THERE AS I ON EXISTED A PUBLIC DEFINATION OF THE STORY OF stimulant action on the circulatory system, removate the strength of the body, and restore the wasted or discused energies of the whole erganism. Hence on occasional dose is advantageous, even though no serious derangement exists; but unnecessary dosing; should never be carried too far, as every purgative medicine reduces the strength, when taken to excess. The thousand cases in which a physic is required cannot be enumerated here, but they suggest themselves to the reason of every body; and it is confidently believed this pill will answer a better purpose than any thing which has hitherto been available to mankind. When their sirtues are once known, the public will no longer doubt what remedy to employ when in need of a cathattic medicine. Being sugar-wrapped they are cleasant to take, and being purely vegetable, no form can arise from their use in any quantity. For minute directions see wrapper on the Box.

This remedy has won for itself such notoriety from its cures of every variety of pulmonary disease, that it is entirely unnecessary to recount the evidences of its virtues in any community where it has been employed. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every sections of the country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried its superiority over every other medicine of its kind is too apparent to escope observation, and where its virtues are known, the public no longer besitnet what antidote to employ for the distressing land dangerous affections of the pulmonary organs which are incident to our climate. And not only in formidable attacks upon the lungs, but for the midder varieties of Colins, Coughs, Homespies, &c.; and for Children it is the pleasar test and safest medicine that can be obtained.
