

LONDON, August 18. MOVEMENTS OF THE AUSTRIAN AND PRUSSIAN ARMIES.

On the 29th of July, the whole Prussian army quitted their camps near Coblenz, and commenced their march in three columns towards the frontiers of France.

The Austrian army under Prince Hohenlohe, marched from their camp near Mannheim, in the night of the 1st of August.

The Austrian army destined to act against France, in Anterior Austria, and along the Rhine to the Netherlands, consists of 126,470 men.

This army has a train consisting of four hundred pieces of cannon. In passing the Rhine at day-break, on the 2d, they left the baggage behind, which proves that they have some enterprize of moment in contemplation. It is supposed that it is an attempt upon Landau.

Instead of the Spaniards being neutral, they have an army of 20,000 men at Cartua; M. de Caramon and other emigrants at their head. The advanced guard of 3000 has marched for Mont Louis.

The French citizens are flying from every part of the kingdom to the frontiers, and all the departments are exerting themselves with unexampled and unabating zeal.

That of Vosges being required to furnish 6000 National Guards, obeyed the requisition by sending nine thousand men.

In another part of the kingdom, 6000 armed citizens were raised in a few hours, and in six days afterwards arrived at the frontiers.

CHARLESTON, October 5.

M LONGSTREET, of Augusta, has announced to the public, that he has lately completed, in miniature, his newly invented steam engine, calculated for moving all kinds of heavy machinery; of which he gives the following account, in the Augusta Chronicle of the 22d ult.

This engine is so constructed and applied to work, as to perform from 40 to 45 strokes with each in a minute, without the complication of wheels, cogs or cranks; and all its operations are managed by a single cock.

This machine is so very simple in its construction, that it is immaterial whether the cylinders are wood or metal, nor do I care much of what shape they are: and in the workmanship of all the parts (except the cock) there is very little accuracy required.

I shall only observe in this mere sketch, that from my own knowledge of the different methods heretofore practised in the application of steam, that none is more simple, nor none whereby the same quantity is more advantageously applied, than on my principles; as I am convinced that the entire friction of a machine, whose cylinders were 16 or 18 inches in diameter, would not exceed two hundred pounds weight, independent of its being applied to any machinery.

I have so ordered and arranged the different parts, that if any one should get out of repair (which by the by they are not very subject to) each can be got at and receive such repairs as they stand in need of, without interrupting the other parts. Such is my confidence with respect to the success of this machine, that I will venture to aver, that for five hundred pounds one may be made and kept in repair four years, that will be capable of grinding 150 bushels of grain per day; or saw 2000 feet of inch boards in the same time; and I would add, if it was not for fear of being accused with a balloon or steam-boat project, how easily I could apply it to boating.

This machine is now finished, and at my house in Augusta, where it can be seen by all those that have any doubts with respect to the authenticity of what I say.

The JOURNAL of the THIRD SESSION of the SENATE of the UNITED STATES, may be had of the Editor hereof.

Grand Family Bible.

PROPOSALS

FOR PRINTING BY SUBSCRIPTION, An ELEGANT EDITION of the SACRED SCRIPTURES

OF THE OLD AND NEW TESTAMENTS, with the APOCRYPHA, On a very large and beautiful new Type, and superfine Paper.

THE great importance of the Holy Scriptures, interesting to every individual; the divine excellence of its doctrines and precepts, and the beauty and sublimity of its passages, have long made it a capital object of attention, as to procure occasion or opportunity for eulogium.

The pious or enterprize of individuals has presented this invaluable book to the public in a variety of forms; in some editions it has been highly embellished with superb engravings, which have greatly enhanced its price; in others it has been accompanied with voluminous commentaries, which necessarily increased the size, while a variety of plain cheap copies have generally diffused the knowledge of the Scripture, and made the purchase easy to every class.

Without wishing in the smallest degree to lessen the merits of the various editions, whether plain or ornamented, which the public are already in possession of, it is deemed to remark, that very many readers of taste and judgment have expressed a wish for a Family Bible unencumbered with additions. There still appears room for another edition on a beautiful new type, superior in size and elegance to any bible that has yet been printed in the English language, and which, leaving the adventitious circumstances of ornament or comment, may exhibit the Oracles of God in their native simplicity.

SPECIMEN OF THE TYPE.

3 ¶ And God said, Let there be light: and there was light.

With respectful submission to the judgment and candour of the public, the following proposals are offered:

I. The work shall be printed with the greatest fidelity and attention to correctness both in the text and marginal references, on a superfine Paper made on purpose, with an elegant new Type cast for the work of the size of the above Specimen.

II. The work will be comprised in twenty numbers, making two elegant volumes in Folio; to be furnished to subscribers at one dollar each number. To prevent any complaints of want of punctuality, no part of the work will be delivered unless paid for.

III. The first number, containing sixty folio pages, elegantly printed, will be furnished on the first Saturday of July next, when subscribers are to pay the price of the first and second numbers, and the price of one number to be always in advance till the work is completed. The subsequent numbers to be published regularly on the first Saturday of each succeeding month, till the whole is finished.

Subscriptions will be received in Philadelphia by the Publishers, THOMAS DOBSON, No. 41, South Second-street, and JOHN PARKER, No. 259, North Second-street; and by all the Booksellers: in Charleston, by William P. ABRAHAM FOSTER,

Salem, Massachusetts, August 1, 1792. (cpt)

THE Editor of this Gazette earnestly requests all those of his Subscribers, whose accounts are of one, two or three years standing, to discharge them as soon as possible.

All persons empowered to collect monies for the paper, to whom payments have been made, would greatly oblige him by transmitting the sums received, and the names of the subscribers who have paid.

While every grateful acknowledgment is due to those whose punctuality has enabled the Editor thus far to continue the publication—he is obliged to desire, that so great is the expense attending its prosecution, and so large the amount of arrearages, that unless a considerable part of that amount is speedily realized, it will be impossible for him to continue the Gazette with any reference to a distant and extensive circulation.

The price of this Gazette is Three Dollars per annum—One half to be paid at the time of subscribing.

To the Public.

THE subscriber returns his most respectful compliments to his friends and the public, for the many favors he has received, and begs leave to inform them that he has upon hand a few fine toned

FORTE PIANOS,

which he will warrant superior to any imported, and which he will dispose of on reasonable terms. The great number of FORTE PIANOS lately imported from London and Dublin, induces the subscriber to caution the public against the artful insinuations of persons commissioned to vend them—who, for a very trifling compensation, recommend instruments that are nothing but the refuse of the European Music-Shops, and imported at a mere trifle, and sold for the same price as a good instrument, to the great disappointment of the ignorant purchaser, who generally pays as much for repairs in a year or two, as the original cost of a good instrument.

N. B. MUSICAL INSTRUMENTS let out by the month or quarter, likewise Musical Instruments tuned and repaired in the best manner, and on the most reasonable terms, by

CHARLES TAWES,
