 Utrumque regerm, fua multitudo conlalutaverat. E Hugonots delivered from the fear of pu-nifhment, by the publication of the Edict anuary, had began to recover courage, and held frequently public aflemblies; their party appeared confiderable, both by their number and
the quality of their members: and their forces were not inconfiderable. The Prince of Conde had openly declared himfelf their head ; he was in appearance, reconciled with the Guifes, in obedience to the orders of the King : but, in his heart he burnt with an impatient defire to re venge himfelf, againft his principal perfecutors, for the outrages which he had received. The Admiral, who in the view to aggrandize himfelf, as well as his brothers, more ftrictly united than ever to the party of the Hugonots, moderated the ardor and vehemence of the Price, by the and in the fame fentiments, were engaged the Prince of Porcien, the Lords of Genlis, of Gram mont, of Duras, the Earls of Rochefoucault and of Montgomery, the Barons of Ardrets, of Bonchavan nes, Soubire, and feveral other great men of the kingdom. With any, the leaft authority of go vernment, they were in a condition to refift, an oppofe boldly the oppolite party.
The Queen, forced as the thought to take ad vantage of a conjuncture fo favorable for her own defence, and that of her children; and re duced to the neceffity of embracing the firt party which prefented, however dangerous it might be expected from time and events, the unravel ling all their intrigue. She feigned to be fagdifpofed to embrace their opinions. To confirm them the was more in this opinion, by exterior demonftrations, fhe caufed their minifters to come into her apartment, and appeared to hear them with pleafure. She manifefted great confidence and benevolence to the Admiral, and the Prince of Conde, in the frequent converfations the had with them. She deceived the Dutchers of Montpenfier, by her falfe confidences, and made ufe of her, to allure the principal Hugonots; the better to color the promifes and hopes, which the gave in fecret, by apparent meafures. She wrote even to the Pope in equivocal terms. Somethes he demanded aree and general councl, fach as the Calvimins delired: Rometine, perime flicited the ufe of the communion in both kinds, difpenfation to priefts to marry; the liberty of praying in the vulgar language, and other fimilar innovafions, as the Catholics called them, which the Hugonots wifhed, and introduced De Lifle, the French ambaffador at Rome, feconded her fo perfectly, that, by exciting doubts concerning her faith in the minds of the Pope and the Catholies, the obliged them to obferve grea caution in their own cond uct, for fear they fhould irritate her, and difguft her againft the Roman eligion. By the falne artifice the deceived the penetration, and gained the hearts of the Hugo ors, by perfuadig them that fhe was wholly the implacable hatred which they once bore her, had given place to confidence and attachment. It was not only the people that the amufed by thefe appearances : the Admiral himfelf, in Spight of all his appearance, policy and penetration, had fuffered himfelf to be feduced. He hefitated not to give the Oueen a circumftancial account of the number, forces and defigns of the Calvinifts, of the correfpondences which they maintained, both within and without the kingdom, and of ail other particulars which concerned his party ; as foon as fhe gave him to underfand, that the defired to have exact information before the declared herfelf, affuring him that the would embrace openly that party, as foon as it hould be fufficiently powerful to place her out and the triumvirate comence of the Catholics Guife the Confable and the King of Navarre Thus, by a change equally promp of incredi ble, the King of Navarre attached himfelf to the Catholic party, and Oueen Catharine, at leaft in appearance, became favorable to the Hugonots Thefe variations were at the time attributed to the levity of mind of the King of Navarre, and the natural inconfancy of the fex of the Queen : and it is thus that fome Hiftorians have fince judged : who were either not capable, or had not opportunity, like Davila, to unravel the fecret prings of there refolutions.
Is it poffible to place an unbalanced government, in a light more defpicable or more contemptible Can human nature be more difgraced, than by this endlefs feries of unions, feparations, And yet it is moft obvious, that fuch a feries muft forever be the effect of a conftitution, where there is nolegal quilibrium.
