THE LEASE. The advocates of the lease in the Board of Directors of the United Companies do not occupy an enviable position, either as regards the stockholders of the New Jersey companies, the public, or the Pennsylvania Rallroad Company. They boldly proclaimed to the public in advance that three-fourths of the stockholders desired to lease.

Through the newspapers they have represented that the lease had actually obtained the consent of the two-thirds of the stock owners. The newspapers have teemed with circulars from the committee authorized by the joint board to solicit the consent of the stockholders. with other articles signed "Many Stockholders," depreciating the property of the United Companies and their capacity to earn ten per cent. dividend. These newspaper articles have freely menaced a rival road in order to compel timid stockholders to part with their property for an inadequate consideration.

While crying down the value of the work of the United Companies, they have magnified the wonderful power and resources of the Pennsylvania Railroad, and threatened that, unless the United Companies surrendered to them, a new railroad would certainly be built, impairing the value of their property.

Now, what has been accomplished after all this flourish of trumpets? As Mr. Webster said to Mr. Hayne, "The vigor and success of the war have not quite come up to the lofty sounding phrase of the manifesto." The committee to obtain the consent of the stockholders have worked with all their energy; they have districted city and country, and, with a small corps of paid itinerant agents, scoured every nook and corner in search of stockholders to sign the

Commencing with the 18,000 shares which they say the majority of the directors represent, they have obtained only about 6000 shares. Many, it is said, who gave their consent without reflection, have expressed their regret at so doing, and desire to withdraw it. Now this is the work accomplished by them since the 19th of May.

The Pennsylvania Railroad Company were no doubt persuaded to submit their propositions under the assurance that the consent of the stockholders would be an easy conquest. They may thank their friends among the majority directors for the unpleasant position which a defeat will compel them to occupy.

The defeat may be ascribed to two causes:-First. The stockholders were refused the sight of the schedule of property to be transferred, which the lease promised should be submitted to them. They had, therefore, no knowledge of the amount or value of the property they

were to part with. Second. The stockholders resent the attempt to treat about the sale of their property by agents unauthorized to act for such purpose. The directors were elected to protect, preserve, defend, and manage the great property of the stockholders, not to initiate measures for its alienation and the utter destruction of all power

in the stockholders to have any control whatever

in relation to it. We suppose that many of those stockholders who have given their consent are really ignorant of the value of the works of the United Companies, but the work of signing, we learn, has come to a stand. The stockholders not signing know what it is they are asked to relinquish. They know that ten per cent. annual dividends on the capital stock, \$18,990,-677.50, is an adequate compensation for \$40,000,-000 or \$50,000,000 of property; they know, too, that railroad property in the United States, on all the great routes of business, doubles in value every ten years. They know that if a railroad property doubles (as is stated in "Poor's Rallroad Manual" for 1871) in ten years anywhere it is sure to double in the favored location occupied by the works of the United Companies. The fact that the revenues and business of railroads in the United States double every ten years is ascertained in Mr. Poor's valuable work by a careful analysis of the statistics furnished by the reports of the different railroads throughout the

whole country. It may, therefore, be asserted with entire confidence that the works of the New Jersey companies-now at the lowest estimate worth \$40,000,000-will in 1880 be worth \$80,000,000. This fact alone of itself should be sufficient to satisfy every intelligent stockholder that it would be a bad bargain to surrender to the Pennsylvania Railroad Company for ten per cent. on less than one-fourth what the works of the United Companies will be worth ten years A STOCKHOLDER.

#### CLIMATE AND RESOURCES OF MON-TANA.

BY B. F. POTTS, GOVERNOR OF MONTANA TERRITORY.

Midway across the continent, between the Great Lakes and the Pacific Ocean-in the heart of that Ne & Northwest, the extent, character, and resources of which the people are at last beginning to appreciate-embracing within its boundaries four paralleis of latitude and no less than twelve degrees of longitude, lies the great Territory of Montana. The superficial area of this Territory is extensive enough

to make three States as large as New York, the Empire State of the East; and, as I have stated elsewhere, I believe it to be the richest region in agriculture and mineral resources entire American continent. There are at least fifty thousand square miles of tiliable land within its limits; and this land, under a cheap and simple process of irrigation, is of unsurpassed fertility, yielding in the greatest abundance all varieties of the cereals. I have seen samples of wheat which yielded 80 bushels to the acre, and the average yield throughout the Territory, even with the very imperfect methods of cultivation which are in vogue here, is from forty to sixty-five bushels. This exceeds the yield of the famous wheat-fields of Minnesota, and is about four times as great as the average wheat crop of Ohio. Rye, oats, and barley produce enormously, and the yield of vegetables is simply without a parallel in the history of horticulture in America. The common yield of potatoes,

