FAMILY PHYSIC.

THERE has long existed a public demand for an effective purgative pill which could be relied on as sure and perfectly safe in its operation. This has been prepared to meet that tenand, and an extensive trial of its virtues has conclasively shown with what success it accomplishes the purpose designed. It is easy to make a physical pill, but not easy to make the best of all pills—one which should have none of the objections, but all the advantages, of every other. This has been attempted here, and with what success we would respectfully submit to the public decision. It has been unfortunate for the patient bitherto that almost every purgative medicine is aerimonious and irritating to the towels. This is not. Many of them produce so much griping pain and revulsion in the system as to more than countertualance the good to be derived from them. These pills produce no irritation or pain, unless it arise from a previously existing obstruction or derangement in the bowelay Being purely vegetable, no harm can arise from their use in any quantity; but it is better that any medicine should be taken judiciously. Minute directions for their use in the several diseases to which they are applicable are given on the box. Among the compliants which have been speedily cured by thems, we may mention Liver Complaints, in its various forms of Jaundice, Indigestion, Languor and Loas of Appetite, Listlessness, Irritability, Billous Headache, Billous Fover, Fever and Agne, Pain in the Side and Loins; for, in truthiall these are but the consequence of diseased action in the liver. As an aperient they afford prompt and sure relief in Coatronad dose of the strength, and prepare the system for the charge of seasons. An occasional dose is mulatate the strength of the blood, in short, any and every case where a purgative is required.

They have also produced some singularly successful cures in Rheumatisms, Gout, Dropsy, Gravel, Erysipelas, Palpitation of the Heart, Pains in the Back, Stomach, and Side. They should be freely taken in the spr

Thus remety has won for itself such notoricty from its cures of every variety of pulmonary disease, that it is entirely mnecessary to recount the evidences of its virtues in any community where it has been employed. So wide is the field of its usefulness, and so numerous the cases of its cures, that almost every section of the country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When lone tried its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidoto to employ for the distressing and dangerous affections of the pulmonary organs which are incident to our climate.
