Perhaps there is no science more entertaining and useful than geography. It reveals the discoveries of travellers—the remarkable curiofities of all countries, in nature and art—the fituation of provinces, cities, towns, villages, rivers, & mountains-in fine, the history, manners, customs, laws, forces, revenues, and government of different na-

It is an old observation, that "there is not a fon or daughter of Adam, but has some concern with geography;" and that a knowledge of this science is indispensable towards the study of history with advantage or fatisfaction. Indeed a man unacquainted with it, cannot discourse on the most common newspaper topics of the day without betraying his ignorance.

So much for geography generally. With re-fpect to the prefent plan, let it suffice to remark, that Guthrie's Geography has been long acknow-ledged to be the best in the English language; however, the account of America in it has, from obvious reasons, been very erroneous and defec

tive. The errors of former editions will be cor-rected, and the defects supplied, by gentlemen of abilities, who have engaged to superintend this undertaking, and to avail themselves of all the in-formation that can be procured, to render it the noft complete edition extant