10r instance, is 400 bushels per acre. Lands for grazing purposes, too, are of vast extent and of the best quality. Grasses as nutritious as sheaf-oats cover the hills and valleys and extend far up the mountain sides, affording pasturage for numberless herds of cattle and sheep during the entire year. The cattle alone now to be found in the territory number at least sixty thousand head; and so abundant are these grasses and so mild is our climate that no grain or hay is fed to them at all-they fake care of themselves and keep fat all winter. Our meat markets are supplied with beef taken from among the different herds at all seasons of the year; and it is found to be of the fattest and sweetest, making delicious food, superior generally in quality and flavor to the grain-fed stock of the States Certainly no country can surpass this for grazing purposes; and there is none where, in the future, when the Northern Pacific Railroad has reached us, such fortunes are to be made in the

business of raising stock for the market. Of the mineral wealth of Montana all the world has heard. It has been called "the silver spoon" which was in the nation's mouth when it was born: but, besides the silver, not less than twelve million dollars' worth of gold dust was taken from the mines

last season, and fron, copper, coal, and other mine-

rais exist in exhaustless abundance. I suppose, however, that the thing about our New Northwest which has most surprised the public is the genial character of its climate. Radically different as it may seem from the prevalent idea regarding it, it is nevertheless true that the climate of Montana, as a whole, is milder than that of New York, while the purity and dryness of the atmosphere makes the variations of temperature far less

The old theory, that the further north we go the more severe the climate becomes, is now generally exploded. It is understood, at last, that isothermal divisions, except in their larger aspects, are entirely independent of degrees of latitude; and the various explorers and topographers who have been sent out here by the Government have shown by instrumental tests that the temperature of Walla Walla, on the 46th degree of latitude, is the same as that of Washington City, on the 38th; that of Clark's Fork, in Montana, on the 48th, the same as that of St. Joseph's, Missouri, on the 41st; and that of the Bitter Root Valley, Missonea county, Montana, on the 46th, the same as that of Philadelphia, on the 41st.

The winters in this section are generally open and pleasant, as may be inferred from the fact of the cattle grazing without shelter all winter. The valleys are hardly ever covered with snow, and it is rare that the roads are not dry and passable for ten months in the year, except on the high mountains, where the snow falls to considerable depths. On the mountains, of course, as in mountainous regions everywhere, winter sometimes pinches hard; but even these are not the least attractive features of the territory. The elevation of the mountains, valleys, and plains of Montana above the level of the sea is from 2000 to 4000 feet less than that of Wyoming and Utah. This fact alone goes far to explain the milder climate and vastly greater productiveness of Montana.

How this great wealth, agricultural and mineral, is to be utilized and made to contribute its due share to the nation's commercial prosperity is a question not less important to the people at large than to the inhabitants of Montana itself; and in considering it I am brought to that great enterprise—the Northern Pacific Railroad—now building from east to west across our entire territory. This road will traverse our richest valleys, and furnish an outlet for the immense future surplus productions of the Territory. All that has heretofore been written about the superior land-grant of the Northern Pacific Railroad in Montana scarcely gives an adequate conception of the extent and true value of the

The company will receive twenty-five thousand six hundred acres of our best agricultural and grazing lands for every mile of road that is built-lands which not only possess all the advantages which I have mentioned, but are within easy reach of timber, and abound in fine building-stone of almost every variety and inexhaustible in quantity. I have no doubt that these lands will not only cancel the entire cost of building the railroad, but will leave a large surplus to the company.

The Northern Pacific Railroad is of immense im portance to Montana. It will enable our stock raisers to compete on favorable terms with those of Illinois and other States in the markets of the Eastern cities. A new impetus will be given to all our industries. Our mines will be developed, new ones will be opened, and those that produced twelve million dollars in gold last season will far exceed that sum annually.

Our population will rapidly increase; the sixty two cities and towns we now have will be doubled in number and quadrupled in size; and the public lands, now unoccupied, will be cultivated by actual settlers. Other prosperous States will spring up around us; and before we enter upon another century this great Northwest, now lying broad and inviting before the settler, will be contributing its rightful share towards the wealth, commerce, and general prosperity of the nation.

The enterprise which is opening this New Northserves, as it receives, the encouragement, co-operation, and support alike of all who as Americans feel an interest in the country's progress, or who as capitalists desire a liberal return upon investment.

CITY ITEMS.

WHITCOMB'S ASTHMA REMEDY-Sure cure.

MR. WILLIAM W. CASSIDY, the jeweller at No. 5 South Second street, has one of the largest and most attractive stocks of all kinds of Jewelry and Silverware in the city. SEWING MACHINES.

The American Button-Hole, Overseaming,

And Complete Sewing Machine Combined

Has had an unprecedented sale since its introdection. They have stood the TEST OF THE SEVEREST CRITICISM, and have withstood the VEREST CRITICISM, and have withstood the vilest and most malignant abuse from rival agents. The simple fact of its DOING EVERY VARIETY of work done by other Machines, making the same shuttle-stitch—should convince any candid person of its EQUAL MERITS, at least, with other machines, and when we combine the BUTTON-HOLE and the "OVER-AND-OVER STITCH" (by which sheets are made, and several other kinds of work which no other machine can do), it should convince any one of its SUPERIOR MERITS.

