

### Vinall's Arithmetic.

THE Second Edition of this work, with improvements, will speedily be put to press. The rapid sale of the first edition, greatly beyond the author's most sanguine expectations, encourages him to print a second edition. He intends to have it printed upon much better paper than the former, and with a new type. The Bookellers who wish to take a number of copies in sheets, are requested to apply to the author for particulars.

\* 1000 Copies.

At a meeting of the SCHOOL COMMITTEE, February 5th, 1793.

The Committee, appointed to examine "The Preceptor's Assistant, or Student's Guide," being a systematic treatise of Arithmetic, by JOHN VINALL, teacher of the Mathematics & Writing, in Boston, reported, that they have attended the service, and are of opinion, that the work is executed with judgment, and is as well calculated for the use of schools, counting houses, and private families, as any of the same compacts that has hitherto been offered to the public.

VOTED, That the above report be accepted, and that Mr. VINALL be furnished with a copy of it, whenever he shall desire it.

Copy of the Records. Attest,  
CHARLES BULFINCH, Sec'y.

The following character of the above work, is given in the Review of the *Massachusetts Magazine*, for Jan. 1793:

"This is a very useful work, and is no ill proof of the judgment and industry of the author. The rules are laid down with propriety, and the examples annexed are sufficient for their illustration. One part of the work deserves particular commendation. We mean that which the author titles 'Mercantile Arithmetic.' It occupies a considerable portion of his book, but not more than its importance will justify. We would recommend to the young Arithmetician to pay a particular attention to this branch. He will find its principles well explained. And should he make himself master of them, he will always have reason to acknowledge his obligation to the judicious and laborious author. We cannot but congratulate the rising generation on account of the many useful productions which have lately appeared; and in which their improvement has been principally consulted.—Among those productions we must place this treatise of Arithmetic. We should be wanting in justice to the author, should we not acknowledge that his work is in reality that which its title imports—THE PRECEPTOR'S ASSISTANT, or STUDENT'S GUIDE."

### TO THE PUBLIC.

THE Author is sensible that the first edition of his American Geography (which makes Part I. of the above work) was in many instances defective, in others erroneous, and in some offensive. It has been his endeavour, as it was his desire, in the present edition, to supply the deficiencies, correct the errors, and meliorate the offensive parts of the last. To assist him in this business, he has received many valuable communications from the heads of departments in the general government, and from gentlemen of respectability in the several states. The description of foreign countries (which composes Part II. of the above work) has been carefully compiled from the most approved writers on Geography, and useful information introduced from the discoveries of the latest Navigators, Travellers, and respectable authors. Indeed, no pains nor expense have been spared to render this work the most complete, accurate, and useful of any ever offered to the public.
