CITY ITEMS.

The Knickerbocker Insurance Company. The following report has been issued in reference to the affairs of this Company :--

Pursuant to the authority vested in me by law. and in accordance with an intention expressed in my annual report of 1870 to the Legislature of this State, I have made and caused to be made certain examinations into the affairs and condition of several of the insurance companies doing business in this State.

In the month of November, 1870, an examination of the books, accounts, assets, and general condition of the Knickerbocker Life Insurance Company of New York was instituted. That examination has just been completed, and although in the annual report referred to it was distinctly announced that "It need not be considered as an imputation upon the standing of any company that it is under examination," still, as it is claimed that an effort has been made to use the fact of the protracted in vestigation in this case, to the disadvantage of the company, I deem it due to the company and also to the public to make a report of the result of such examination.

The examination was not made in consequence of any specific charges against the company or its management, but in accordance with the general intention above referred to.

The Knickerbocker was organized in 1853, upon a capital of \$100,000, and for the first ten years its progress was slow. Since 1863, however, its business has rapidly increased, until, as appears by the annual statement of the condition of the company, December 31, 1869, it had outstanding 22,078 policles, insuring the sum of \$66,398,439, with aggregate assets of \$6,680,965, and aggregate liabilities of \$5,960,701.

There were but three companies organized under the laws of New York which reported a larger amount of business done or more assets. The business of the company was done on the "note" plan, and consequently quite a large portion of its assets consisted of premium notes.

It had been intimated that note companies were quite careless in regard to the accuracy of the statement of assets, and that notes were frequently included among the assets which were, in fact, given for premiums upon policies not in force, and hence of no value.

The Knickerbecker being a leading note company, it was thought best to make, at as early a date as practicable, a thorough investigation of all Its affairs, with a view to settling this and other questions, at least so far as that company was concerned.

The examination made has been most extensive and exhaustive. All the notes, amounting in the aggregate to over 25,000 in number, have been separately examined, a full list made and compared with the entries in the books, and they have, without excention, been found to be notes given upon policies in force. All the other assets and accounts of the company have also been subjected to the closest scrutiny, and quite large amounts standing upon the books against agents have been disallowed, from which the company will no doubt be able ultimately to realize, but which are of so uncertain a value as to prevent their being allowed in my estimate of the condition of the company.

* Notwithstanding the thorough sifting to which the assets of the company have been subjected, however, I am happy to be able to state that they amounted, on the first day of January, 1871, to the sum of \$7,020,973.85, while the liabilities, including reserve fund and capital stock, amounted to \$5,844,-996'26, leaving a surplus of assets over all liabilities of \$175,977 59. This surplus, however, would be increased to \$550,662.84 by including the amounts disallowed, as above stated, which are claimed by the company to be valid and available assets, thus showing the company to be entirely solvent, and entitled to the confidence of its policy-helders and the

It affords me much pleasure, also, to be able to state that the Company has adopted the policy of, as rapidly as possible, abandoning the "note" system and effecting insurances upon the all-cash basis, and that with this and other improved methods of business adopted, and the extensive business already established, the Company has every prospect of continued success.

Complaints have been made against this as well as other comyanies, of a want of fairness and liberality towards policy-holders, but so far as the facts appear, from my investigation, I find that the Knickerbocker has honorably and promptly met and discharged all legitimate claims, the gross sum paid for such claims upon policies since its erganization amounting to \$2,881,849-86, besides dividends paid to policy-holders amounting to \$995,-

In view of all the facts disclosed, I feel warranted in saying that the Company is entitled to public con-GEORGE W. MILLER, Superintendent Insurance Department State of New

INJURIOUS EFFECT OF TOO MUCH FOOD .- Undoubtdly many of the ills that flesh is heir to, particurly in the vernal months, arise from the common practice of imposing upon the stomach more food than that organ can properly digest. Persons of sedentary habits are particularly liable to be injured by giving full scope to their appetites. By indulging at night and at other unseasonable hours in rich viands, cannot fail to produce indigestion, dyspepsia, skin diseases, and sometimes, when the system becomes overcharged with blood, that dangerous disorder, apoplexy. The habit of partaking of nocturnal meals rapidly alters the "tone" of the system and diminishes the solvent powers of the digestive

Frequent and active exercise would work off the injurious effect arising from free living, but persons who thus indulge their appetites usually have no desire to exert themselves in the open air beyond the limited amount prompted by their inclination or business. The effects, too, of occupations upon the system are very apparent. The hardest manual labor in the open air has the influence of exercising a free circulation of the blood and produces a keen appetite, with a corresponding activity and promptness of digestion. The pale and sallow complexions of operatives in woollen mills, ivory-turners, and of many artisans, are an unfailing evidence that these pursuits are injurious to health, and when constantly engaged in them the poisoned atmosphere of the apartments often produces a fatal inflammation of

An ounce of prevention is worth a pound of cure, is an old and truthful saying, Therefore we advise all readers of THE TELEGRAPH who are troubled with the complaints now very prevalent-dyspepsia, headache, indigestion, disordered liver, want of appetite, nausea, or feverish skins-to take without delay Dr. Schenck's Mandrake Pills. We know of no remedy so harmless and decisive in its action. It at once strikes at the root of the disease and produces a healthy tone to the system. These pills can be obtained of druggists throughout the country at twenty-five cents per box.

Readers of THE EVENING TELEGRAPH desiring to consult Dr. Schenck, Sr., or Dr. Schenck, Jr., for consumption or any other disease which their remedies-Pulmonic Syrup, Seaweed Tonic, and Mandrake Pills-cure, can do so free of charge at their Principal Office, Sixth and Commerce streets, Philadelphia, any Saturday morning after 10 o'clock.

BURNETT'S COLOGNE the best made in America

MR. WILLIAM W. CASSIDY, the jeweller at No. 8 Bouth Second street, has one of the largest and most attractive stocks of all kinds of Jewelry and Silverware in the city. He has also on hand a fine assortment of fine American Western Watches. Those who purchase at this store at the present time are certain to get the worth of their money.

A. S. HAMILTON'S