The tedious work of making Button-holes and the

The tedious work of making Button-holes and the slow, tiresome work of "overseaming" is made easy by this Machine, and while you are buying a Machine which is to be your companion for life, why not get the one which does the greatest variety of

We add a few recommendations:-We add a few recommendations:—
Bosron, June 23, 1870.—Dear Sir:—I like the american better than any sewing machine I have ever used. I can make a better button-hole on it than can be made by hand; but, of course, it takes

I have made fifty-nine (59) button-holes in twenty (20) minutes in skeleton coats.
I have had the machine four months and I have proved satisfactory, I have changed the machines from button-holes to plain sewing a great many times, and it never gets out of order.

It affords me pleasure to recommend the machine to all, both for family sewing and making button-holes. Wishing you much success,

Mrs. L. E. DUNNING,

Manufacturer of Clothing, No. 80 Conder street,

East Boston, Boston, June 27, 1870.—Dear Sir:—We are using one of your Plain American Sewing Machines, and find it the most successful of any we have ever used, particularly for sewing window shades and window hollands, making the stitch look well on the wrong side of the work—a result which we have not been

side of the work—a result which we have not been able to attain with other machines.

W. B. ELLIS & CO.,

Upholsterers, No. 23 Broomfield street.

BOSTON, July 19, 1870.—I have used the American Buttonhole and Sewing Machine Combined for five months in making button-holes in the files of pants, etc., and they have given perfect satisfaction.

Foreman at Minor, Beals & Co.'s Clothing Manufactory.
CONCORD, N. H., March 12, 1870.—Dear Sir:—
I also take pleasure in saying that I have for the past two years used these machines in the manufacture of clothing, and I think that for even work, and ture of clothing, and I think that for even work, and certainly of execution, there is no machine extant that will compare with them. For the past twelve years I have used a number of different makes of machines, including two of I. M. Singer's, and I make no mistake when I say that I never had a machine in my shop or house that was to be compared with the American Machine.

## Raise the Standard High.

Next to the Minister of the Gospel stands a regular graduated Physician, in our estimation. But, while we hold in high esteem those who administer to the last wants of our loved ones, we are compelled to differ with many of them in treating THROAT and LUNG DIS-

Dr. L. O. C. WISHART'S "THEORY."

His Remedies Cure.

First. Not by stopping cough, but by loosening and assisting nature to throw off the unhealthy matter collected about the throat and bronchial tubes, causing irritation and

Second. Most Throat and Lung Remedies are composed of anodynes, which allay the cough for a while, but, by their constringing effects, the fibres become hardened, and the unhealthy fluids coagulate, and are retained in the system, causing disease beyond the control of our most eminent physicians.

Third. The Pine Tree Tar Cordial, with its assistants, are preferable, because they remove the cause of irritation of the mucous membrane and broncial tubes, assisting the lungs to act and throw off the unhealthy secretions and purify the blood, thus scientifically making the cure perfect.

A Voice from the People.

A Cure of Seventeen Years Standing of Painful Suffering.

I, HOOPER JOLLY, of Philadelphia, do certify, that for seventeen years I was afflicted with Dyspepsis, and what I assert is well known by many respectacle persons of Dorchester county, Maryland. Having tried the best Physicians and every medicine I heard of, but of no effect, I was induced to call at Dr. WISHART'S Office, and, after examination, was pronounced to have Chronic Dyspepsia. I procured his Great American Dyspepsia Pills and Pine Tree Tar Cordial. I now can recommend it for the cure of Dyspepsia and Nervous Diseases.

HOOPER JOLLY,

You will be a Dead Man in Less than

Three Years. Such was the judgment of my physician, after a careful examination. He said by continual preaching and exposure I had brought on bronchitis, and he advised me to stop preaching. I then put myself under medical freatment, which did me but little good. My throat was so swollen that breathing was very difficult. It frequently opened, and then I found relief for a time. I tried all kinds of patent medicines, none of which did me any good. Passing through Harrisburg, I called on a lady triend. I in-formed her of my affliction. She said, "I was affected in the same way, and none of the doctors could cure me. I tried Dr. L. Q. C. WISHART'S Pine Tree Tar Cordial; took a few bottles of itnow you see me as I am, cured! at the wash-tub twice a week. I would advise you to try it." I went immediately to the drug store and procured it, and I thank God I am now able to preach the Gospel. I now use it more as a preventive than a cure.

JOHN F. LEIB, Ex-Pastor Evangelical Church, Germantown, Pa.

I Had to Yield my Prejudice at Last.

I was prejudiced to any advice or medicine that did not come through my family physician. My boy, of three years old, had a fall, and a worm came from him. Fearing he might have worms, I went to our Druggist, and he gave me a box of Dr. L. Q. C. WISHART'S Worm Sugar Drops. When I gave them to my child I said "This is a humbug," but, to my surprise, in less than a day and a night he discharged forty worms, one fourteen inches long.

What the Doctor Said. That the child might have died at any time, and no physician would have known the cause without a post-mor.em examination.

FREE OF CHARGE.

MRS. APPLETON.

Philadelphia.

No. 177 North FORTIETH Street,
