and delivers the paper to the collector. In this way the enumeration in the whole Island is simultaneous, is completed in a single day, and gives the exact population at a particular hour. The general estimate in England is that England, Scotland, and Wales will show an aggregate population of 31,000,000.
